

Contents

1 Application of Sapphire	1
1.1 Use in Jewelry Industry.....	4
1.2 Use in Engineering.....	6
1.3 Use in Optics.....	13
1.4 Use in Medicine	31
References.....	42
2 Properties of Sapphire	55
2.1 Physical Properties.....	55
2.1.1 Crystal Structure and Morphology of Sapphire.....	55
2.1.2 Optical Properties	80
2.1.3 Mechanical Characteristics	95
2.1.4 Dynamic Strength of Sapphire.....	99
2.1.5 Thermal Properties.....	109
2.1.6 Electrical Properties of Sapphire	114
2.1.7 Laser Properties	119
2.1.8 Wettability.....	125
2.2 Chemical Properties	128
2.2.1 Dissolution	128
2.2.2 Thermochemical Polishing	139
2.2.3 Corrosion Resistance	147
References.....	153
3 Radiation Effects in Sapphire	177
3.1 Changes on the Surface.....	179
3.2 Changes in the Bulk	185
References.....	188
4 Crystal Growth Methods.....	189
4.1 Crystallization from the Gaseous (Vapor) Phase	189
4.2 Crystallization from Solution.....	196

4.3	Growth of Sapphire from the Melt.....	208
4.3.1	Physicochemical Aspects of Crystal Growth from the Melt and Properties of the Melt.....	211
4.3.2	Crystal Growth from the Melt Not Using Crucibles.....	222
4.3.3	Methods of Crystal Growth from the Melt in Crucible.....	237
4.4	Solid-Phase Crystal Growth.....	276
	References.....	283
5	The Regularities of Structure Defect Formation at the Crystal Growing	289
5.1	Point Defects.....	289
5.2	Dislocations.....	295
5.3	Block Structure of Crystals.....	316
5.4	Impurity Nonuniformity.....	322
5.5	“Grain” Structure	329
5.6	Correlation Between Structure Quality of Crystals and Mechanisms of Their Formation	333
5.7	Inclusions in Sapphire.....	343
	References.....	360
6	Influence of Chemical–Mechanical Treatment on the Quality of Sapphire Article Working Surfaces and on the Evolution of Surfaces under the Action of Forces.....	363
6.1	Preliminary Grinding and Lapping	363
6.2	Polishing	365
6.3	Structure of Mechanically Treated Sapphire Surfaces.....	374
6.4	Control of the Defective Layer during Mechanical Treatment of Sapphire	380
6.5	Prediction of Sapphire Strength Characteristics by Microindentation Methods.....	390
	References.....	396
7	The Effect of Thermal Treatment of Crystals on Their Structure Quality and Mechanical Characteristics	399
7.1	Dislocation and Block Structure	400
7.2	Evolution of Impurity Striation.....	403
7.3	Difference in the Behavior of the Dislocation Ensemble in the Volume and in the Subsurface Layer.....	406
7.4	Formation of a Dislocation-Free Zone.....	411
7.5	Anomalies of the Crystal Behavior at High-Temperature Annealing.....	414
7.6	Influence of the Annealing Medium on the Crystals’ Structure and Their Machinability	417

7.7	Effect of the Annealing Atmosphere on Mechanical Properties.....	427
7.8	Effect of the Annealing Atmosphere on Optical Properties	427
7.9	Effect of Annealing on Laser Characteristics of Ruby and Sapphire Articles	430
7.10	Stress Relaxation under Annealing	431
7.11	Effect of Annealing on the Crystal Strength.....	434
7.12	Effect of Annealing on the Optical Inhomogeneity	436
7.13	Effect of Annealing on the Small-Angle Light Scattering in Crystals.....	440
7.14	Effect of High-Temperature Annealing on the Light Transmittance of Machined Surfaces	442
7.15	Annealing under Loading	443
	References.....	444
8	Methods for Obtaining Complex Monolithic Sapphire Units and Large-Size Crystals	447
8.1	Creation of Single-Piece Crystalline Joints	447
8.2	Gluing of Sapphire.....	448
8.3	Soldering of Sapphire	448
8.4	Welding of Sapphire.....	450
8.4.1	Diffusion Welding	451
8.4.2	Methods of Diffusion Welding Intensification.....	454
8.4.3	Welded Seam Structure upon Diffusion Welding	456
8.4.4	Diffusion Welding Using Interlayers	458
8.4.5	Technique of Diffusion Welding	461
8.5	Welding by Contact Zone Melting.....	463
	References.....	466
	Conclusion	469
	Index.....	471

Sapphire

Material, Manufacturing, Applications

Dobrovinskaya, E.R.; Lytvynov, L.A.; Pishchik, V.

2009, XX, 480 p. 100 illus., Hardcover

ISBN: 978-0-387-85694-0
