

Contents

1	Fronts in Homogeneous Media	1
1.1	Traveling Fronts of Burgers and Hamilton–Jacobi Equations	5
1.2	Traveling Fronts of Reaction–Diffusion Equations	7
1.3	Variational Principles of Front Speeds	11
1.4	Random Variables and Stochastic Processes	13
1.5	Noisy Burgers Fronts and the Central Limit Theorem	18
1.6	Exercises	21
2	Fronts in Periodic Media	23
2.1	Periodic Media and Homogenization	23
2.2	Reaction–Diffusion Traveling Fronts in Periodic Media	25
2.3	Existence of Traveling Waves and Front Propagation	28
2.4	KPP Fronts and Periodic Homogenization of HJ Equations	35
2.5	Fronts in Multiscale Media	44
2.6	Variational Principles, Speed Bounds, and Asymptotics	48
2.7	Exercises	51
3	Fronts in Random Burgers Equations	53
3.1	Main Assumptions and Results	53
3.2	Hopf–Cole Solutions	56
3.3	Asymptotic and Probabilistic Preliminaries	58
3.4	Asymptotic Reductions	59
3.5	Front Probing and Central Limit Theorem	63
3.6	Exercises	67
4	Fronts and Stochastic Homogenization of Hamilton–Jacobi Equations	69
4.1	Convex Hamilton–Jacobi and Variational Formulas	70
4.2	Subadditive Ergodic Theorem and Homogenization	73
4.3	Unbounded Hamiltonians: Breakdown of Homogenization	78
4.4	Normal and Accelerated Fronts in Random Flows	83
4.5	Central Limit Theorems and Front Fluctuations	86

4.6	Exercises	90
5	KPP Fronts in Random Media	93
5.1	KPP Fronts in Spatially Random Shear Flows	93
5.2	KPP Fronts in Temporally Random Shear Flows	108
5.3	KPP Fronts in Spatially Random Compressible Flows	117
5.4	KPP Fronts in Space–Time Random Incompressible Flows	123
5.5	Stochastic Homogenization of Viscous HJ Equations	132
5.6	Generalized Fronts, Reactive Systems, and Geometric Models	136
5.7	Exercises	144
	References	145
	Index	157
