

Contents

1	Superconductors – Introduction	1
1.1	Basic Properties of a Superconductor	1
1.1.1	Zero Resistance	1
1.1.2	Meissner Effect	1
1.1.3	Ring Supercurrent and Flux Quantization	3
1.1.4	Josephson Effects	4
1.1.5	Energy Gap	6
1.1.6	Sharp Phase Change	6
1.2	Occurrence of a Superconductor	7
1.2.1	Elemental Superconductors	7
1.2.2	Compound Superconductors	8
1.2.3	High- T_c Superconductors	9
1.3	Theoretical Survey	9
1.3.1	The Cause of Superconductivity	10
1.3.2	The Bardeen–Cooper–Schrieffer Theory	10
1.3.3	Quantum Statistical Theory	12
	References	13
2	Electron–Phonon Interaction	15
2.1	Phonons and Lattice Dynamics	15
2.2	Electron–Phonon Interaction	19
2.3	Phonon–Exchange Attraction	23
	References	27
3	The BCS Ground State	29
3.1	Introduction	29
3.2	The Reduced Hamiltonian	30
3.3	The BCS Ground State	32
3.4	Discussion	39
3.4.1	The Nature of the Reduced Hamiltonian	39
3.4.2	Binding Energy per Pairon	39
3.4.3	Critical Field B_c and Binding Energy $ w_0 $	39

3.4.4	The Energy Gap	40
3.4.5	The Energy Gap Equations	40
3.4.6	Neutral Supercondensate	41
3.4.7	Cooper Pairs (Pairons)	41
3.4.8	Formation of a Supercondensate and Occurrence of Superconductors	42
3.4.9	Blurred Fermi Surface	43
References		43
4	The Energy Gap Equations	45
4.1	Introduction	45
4.2	Energy-Eigenvalue Problem in Second Quantization	46
4.3	Energies of Quasi-Electrons at 0 K	49
4.4	Derivation of the Cooper Equation	51
4.5	Energy Gap Equations at 0 K	54
4.6	Temperature-Dependent Gap Equations	56
4.7	Discussion	59
4.7.1	Ground State	59
4.7.2	Supercondensate Density	59
4.7.3	Energy Gap $\Delta(T)$	59
4.7.4	Energy Gap Equations at 0 K	60
4.7.5	Energy Gap Equations Below T_c	60
References		60
5	Quantum Statistics of Composites	61
5.1	Ehrenfest–Oppenheimer–Bethe’s Rule	61
5.2	Two-Particle Composites	62
5.3	Discussion	68
References		71
6	Quantum Statistical Theory	73
6.1	The Full Hamiltonian	73
6.2	The Cooper Pair Problem	75
6.3	Moving Pairons	77
6.4	The Bose–Einstein Condensation	79
6.5	The BEC in 3D, $\epsilon = cp$	84
6.6	Discussion	86
References		88
7	Quantum Tunneling	89
7.1	Introduction	89
7.2	Quantum Tunneling in S–I–S Systems	90
7.3	Quantum Tunneling in S_1 –I– S_2	97
7.4	Discussion	101
References		101

8	Compound Superconductors	103
8.1	Introduction	103
8.2	Type II Superconductors	103
8.3	Optical Phonons	108
8.4	Discussion	111
	References	111
9	Supercurrents and Flux Quantization	113
9.1	Ring Supercurrent	113
9.2	Phase of the Quasi-Wavefunction	116
9.3	London's Equation: Penetration Depth	119
9.4	Quasi-Wavefunction and Its Evolution	123
9.5	Discussion	126
9.5.1	Supercurrents	126
9.5.2	Supercurrent is Not Hindered by Impurities	126
9.5.3	The Supercurrent Cannot Gain Energy from a DC Voltage	126
9.5.4	Critical Fields and Critical Currents	127
9.5.5	Supercurrent Ring and Flux Quantization	127
9.5.6	Meissner Effect and Surface Supercurrent	127
9.5.7	London's Equation	128
9.5.8	Penetration Depth	128
	References	129
10	Ginzburg–Landau Theory	131
10.1	Introduction	131
10.2	Derivation of the GL Equation	133
10.3	Discussion	135
10.4	Penetration Depth	138
	References	140
11	Josephson Effects	143
11.1	Josephson Tunneling and Interference	143
11.2	Equations Governing a Josephson Current	147
11.3	AC Josephson Effect and Shapiro Steps	150
11.4	Discussion	153
11.4.1	Josephson Tunneling	153
11.4.2	Interference and Analogy with Laser	153
11.4.3	GL Wavefunction, Quasi-Wavefunction, and Pairon Density Operator	153
11.4.4	Josephson–Feynman Equations	154
11.4.5	AC Josephson Effect and Shapiro Steps	154
11.4.6	Independent Pairon Picture	155
	References	155

12	High Temperature Superconductors	157
12.1	Introduction	157
12.2	Layered Structures and 2-D Conduction	157
12.3	The Hamiltonian	160
12.4	The Ground State	163
12.5	High Critical Temperature	166
12.6	The Heat Capacity	168
12.7	Two Energy Gaps: Quantum Tunneling	168
12.7.1	Asymmetric I–V Curves for S–I–N	169
12.7.2	Scattered Data for Energy Gaps	170
12.7.3	Complicated I–V Curves	170
	References	170
13	Doping Dependence of T_c	173
13.1	Introduction	173
13.2	Theory	173
13.3	Discussion	177
	References	179
14	The Susceptibility in Cuprates	181
14.1	Introduction	181
14.2	Theory	184
14.3	Discussion	189
