

Preface

This is the fourth volume in the *Reviews in Fluorescence* series. To date, three volumes have been both published and well received by the scientific community. Several book reviews in the last few years have also favorably remarked on the series.

In this fourth volume we continue the tradition of publishing leading edge and timely articles from authors around the world. We thank the authors for their timely and exciting contributions. We hope you find this volume as useful as past volumes, which promises to be just as diverse with regard to fluorescence-based content.

Finally, in closing, I would like to thank to Aaron Johnson, formerly at Springer, for helping me to publish this book serial over the last four volumes. Thanks also go to Michael Weston at Springer for help in publishing this current volume.
