Part I Anatomy and Physiology

1 Introduction to Child Clinical Neuropsychology	3
The Contribution of Neuroscience	3
Professional Training Standards	4
Multicultural Issues in Neuropsychology	5
Professional Training Issues and Ethics	6
Important Laws for Delivery of Neuropsychological Services	8
IDEA	8
Section 504	9
Health Insurance Portability and Accountability Act (HIPAA)	9
Emergence of Child Clinical Neuropsychology	11
A Transactional Approach	11
Perspectives for the Study of Childhood Disorders	12
Neuropsychological Paradigm	12
Behavioral Paradigm	13
Psychosocial and Cognitive Paradigms	13
Transactional Paradigm	15
Neuropsychological Perspectives on Assessment and Intervention	17
Neurodevelopmental Framework for Child Neuropsychology	18
Rationale for an Integrated Neuropsychological Model	18
Overview of Book Chapters	19
References	20
2 Functional Neuroanatomy	25
Structure and Function of the Neuron	26
Anatomy of the Neuron	26
Types of Neurons	28
Types of Neuroglia	29
Spinal Cord	29
Structure and Function of the Brain	30
Role and Function of the Meninges	30
Ventricles	31
Structure and Function of the Brain Stem	32

Medulla Oblongata	33
Pons	33
Midbrain	34
Diencephalon	34
Cerebellum	34
Structure and Function of the Forebrain	35
Neocortex	35
Cerebral Hemispheres	35
Interhemispheric Connections	37
Intrahemispheric Connections	37
Structure and Function of the Cortex	38
Frontal Lobes	39
Parietal Lobes	40
Occipital Lobes	41
Temporal Lobes	42
Olfactory Bulb	42
Limbic System	43
Summary	43
References	44
3 Development in the CNS	47
Prenatal Course	47
Proliferation and Cell Migration	47
Axon and Synaptic Formations	48
Postnatal Course	49
Gestation	49
The Development of Higher Cognitive Abilities	50
Frontal Lobe Maturation	50
Expressive Speech Functions	52
Executive Functions	53
Emotional Functions	54
Parietal Lobe Maturation	54
Occipital Lobe Maturation	55
Temporal Lobe Maturation	55
How Genetic Factors Influence Development	55
Biological and Environmental Factors	58
Prenatal Risk Factors	58
Maternal Stress, Nutrition, and Health Factors	58
Maternal Health	59
Postnatal Risk Factors	60
Summary	61
References	62
4 Electrophysiological and Neuroimaging Techniques in Neuropsychology	65
Electrophysiological Techniques	65
Electroencephalography	66
Evoked Potentials	66
Conclusions	71
Neuroimaging Techniques	71

Computed Tomography	71
Magnetic Resonance Imaging	72
Research with MRI	73
Dyslexia	74
Functional Neuroimaging	74
ADHD	75
Structural MRI	75
Functional MRI	77
Autism	77
Neuroradiological Techniques	79
PET and SPECT Scans	79
Conclusions	80
References	81

Part II Clinical Assessment

5 Integrating Neurological, Neuroradiological, and Psychological Examinations in Neuropsychological Assessment	89
The Neurological Examination	89
When to Refer for a Neurological Evaluation	90
Neuroradiological Evaluation	92
When to Refer for Neuroradiological Evaluation	92
Neuropsychological Assessment	92
When to Refer for Neuropsychological Evaluation	92
The Integration of Neurological, Neuroradiological, and Neuropsychological Data	93
Psychological Assessment of Children with Neurodevelopmental, Neuropsychiatric, and Other CNS Disorders	94
Impact of Psychological Functioning on Neuropsychological Results	94
Conclusion	95
Hospital: Developmental/Behavioral Program	96
Reason for Referral	96
Background Information	96
Behavioral Observations	96
Tests Administered	97
Test Interpretations	97
Summary and Recommendations	99
Strategies for Improved Memory Skills	100
Psychometric Summary	101
Differential Abilities Scale-2	101
References	103
6 Neuropsychological Domains of Functioning	105
Cognitive Ability	105
Woodcock-Johnson Tests of Cognitive Ability-III	105
Wechsler Intelligence Scale for Children-IV	105
Differential Ability Scal-2 (DAS-2)	106
Kaufman Assessment Battery for Children (KABC II)	106
Academic Functioning	107
Woodcock-Johnson Tests of Achievement-III	107

Wechsler Individual Achievement Test-II (WIAT-II)	108
Executive Functioning	108
Attention	117
Memory	118
Language	120
Motor Abilities	121
Visual-Spatial and Visual-Motor	121
Psychosocial Functioning	122
Child Behavior Checklist (CBL)	122
Behavior Assessment System for Children	122
Conclusion	123
References	123
7 The Neuropsychological Assessment Process	127
The Intake Interview	127
Insert Developmental History Form About Here	128
Preparing the Child for the Assessment	128
The Evaluation	128
Feedback Session	129
Neuropsychological Reports	132
Reason for Referral	132
Background and Developmental History	132
Behavior Observations	133
Tests Administered and Results	133
Summary and Recommendations	133
Neuropsychological Report Example	134
Test Interpretations	135
Strategies for Improved Memory Skills	137
Techniques to Help Students with Attentional Problems in the Classroom	138
Physical Arrangement of Room	138
Lesson Presentation	138
Worksheets and Tests	138
Behavior	138
Psychometric Summary	139
References	149
8 Neuropsychological Assessment Approaches and Diagnostic Procedures	151
Approaches to Child Clinical Neuropsychological Assessment	151
Halstead-Reitan-Indiana Assessment Procedures	151
Conceptual Model for the Halstead-Reitan Methods	151
Halstead-Reitan Neuropsychological Batteries for Children	151
Multiple Levels of Inference	152
Neuropsychological Deficit Scale Approach	157
Normative Analysis of the Halstead-Reitan Neuropsychological Tests	158
Biobehavioral Approach	158
Pragmatic Approach	158
Research Findings with CHRN and HINB	158
Luria Theory of Neuropsychological Assessment for Children	159

Luria's Conceptual Model	160
Functional Unit I	160
Functional Unit II	160
Functional Unit III	163
Developmental Considerations	164
NEPSY: A Developmental Neuropsychological Assessment	166
Attention and Executive Functioning	166
Language	166
Memory and Learning	166
Sensorimotor	166
Social Perception	166
Visuospatial	166
Research Findings with NEPSY	166
CAS: Cognitive Assessment System	167
Planning	167
Attention	167
Simultaneous	167
Successive	167
Research Findings with CAS	167
Neuropsychological Protocol: Austin Neurological Clinic	168
Boston Process Approach	168
Tests of Reasoning	170
Tests of Verbal Language and Memory	170
Neurosensory Center Comprehensive Examination for Aphasia	171
Tests of Perception	172
Test of Facial Recognition	172
Cancellation Tasks	172
Summary and Conclusions	172
Delis-Kaplan Executive Function System (D-KEFS)	173

Part III Childhood and Adolescent Disorders

9 Neuropsychological Correlates of Childhood and Adolescent Psychiatric Disorders: Disruptive Behavior Disorders	181
Biochemical and Neuropsychological Models of Psychiatric Disorders of Childhood	181
Medication Effects on Neurotransmitters	181
Tourette Syndrome	184
Genetic Correlates and Brain Mechanisms of TS	184
Implications for Assessment	185
Implications for Interventions	185
Pharmacological Interventions	185
Psychosocial and Behavioral Interventions	185
Attention-Deficit Hyperactivity Disorder	186
Comorbidity: ADHD with Other Childhood Disorders	187
Neurological Study of ADHD	188
Primary Symptoms	189

Self-Regulation Theory of ADHD	191
Transactional Model of ADHD	192
Genetic Factors	192
Family Factors	194
Psychosocial Factors	194
Intellectual, Perceptual, Attention, and Memory Functioning.	195
Academic and School Adjustment	195
Implications for Assessment	195
Implications for Treatment	198
Conduct Disorder	199
Incidence	199
Gender	199
Developmental Course	199
Comorbid Disorders	200
Genetic Influences	200
Family Influences	201
Physiological Signs	201
Neuropsychological Correlates	202
Intellectual/Academic	202
Implications for Assessment	203
Implications for Intervention	203
Conclusion	204
Reason for Evaluation	205
Background Information	205
Assessment Procedures	206
Adaptive Functioning	206
School Functioning	207
Behavioral Observation	207
Assessment Results and Interpretation	208
Language	208
Intellectual	208
Learning and Working Memory	208
Executive/Neuropsychological Skills	209
Attention	209

Part IV An Integration Intervention Paradigm

16 Neuropsychological Intervention and Treatment Approaches for Childhood and Adolescent Disorders	413
Multistage Neuropsychological Model: Linking Assessment to Intervention.	413
Stage 1: Problem Identification.	415
Stage 2: Behavioral-Based Intervention Plan	415
Stage 3: Cognitive Child Study	415
Stage 4: Cognitive-Based Intervention Plan	415
Stage 5: Neuropsychological Evaluation	416
Stage 6: Integrated Neuropsychological Intervention Plan	416
Stage 7: Neurological and/or Neuroradiological Evaluation	416
Stage 8: Medical-Neurological Rehabilitation	416
Neuropsychological Framework for Remediation	417
Specific Strategies for Improving Cognitive, Academic, Social-Emotional, and Executive Control Deficits	417
Neurocognitive Deficits.	417
Interventions to Improve Attention Difficulties	417
Interventions to Improve Working Memory and Learning Deficits	419
Interventions to Improve Speech and Language Deficits	420
Interventions to Improve Self Regulation and Self-control Deficits	422
Treating Academic Deficits.	422
Reading Disorders.	422
Written Language Disorders.	424
Mathematic Disorders.	425
Interventions for Executive Control Deficits	426
Study and Organizational Skills	427
Social Skills Training	427
Classroom and Behavior Management.	429
Home-Based Contingencies	429
Peer Tutoring	429
Summary	430
References	430

17 Pediatric Psychopharmacological and Combined Interventions	435
