Preface	ix
Contributors	xi

PART I Dynamic-Differential Games: Theoretical Developments

On Differential Games with Long-Time-Average Cost	3
<i>Martino Bardi</i>	
Fields of Extremals and Sufficient Conditions for a Class of Variational Games	19
<i>Dean Carlson</i>	
Linear Quadratic Differential Games: An Overview	37
<i>Jacob Engwerda</i>	
A Neumann Boundary Control for Multidimensional Parabolic “Minmax” Control Problems	71
<i>Andrzej Nowakowski</i>	
Non-Cooperative and Semi-Cooperative Differential Games	85
<i>Wen Shen</i>	

PART II Pursuit-Evasion (P-E) Games

Some Geometrical Properties of the Phase Space Structure in Games on Manifolds	107
<i>Andrei Akhmetzhanov</i>	
Strategies for Alternative Pursuit Games	121
<i>Igor Shevchenko</i>	
Some Sufficient Conditions for Multi-Player Pursuit-Evasion Games with Continuous and Discrete Observations	133
<i>Dušan M. Stipanović, Arik Melikyan and Naira Hovakimyan</i>	

PART III Numerical Approaches to Dynamic-Differential Games

A Numerical Approach to the ‘Princess and Monster’ Game on an Interval	149
<i>Steve Alpern, Robbert Fokkink, Roy Lindelauf and Geert Jan Olsder</i>	

Numerical Approximation and Optimal Strategies for Differential Games with Lack of Information on One Side	159
<i>Pierre Cardaliaguet</i>	

Fully-Discrete Schemes for the Value Function of Pursuit-Evasion Games with State Constraints	177
<i>Emiliano Cristiani and Maurizio Falcone</i>	

Numerical Solution of the Game of Two Cars with a Neurosimulator and Grid Computing	207
<i>Hans-Jörg von Mettenheim and Michael H. Breitner</i>	

Numerical Investigation of the Value Function for the Homicidal Chauffeur Problem with a More Agile Pursuer	231
<i>Valerii S. Patsko and Varvara L. Turova</i>	

PART IV Applications

Credible Linear-Incentive Equilibrium Strategies in Linear-Quadratic Differential Games	261
<i>Guiomar Martín-Herrán and Georges Zaccour</i>	

Robust Control Approach to Digital Option Pricing: Synthesis Approach	293
<i>Stéphane Thiery, Pierre Bernhard and Geert Jan Olsder</i>	

PART V Search Games

A Search Game with a Strategy of Energy Supply for Target	313
<i>Ryusuke Hohzaki and Keiko Ikeda</i>	

The LQG Game Against Nature	339
<i>Meir Pachter</i>	

PART VI Evolutionary Games

Is Deterrence Evolutionarily Stable?.....	357
<i>David Ellison and Michel Rudnianski</i>	

Evolutionarily Robust Strategies: Two Nontrivial Examples and a Theorem	377
<i>A. J. Shaiju and Pierre Bernhard</i>	

PART VII Stopping Games

Nash Equilibrium in a Game Version of the Elfving Problem.....	399
<i>Elżbieta Z. Ferencstein and Anna Krasnosielska</i>	

Cooperative Strategies in Stopping Games	415
<i>David Ramsey and Diana Cierpiat</i>	

PART VIII Stochastic Games and Large “Neighborhood” Games

Pure Equilibrium Strategies for Stochastic Games via Potential Functions.....	433
<i>Jos A.M. Potters, T.E.S. Raghavan and Stef H. Tijs</i>	

Fibonacci Numbers and Equilibria in Large “Neighborhood” Games.....	445
<i>Andrzej Wieczorek</i>	

Advances in Dynamic Games and Their Applications

Analytical and Numerical Developments

Bernhard, P.; Gaitsgory, V.; Pourtallier, O. (Eds.)

2009, XIV, 462 p. 94 illus., 9 illus. in color., Hardcover

ISBN: 978-0-8176-4833-6
