| Preface | v |
| 1 Analytical Background and Optimality Theory | 1 |
| Stefan Ulbrich | 1 |
| 1.1 Introduction and Examples | 1 |
| 1.1.1 Introduction | 1 |
| 1.1.2 Examples for Optimization Problems with PDEs | 4 |
| 1.1.3 Optimization of a Stationary Heating Process | 5 |
| 1.1.4 Optimization of an Unsteady Heating Processes | 7 |
| 1.1.5 Optimal Design | 8 |
| 1.2 Linear Functional Analysis and Sobolev Spaces | 9 |
| 1.2.1 Banach and Hilbert Spaces | 10 |
| 1.2.2 Sobolev Spaces | 13 |
| 1.2.3 Weak Convergence | 24 |
| 1.3 Weak Solutions of Elliptic and Parabolic PDEs | 26 |
| 1.3.1 Weak Solutions of Elliptic PDEs | 26 |
| 1.3.2 Weak Solutions of Parabolic PDEs | 36 |
| 1.4 Gâteaux- and Fréchet Differentiability | 50 |
| 1.4.1 Basic Definitions | 50 |
| 1.4.2 Implicit Function Theorem | 52 |
| 1.5 Existence of Optimal Controls | 52 |
| 1.5.1 Existence Result for a General Linear-Quadratic Problem | 52 |
| 1.5.2 Existence Results for Nonlinear Problems | 54 |
| 1.5.3 Applications | 56 |
| 1.6 Reduced Problem, Sensitivities and Adjoint | 57 |
| 1.6.1 Sensitivity Approach | 58 |
| 1.6.2 Adjoint Approach | 59 |
| 1.6.3 Application to a Linear-Quadratic Optimal Control Problem | 60 |
| 1.6.4 A Lagrangian-Based View of the Adjoint Approach | 63 |

| | | |
|----------|--|-----------|
| 1.6.5 | Second Derivatives | 64 |
| 1.7 | Optimality Conditions | 65 |
| 1.7.1 | Optimality Conditions for Simply Constrained Problems . . | 65 |
| 1.7.2 | Optimality Conditions for Control-Constrained Problems | 70 |
| 1.7.3 | Optimality Conditions for Problems with General Constraints | 80 |
| 1.8 | Optimal Control of Instationary Incompressible Navier-Stokes Flow | 88 |
| 1.8.1 | Functional Analytic Setting | 89 |
| 1.8.2 | Analysis of the Flow Control Problem | 91 |
| 1.8.3 | Reduced Optimal Control Problem | 94 |
| 2 | Optimization Methods in Banach Spaces | 97 |
| | Michael Ulbrich | 97 |
| 2.1 | Synopsis | 97 |
| 2.2 | Globally Convergent Methods in Banach Spaces | 99 |
| 2.2.1 | Unconstrained Optimization | 99 |
| 2.2.2 | Optimization on Closed Convex Sets | 104 |
| 2.2.3 | General Optimization Problems | 109 |
| 2.3 | Newton-Based Methods—A Preview | 109 |
| 2.3.1 | Unconstrained Problems—Newton’s Method | 109 |
| 2.3.2 | Simple Constraints | 110 |
| 2.3.3 | General Inequality Constraints | 113 |
| 2.4 | Generalized Newton Methods | 115 |
| 2.4.1 | Motivation: Application to Optimal Control | 115 |
| 2.4.2 | A General Superlinear Convergence Result | 116 |
| 2.4.3 | The Classical Newton’s Method | 119 |
| 2.4.4 | Generalized Differential and Semismoothness | 120 |
| 2.4.5 | Semismooth Newton Methods | 123 |
| 2.5 | Semismooth Newton Methods in Function Spaces | 125 |
| 2.5.1 | Pointwise Bound Constraints in L^2 | 125 |
| 2.5.2 | Semismoothness of Superposition Operators | 126 |
| 2.5.3 | Pointwise Bound Constraints in L^2 Revisited | 129 |
| 2.5.4 | Application to Optimal Control | 130 |
| 2.5.5 | General Optimization Problems with Inequality Constraints in L^2 | 132 |
| 2.5.6 | Application to Elliptic Optimal Control Problems | 133 |
| 2.5.7 | Optimal Control of the Incompressible Navier-Stokes Equations | 137 |
| 2.6 | Sequential Quadratic Programming | 140 |
| 2.6.1 | Lagrange-Newton Methods for Equality Constrained Problems | 140 |
| 2.6.2 | The Josephy-Newton Method | 144 |
| 2.6.3 | SQP Methods for Inequality Constrained Problems | 148 |

| | | |
|----------|---|------------|
| 2.7 | State-Constrained Problems | 151 |
| 2.7.1 | SQP Methods | 152 |
| 2.7.2 | Semismooth Newton Methods | 152 |
| 2.8 | Further Aspects | 155 |
| 2.8.1 | Mesh Independence | 155 |
| 2.8.2 | Application of Fast Solvers | 156 |
| 2.8.3 | Other Methods | 156 |
| 3 | Discrete Concepts in PDE Constrained Optimization | 157 |
| | Michael Hinze | 157 |
| 3.1 | Introduction | 157 |
| 3.2 | Control Constraints | 158 |
| 3.2.1 | Stationary Model Problem | 158 |
| 3.2.2 | First Discretize, Then Optimize | 160 |
| 3.2.3 | First Optimize, Then Discretize | 161 |
| 3.2.4 | Discussion and Implications | 163 |
| 3.2.5 | The Variational Discretization Concept | 164 |
| 3.2.6 | Error Estimates | 167 |
| 3.2.7 | Boundary Control | 177 |
| 3.2.8 | Some Literature Related to Control Constraints | 196 |
| 3.3 | Constraints on the State | 197 |
| 3.3.1 | Pointwise Bounds on the State | 198 |
| 3.3.2 | Pointwise Bounds on the Gradient of the State | 219 |
| 3.4 | Time Dependent Problem | 227 |
| 3.4.1 | Mathematical Model, State Equation | 227 |
| 3.4.2 | Optimization Problem | 229 |
| 3.4.3 | Discretization | 229 |
| 3.4.4 | Further Literature on Control of Time-Dependent Problems | 231 |
| 4 | Applications | 233 |
| | René Pinnau | 233 |
| 4.1 | Optimal Semiconductor Design | 233 |
| 4.1.1 | Semiconductor Device Physics | 234 |
| 4.1.2 | The Optimization Problem | 240 |
| 4.1.3 | Numerical Results | 246 |
| 4.2 | Optimal Control of Glass Cooling | 250 |
| 4.2.1 | Modeling | 251 |
| 4.2.2 | Optimal Boundary Control | 254 |
| 4.2.3 | Numerical Results | 260 |
| | References | 265 |

Optimization with PDE Constraints

Hinze, M.; Pinnau, R.; Ulbrich, M.; Ulbrich, S.

2009, XII, 270 p., Hardcover

ISBN: 978-1-4020-8838-4
