

# Contents

<b>Introduction</b> .....	xiii
<b>1 Fabrication of TiO<sub>2</sub> Nanotube Arrays by Electrochemical Anodization: Four Synthesis Generations</b> .....	1
1.1 Introduction .....	1
1.1.1 The Electrochemical Anodization Process .....	2
1.2 Nanotube Array Synthesis Using Aqueous Electrolytes: The First Generation .....	3
1.2.1 HF-Based Electrolytes .....	3
1.2.2 Tapered Conical Shape Nanotubes .....	5
1.2.3 Wall Thickness Variation .....	6
1.2.4 Using HNO <sub>3</sub> /HF .....	7
1.2.5 Using H <sub>2</sub> SO <sub>4</sub> /HF .....	8
1.2.6 Using H <sub>2</sub> Cr <sub>2</sub> O <sub>7</sub> /HF .....	8
1.2.7 Using CH <sub>3</sub> COOH/NH <sub>4</sub> F, H <sub>2</sub> SO <sub>4</sub> /NH <sub>4</sub> F .....	9
1.2.8 Using H <sub>3</sub> PO <sub>4</sub> /HF, H <sub>3</sub> PO <sub>4</sub> /NH <sub>4</sub> F .....	10
1.3 Nanotube Array Synthesis Using Buffered Electrolytes: The Second Generation .....	12
1.3.1 Step-by-Step Procedure: Solution Preparation, Mixing and pH Adjustment .....	15
1.3.2 Solution Set Preparation .....	15
1.3.3 Anodization with Constant Current Density .....	16
1.4 Synthesis of Nanotube Arrays Using Polar Organic Electrolytes: The Third Generation .....	18
1.4.1 Using Formamide and Dimethyl formamide electrolyte .....	18
1.4.2 Dimethyl Sulfoxide Electrolytes .....	22
1.4.3 Ethylene Glycol Electrolytes .....	26
1.4.4 Diethylene Glycol Electrolytes .....	34
1.4.5 Using Glycerol and NH <sub>4</sub> F .....	37
1.4.6 Methanol, Water, and HF .....	38
1.5 Nanotube Array Synthesis Using Non-Fluoride Based Electrolytes: The Fourth Generation .....	38

1.5.1 Using HCl .....	40
1.5.2 H <sub>2</sub> O <sub>2</sub> Aqueous Electrolytes .....	40
1.5.3 HCl/H <sub>2</sub> O <sub>2</sub> Aqueous Electrolytes .....	42
1.6 Fabrication of Transparent TiO <sub>2</sub> Nanotubes Arrays .....	44
1.7 Mechanistic Model of Nanotube Array Formation by Potentiostatic Anodization .....	48
References .....	59
<b>2 Material Properties of TiO<sub>2</sub> Nanotube Arrays: Structural, Elemental, Mechanical, Optical, and Electrical .....</b>	<b>67</b>
2.1 Introduction .....	67
2.2 Structural and Elemental Characterization .....	67
2.2.1 Anodic Formation of Crystalline Metal Oxide Nanotubes .....	73
2.2.2 Improved Crystallization via Solvothermal Treatment .....	76
2.2.3 Partially Crystalline Anatase Phase Nanotubes by Anodization .....	78
2.3 Characterization of Doped Titania Nanotubes .....	79
2.3.1 Carbon Incorporation Within the Nanotubes .....	79
2.3.2 Nitrogen Incorporation Within the Nanotubes .....	80
2.3.3 Boron-Doped Nanotubes .....	82
2.3.4 Organic Bath .....	82
2.3.5 CdS-Coated Nanotubes .....	83
2.4 Optical Properties of Titania Nanotubes Arrays .....	83
2.4.1 Finite Difference Time Domain Simulation of Light Propagation in Nanotube Arrays .....	83
2.4.2 Measured Optical Properties .....	88
2.4.3 Ellipsometric Measurements .....	92
2.4.4 Raman Spectra Measurements .....	96
2.5 Electrical Property Measurements .....	97
2.5.1 Photocurrent Transient Measurements .....	97
2.5.2 Capacitance Measurements .....	98
2.6 Mechanical Properties .....	105
References .....	106
<b>3 TiO<sub>2</sub> Nanotube Arrays: Application to Hydrogen Sensing .....</b>	<b>115</b>
3.1 Introduction .....	115
3.2 High Temperature Sensors using TiO <sub>2</sub> Nanotube Arrays .....	117
3.3 Self-Cleaning Room-Temperature Hydrogen Sensors .....	121
3.4 Room-Temperature Hydrogen Sensors of Enhanced Sensitivity .....	126
3.4.1 TiO <sub>2</sub> Nanotube Arrays on Ti Foil .....	126
3.4.2 Transparent Hydrogen Sensors .....	131
3.5 Extreme Hydrogen Gas Sensitivities at Room Temperature .....	132
3.6 Transcutaneous Hydrogen Monitoring using TiO <sub>2</sub> Nanotube Arrays .....	136
3.6.1 Cross Interference and Calibration .....	137

3.6.2 Transcutaneous Hydrogen and Lactose Intolerance .....	141
References .....	142
<b>4 TiO<sub>2</sub> Nanotube Arrays: Application to Photoelectrochemical</b>	
<b>Water Splitting</b> .....	149
4.1 Introduction .....	149
4.2 Photoelectrolysis Cell .....	150
4.2.1 Water Splitting Efficiency .....	153
4.2.2 Quantum Efficiency Calculation .....	157
4.3 Photoelectrolysis Using Unmodified TiO <sub>2</sub> Nanotubes .....	158
4.3.1 Short Nanotubes .....	159
4.3.2 Medium Length Nanotubes .....	161
4.3.3 Long Nanotubes .....	164
4.3.4 Roughness Factor .....	166
4.3.5 Effect of Electrolyte Additives .....	168
4.4 Photoelectrolysis Using Anionic and Cationic Doped	
TiO <sub>2</sub> Nanotubes .....	170
4.4.1 N-Doped TiO <sub>2</sub> Nanotubes .....	170
4.4.2 Carbon Doped TiO <sub>2</sub> Nanotubes .....	174
4.4.3 Sulfur-Doped TiO <sub>2</sub> Nanotubes .....	175
4.4.4 Boron-Doped TiO <sub>2</sub> Nanotubes .....	176
4.4.5 Silicon-Doped TiO <sub>2</sub> Nanotubes .....	177
4.5 Photoelectrolysis Using Surface-Sensitized TiO <sub>2</sub> Nanotubes .....	178
4.5.1 CdS Sensitized TiO <sub>2</sub> Nanotubes .....	178
4.5.2 CdSe Sensitized TiO <sub>2</sub> Nanotubes .....	180
4.5.3 CdTe Sensitized TiO <sub>2</sub> Nanotube Arrays [137] .....	180
4.5.4 WO <sub>3</sub> Coated TiO <sub>2</sub> Nanotubes .....	183
4.5.5 Pt Sensitized TiO <sub>2</sub> Nanotubes .....	184
4.6 Other Approaches .....	185
4.6.1 Polyoxophosphotungstate Encapsulated in	
TiO <sub>2</sub> Nanotubes .....	185
4.6.2 Light Sensitized Enzymatic System	
with TiO <sub>2</sub> Nanotubes .....	186
4.7 Self-Biased Photoelectrochemical Diodes Using Cu-Ti-O Ternary	
Oxide Nanotubes .....	188
4.7.1 Fabrication of <i>p</i> -Type Copper Rich Cu-Ti-O Nanotubes .....	189
4.7.2 Photoelectrochemical Properties .....	192
4.7.3 Self-Biased Heterojunction Photoelectrochemical Diodes .....	193
4.8 Visible light responsive Ti-Fe-O ternary oxide nanotubes .....	195
4.8.1 Benefits of nanostructuring hematite .....	195
4.8.2 Self-Aligned Nanoporous Iron (III) Oxide .....	196
4.8.3 Photoelectrochemical Properties of Self-Aligned	
Nanoporous Iron (III) Oxide .....	198
4.8.4 Fabrication and Structural Characterization of	
Ti-Fe-O Nanotubes .....	198

4.8.5 Photoelectrochemical Properties of Ti–Fe–O Nanotubes .....	203
4.9 Compositionally Graded Ternary Oxide Nanotube Arrays .....	205
References .....	206
<b>5 Dye-Sensitized and Bulk-Heterojunctions Solar Cells:</b>	
<b>TiO<sub>2</sub> Nanotube Arrays as a Base Material</b> .....	217
5.1 Introduction .....	217
5.2 Dye Sensitized Solar Cells: Operating Principles .....	218
5.2.1 Key DSC Processes .....	219
5.2.2 Factors Influencing Conversion Efficiencies .....	220
5.2.3 Nanocrystalline DSCs .....	223
5.3 Solar Cell Parameters .....	225
5.4 <i>J–V</i> Characterization Under Standard Conditions .....	226
5.4.1 Calibrating the Solar Simulator for DSC and Polymeric Solar Cells .....	226
5.4.2 Experimental Setup .....	227
5.5 Benefits of Vertically Oriented Uniformly Aligned TiO <sub>2</sub> Nanotube Arrays in DSCs .....	228
5.5.1 Finite Difference Time Domain Application to DSCs .....	229
5.6 Liquid Junction DSCs .....	234
5.6.1 Transparent TiO <sub>2</sub> Nanotube Arrays on FTO Coated Glass: Front Side Illumination .....	239
5.6.2 TiO <sub>2</sub> Nanotube Arrays on Ti Foil: Back Side Illumination .....	245
5.6.3 Charge Collection Properties .....	252
5.6.4 Electron Transport and Recombination Properties .....	253
5.7 Polymer Based Bulk Heterojunction Solar Cells .....	258
5.7.1 TiO <sub>2</sub> Nanotubes on FTO Glass: Polymeric Bulk Heterojunction Solar Cells .....	262
5.7.2 Solar Cell Fabrication and Performance .....	266
5.7.3 TiO <sub>2</sub> -Polymer Based Solar Cells: Back Side Illumination Geometry .....	270
References .....	274
<b>6 Use of TiO<sub>2</sub> Nanotube Arrays for Biological Applications</b> .....	285
6.1 Introduction .....	285
6.2 Biosensors .....	286
6.2.1 H <sub>2</sub> O <sub>2</sub> Detection: Nanotubes Co-immobilized with HRP and Thionine .....	286
6.2.2 Co-Immobilized with Cytochrome c .....	288
6.2.3 Detection of H <sub>2</sub> O <sub>2</sub> and Glucose .....	288
6.3 Enhanced Blood Clotting .....	290
6.4 Cell Adhesion and Osteoblast Growth .....	292
6.5 Drug Elution from TiO <sub>2</sub> Nanotubes .....	296
6.6 Hydrophobic Nanotubes: SAMs on Surface on Hydrophilic Nanotubes .....	301

6.7 Biological Fluids Filtration and Drug Delivery Using TiO <sub>2</sub> Nanotubular Membrane .....	302
6.8 Application of Photocatalytic TiO <sub>2</sub> Nanotube Properties .....	308
References .....	309
<b>7 Conclusions and New Directions .....</b>	<b>315</b>
7.1 Conclusions .....	315
7.2 Some Future Directions .....	320
7.2.1 Intercalation and Supercapacitors .....	320
7.2.2 CO <sub>2</sub> Reduction Using Visible Light .....	329
References .....	340
