

# Contents

<b>Introduction</b> .....	1
<b>1 Notable elements</b> .....	5
Introduction .....	5
1 Monoids and monoid homomorphisms .....	5
2 Multiplicity and embedding dimension .....	6
3 Frobenius number and genus .....	9
4 Pseudo-Frobenius numbers .....	13
Exercises .....	16
<b>2 Numerical semigroups with maximal embedding dimension</b> .....	19
Introduction .....	19
1 Characterizations .....	20
2 Arf numerical semigroups .....	23
3 Saturated numerical semigroups .....	28
Exercises .....	31
<b>3 Irreducible numerical semigroups</b> .....	33
Introduction .....	33
1 Symmetric and pseudo-symmetric numerical semigroups .....	33
2 Irreducible numerical semigroups with arbitrary multiplicity and embedding dimension .....	38
3 Unitary extensions of a numerical semigroup .....	44
4 Decomposition of a numerical semigroup into irreducibles .....	47
5 Fundamental gaps of a numerical semigroup .....	51
Exercises .....	53
<b>4 Proportionally modular numerical semigroups</b> .....	57
Introduction .....	57
1 Periodic subadditive functions .....	57

2	The numerical semigroup associated to an interval of rational numbers . . . . .	59
3	Bézout sequences . . . . .	61
4	Minimal generators of a proportionally modular numerical semigroup . . . . .	65
5	Modular numerical semigroups . . . . .	69
6	Opened modular numerical semigroups . . . . .	71
	Exercises . . . . .	75
<b>5</b>	<b>The quotient of a numerical semigroup by a positive integer . . . . .</b>	<b>77</b>
	Introduction . . . . .	77
1	Notable elements . . . . .	78
2	One half of an irreducible numerical semigroup . . . . .	79
3	Numerical semigroups having a Toms decomposition . . . . .	83
	Exercises . . . . .	88
<b>6</b>	<b>Families of numerical semigroups closed under finite intersections and adjoin of the Frobenius number . . . . .</b>	<b>91</b>
	Introduction . . . . .	91
1	The directed graph of the set of numerical semigroups . . . . .	91
2	Frobenius varieties . . . . .	93
3	Intersecting Frobenius varieties . . . . .	98
4	Systems of generators with respect to a Frobenius variety . . . . .	99
5	The directed graph of a Frobenius variety . . . . .	100
	Exercises . . . . .	104
<b>7</b>	<b>Presentations of a numerical semigroup . . . . .</b>	<b>105</b>
	Introduction . . . . .	105
1	Free monoids and presentations . . . . .	106
2	Minimal presentations of a numerical semigroup . . . . .	110
3	Computing minimal presentations . . . . .	113
4	An upper bound for the cardinality of a minimal presentation . . . . .	117
	Exercises . . . . .	120
<b>8</b>	<b>The gluing of numerical semigroups . . . . .</b>	<b>123</b>
	Introduction . . . . .	123
1	The concept of gluing . . . . .	124
2	Complete intersection numerical semigroups . . . . .	127
3	Gluing of numerical semigroups . . . . .	129
4	Free numerical semigroups . . . . .	132
	Exercises . . . . .	135

<b>9</b>	<b>Numerical semigroups with embedding dimension three</b>	137
	Introduction	137
1	Numerical semigroups with Apéry sets of unique expression	137
2	Irreducible numerical semigroups with embedding dimension three	141
3	Pseudo-Frobenius numbers and genus of an embedding dimension three numerical semigroup	147
	Exercises	154
<b>10</b>	<b>The structure of a numerical semigroup</b>	155
	Introduction	155
1	Levin's theorem	155
2	Structure theorem	159
3	$\mathfrak{N}$ -monoids	162
	Exercises	168
	<b>Bibliography</b>	171
	<b>List of symbols</b>	177
	<b>Index</b>	179

Numerical Semigroups

Rosales, J.C.; García-Sánchez, P.A.

2009, IX, 181 p. 7 illus., Hardcover

ISBN: 978-1-4419-0159-0
