Part I Equity in Quality in Mathematics Education: Contexts and Perspectives

1	My Journey Toward Equity in Quality	3
1.1	The Nineteen Fifties: The School Years	3
1.2	The Nineteen Sixties: The University Years	5
1.3	The Start of a Career in Mathematics Education	7
1.4	The Nineteen Eighties: The Beginning of the Social Turn	12
1.5	The Nineteen Nineties: Problem Solving in School and Outside	14
1.6	The Present: Reflecting on the Past and Looking Ahead	16
2	Historical Evolution of Equity and Quality in Education and in Math Education	19
2.1	The Evolution of Educational Equity and Quality	19
2.1.1	The Fifties and Sixties	19
2.1.2	The Seventies	20
2.1.3	The Eighties	20
2.1.4	The Nineties	20
2.1.5	The First Decade of the Twenty-First Century	21
2.2	The Evolution of Equity and Quality in Mathematics Education Literature	22
2.2.1	The Fifties and Sixties	22
2.2.2	The Seventies	25
2.2.3	The Eighties	25
2.2.4	The Nineties	26
2.3	The Evolution of Equity and Quality in Mathematics Education in ICMI and PME Activities	27
2.3.1	ICMI Studies	28
2.3.2	The ICME Congresses	28
2.3.3	The PME Annual Conferences	28
2.4	Conclusion	32

3	Equity in Quality: Towards a Theoretical Framework	35
3.1	Quotations	36
3.1.1	Quotation 1: Inside and Outside School	36
3.1.2	Quotation 2: In the Same Classroom	36
3.1.3	Quotation 3: Inside and Outside a Country	37
3.1.4	Quotation 4: Across Countries	38
3.2	Equity and Quality in the School as a Production System	38
3.2.1	The School as a Production System	38
3.2.2	Equity in the Production System	39
3.2.3	Quality in the Production System	40
3.2.4	Revisiting the Quotations from the Perspective of the Production System	41
3.2.5	Comments on Equity and Quality in the School as a Production System	42
3.3	Activity Theory and Mathematics Education	43
3.3.1	Activity Theory	43
3.3.2	Activity System	44
3.3.3	Mathematics Education as an Activity System	45
3.3.4	Mathematics Education as a Nested Hierarchical Complex Activity System	46
3.4	Equity and Quality in the Activity System	46
3.4.1	Equity in the Activity System	47
3.4.2	Quality in the Activity System	47
3.4.3	The Activity System and the Social-Cultural-Political Nature of Math Education	48
3.4.4	Revisiting the Quotations from the Perspective of Activity System	49
4	The School Context	51
4.1	Math Education System at the School Level: Factors and Their Attributes	51
4.1.1	Mathematics Learning	52
4.1.2	Student	52
4.1.3	Classroom Community	53
4.1.4	Mediating Artifacts	53
4.1.5	Division of Labor	53
4.1.6	Rules	54
4.2	Interactions and Inequities: Two Examples	54
4.3	Inequities Related to Student, Mediating Artifacts, and Division of Labor Interactions	55
4.3.1	Student Personal Traits and Mathematics Mediating Artifacts in the Classroom	55
4.3.2	Student Socioeconomic Background and Mathematics Mediating Artifacts in the Classroom	56

4.3.3	Student Cultural Background and Mathematics Mediating Artifacts in the Classroom	57
4.3.4	Distribution of Labor and Classroom Community.....	60
4.4	Inequities Related to Student, Classroom, and Mathematics Achievement Interactions	60
4.4.1	Gender and Mathematics Achievement	61
4.4.2	Student Socioeconomic Background and Mathematics Achievement	62
4.4.3	Student Cultural Background and Mathematics Achievement	63
4.4.4	Student Perceptions of Self in Relation to the Class Community and Mathematics Achievement	64
4.4.5	Classroom Practices and Mathematics Achievement....	65
4.5	Inequities Related to School Policies and Sociocultural Context	66
4.6	Concluding Remarks	67
5	The National Context	69
5.1	Math Education System at the National Level: Factors and Their Attributes.....	69
5.1.1	School	70
5.1.2	Educational System Community.....	71
5.1.3	Division of Labor.....	71
5.2	Interactions and Inequities: An Example	71
5.3	Inequities Related to School, Education School System, and Mediating Artifacts Interactions	72
5.3.1	General Pattern of Interactions	72
5.3.2	The Two-Tier Education System in Developing Countries	74
5.3.3	The Two-Tier Education System in Developed Countries	76
5.4	Inequities Related to the Interaction of School and Mathematics Learning Outcomes	79
5.4.1	School Socioeconomic Cultural Background and Mathematics Achievement	79
5.4.2	Other School Factors and Mathematics Achievement ...	79
5.5	Inequities Related to the Interaction of State Policies and the Education System	80
5.5.1	Decentralization of the Education System and Mathematics Achievement	80
5.5.2	Differentiation of the Education System and Mathematics Achievement	81
5.5.3	School Privatization and Mathematics Achievement....	82
5.6	Concluding Remarks	82

6	The Global Context	85
6.1	Math Education System at the Global Level: Factors and Their Attributes	85
6.1.1	Math Education	85
6.1.2	Country	86
6.1.3	The Math Mediating Artifacts	87
6.1.4	The International Math Education Community	87
6.1.5	Division of Labor	87
6.1.6	Rules	87
6.2	Interactions and Inequities: An Example	88
6.3	Inequities Related to Country, Community, and Division of Labor Interactions	88
6.4	Inequities Related to the Interaction of Country and Mathematics Learning	89
6.5	Inequities Related to the Interaction of International Policies and Participation	91
6.5.1	International Policies	91
6.5.2	Exchange and Transfer	92
6.6	Concluding Remarks	93

Part II Equity in Quality in Mathematics Education: Across Countries Comparisons Based on TIMSS 2003 Results

7	Methodology	97
7.1	A Theoretical-Methodological Issue	97
7.1.1	Research Method in Activity Theory	97
7.1.2	Research Method in Contextualism	98
7.2	TIMSS 2003 Background Questionnaires	99
7.3	Summary Indices and Derived Variables from Questionnaire Data	99
7.3.1	Student-Level Indices	100
7.3.2	Teacher-Level Indices	101
7.3.3	School-Level Indices	101
7.4	Single-Item Variables	102
7.4.1	Student-Level Variables	102
7.4.2	Teacher-Level Variables	102
7.5	Dependent Variables	103
7.6	The Sample of Countries	103
7.7	Statistical Analysis	104
7.8	Equity Measure	105
7.8.1	Inequity Index	105
7.8.2	Inequity Factor	105

8	Student-Related Inequity Factors	107
8.1	Student Indices	108
8.1.1	Index of Student Educational Aspiration Relative to Parents' Education	108
8.1.2	Index of Student Self-confidence in Learning Mathematics	109
8.1.3	Index of Parents Highest Education Level	113
8.1.4	Index of Computer Use	113
8.1.5	Index of Student Perception of Being Safe in School ...	115
8.1.6	Summary of Student Indices as Inequity Factors	118
8.2	Student Practices	119
8.2.1	How Often Students Explain Their Answers in Mathematics Lessons	119
8.2.2	How Often Students Work Problems on Their Own in Mathematics Lessons	120
8.2.3	How Often Students Have a Quiz or Test in Mathematics Lessons	123
8.2.4	How Often Students Use Calculators in Mathematics Lessons	123
8.2.5	How Often Students Work Together in Small groups in Mathematics Lessons	126
8.2.6	Summary of Student Practices as Inequity Factors	126
9	Teacher-Related Inequity Factors	129
9.1	Teachers' Indices	130
9.1.1	Index of Mathematics Teachers' Perception of School Climate	130
9.1.2	Index of Teachers' Reports on Teaching Mathematic Classes with Few or no Limitations on Instruction due to Student Factors	132
9.1.3	Index of Teachers' Emphasis on Mathematics Homework	134
9.1.4	Class Size for Mathematics Instruction	137
9.2	Teacher Practices	137
9.3	Concluding Remarks	138
10	School-Related Inequity Factors	139
10.1	Index of Principal Perception of School Climate	140
10.2	Index of Good School and Class Attendance	142
10.3	Concluding Remarks	142
11	Global Inequity Factors	145
11.1	Country Indicators	145
11.1.1	Educational Indicators	145
11.1.2	Economic Educators	146
11.2	Country Indicators and Mathematics achievement	147

11.3	The Relationship Between Equity and Quality at the Country Level	148
11.3.1	Country Inequity Index	148
11.3.2	Country Quality Index	149
11.3.3	Quality-Inequity Matrix	149
11.4	Optimal and Separate Modes of Development in Mathematics Education	150
11.4.1	Contrasting the Developmental Profiles of Optimal and Separate Modes of Development	151
11.5	Concluding remarks	153
12	Epilogue	155
12.1	Some Generalizations	155
12.2	A Cross-Layer Perspective of the Math Education Activity System	156
12.3	Interpretation of TIMSS 2003 Data Analysis Through the Activity System Lens	158
12.4	System-Wise Transformation to Achieve Equity In Quality ...	158
12.4.1	Transformation in the Activity System	160
12.5	System-Wise Transformation: The Case of Lebanon	161
12.5.1	The Context	161
12.5.2	The Inequity	161
12.5.3	The Conflict	162
12.5.4	A Suggested Strategy	162
