

CONTENTS

1 Mathematical Methods in Biophysics

Rajiv R.P. Singh

1.1.	Functions of One Variable and Ordinary Differential Equations	1
1.2.	Functions of Several Variables: Diffusion Equation in One Dimension	2
1.3.	Random Walks and Diffusion	4
1.4.	Random Variables, Probability Distribution, Mean, and Variance	7
1.5.	Diffusion Equation in Three Dimensions	8
1.6.	Complex Numbers, Complex Variables, and Schrödinger's Equation	9
1.7.	Solving Linear Homogeneous Differential Equations	10
1.8.	Fourier Transforms	13
1.9.	Nonlinear Equations: Patterns, Switches and Oscillators	14

2 Quantum Mechanics Basic to Biophysical Methods

William Fink

2.1.	Quantum Mechanics Postulates	17
2.2.	One-Dimensional Problems	23
2.3.	The Harmonic Oscillator	27
2.4.	The Hydrogen Atom	30
2.5.	Approximate Methods	33
2.6.	Many Electron Atoms and Molecules	36
2.7.	The Interaction of Matter and Light	38

3 Computational Modeling of Receptor–Ligand Binding and Cellular Signaling Processes

Subhadip Raychaudhuri, Philippos Tsourkas, and Eric Willgohs

3.1.	Introduction	41
3.2.	Differential Equation-Based Mean-Field Modeling	42
3.3.	Application: Clustering of Receptor–Ligand Complexes	45
3.4.	Modeling Membrane Deformation as a Result of Receptor–Ligand Binding	46
3.5.	Limitations of Mean-Field Differential Equation-Based Modeling	47
3.6.	Master Equation: Calculating the Time Evolution of a Chemically Reacting System	47

3.7.	Stochastic Simulation Algorithm (SSA) of Gillespie	48
3.8.	Application of the Stochastic Simulation Algorithm (SSA).....	49
3.9.	Free Energy-Based Metropolis Monte Carlo Simulation	49
3.10.	Application of Metropolis Monte Carlo Algorithm.....	50
3.11.	Stochastic Simulation Algorithm with Reaction and Diffusion: Probabilistic Rate Constant–Based Method	51
3.12.	Mapping Probabilistic and Physical Parameters.....	51
3.13.	Modeling Binding between Multivalent Receptors and Ligands.....	53
3.14.	Multivalent Receptor–Ligand Binding and Multimolecule Signaling Complex Formation.....	54
3.15.	Application of Stochastic Simulation Algorithm with Reaction and Diffusion	55
3.16.	Choosing the Most Efficient Simulation Method	55
3.17.	Summary	56

4 Fluorescence Spectroscopy

Yin Yeh, Samantha Fore, and Huawen Wu

4.1.	Introduction	63
4.2.	Fundamental Process of Fluorescence.....	64
4.3.	Fluorescence Microscopy	71
4.4.	Types of Biological Fluorophores	76
4.5.	Application of Fluorescence in Biophysical Research	86
4.6.	Dynamic Processes Probed by Fluorescence.....	96

5 Electrophysiological Measurements of Membrane Proteins

Tsung-Yu Chen, Yu-Fung Lin, and Jie Zheng

5.1.	Membrane Bioelectricity	111
5.2.	Electrochemical Driving Force.....	112
5.3.	Voltage Clamp versus Current Clamp.....	114
5.4.	Principles of Silver Chloride Electrodes.....	115
5.5.	Capacitive Current and Ionic Current.....	115
5.6.	Gating and Permeation Functions of Ion Channels	116
5.7.	Two-Electrode Voltage Clamp for <i>Xenopus</i> Oocyte Recordings	118
5.8.	Patch-Clamp Recordings	122
5.9.	Patch-Clamp Fluorometry	137

6 Single-Particle Tracking

Michael J. Saxton

6.1.	Introduction	147
6.2.	The Broader Field.....	148
6.3.	Labeling the Dots	150
6.4.	Locating the Dots	153
6.5.	Connecting the Dots	158
6.6.	Interpreting the Dots: Types of Motion	158
6.7.	Is It Really a Single Particle?	163
6.8.	Enhancing z-Resolution.....	164
6.9.	Can a Single Fluorophore Be Seen in a Cell?.....	165
6.10.	Colocalization.....	165
6.11.	Example: Motion in the Plasma Membrane Is More Complicated than is Often Assumed	167
6.12.	Example: From DNA to Protein	168
6.13.	Example: Infection of a Cell by a Virus	169

7 NMR Measurement of Biomolecule Diffusion

Thomas Jue

7.1.	Introduction	181
7.2.	Relaxation and Field Gradient Measurement of Diffusion.....	182
7.3.	Frequency Encoding of Spatial Position with Field Gradient	183
7.4.	Phase Encoding by the Field Gradient.....	184
7.5.	Diffusion and Pulsed Field Gradient Signal Intensity	187
7.6.	Fick's Laws of Diffusion.....	188
7.7.	Biomolecule Diffusion in the Cell.....	189
7.8.	Stimulated Echo and Biomolecule Diffusion in the Cell.....	190
7.9.	Myoglobin Function in the Cell.....	190
7.10.	Perfused Heart Model.....	191
7.11.	O ₂ Diffusion in Muscle Cell	192
7.12.	Translational Diffusion of Mb in Vitro	193
7.13.	Translational Diffusion of Mb In Vivo.....	193
7.14.	Mb Contribution to O ₂ transport in Vivo	193
7.15.	Mb-Facilitated Diffusion and Myocardial Function.....	195
7.16.	Mb-Facilitated Diffusion and Skeletal Muscle Function.....	195
7.17.	Cytoplasmic Properties and Architecture	196
7.18.	Summary	196

Problem Solutions	201

Fundamental Concepts in Biophysics

Volume 1

Jue, Th. (Ed.)

2009, VIII, 248 p. 9 illus., 7 illus. in color., Hardcover

ISBN: 978-1-58829-973-4
