<b>Foreword by Anil K. Jain</b>	<b>ix</b>
<b>Foreword by Rama Chellappa</b>	<b>xi</b>
<b>Preface to the Third Edition</b>	<b>xiii</b>
<b>Preface to the Second Edition</b>	<b>xv</b>
<b>Preface to the First Edition</b>	<b>xvii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Labeling for Image Analysis . . . . .	3
1.1.1 Sites and Labels . . . . .	3
1.1.2 The Labeling Problem . . . . .	4
1.1.3 Labeling Problems in Image Analysis . . . . .	5
1.1.4 Labeling with Contextual Constraints . . . . .	7
1.2 Optimization-Based Approach . . . . .	8
1.2.1 Research Issues . . . . .	9
1.2.2 Role of Energy Functions . . . . .	10
1.2.3 Formulation of Objective Functions . . . . .	11
1.2.4 Optimality Criteria . . . . .	12
1.3 The MAP-MRF Framework . . . . .	13
1.3.1 Bayes Estimation . . . . .	13
1.3.2 MAP-MRF Labeling . . . . .	15
1.3.3 Regularization . . . . .	16
1.3.4 Summary of the MAP-MRF Approach . . . . .	17
1.4 Validation of Modeling . . . . .	18
<b>2 Mathematical MRF Models</b>	<b>21</b>
2.1 Markov Random Fields and Gibbs Distributions . . . . .	21
2.1.1 Neighborhood System and Cliques . . . . .	21
2.1.2 Markov Random Fields . . . . .	24
2.1.3 Gibbs Random Fields . . . . .	26

2.1.4	Markov-Gibbs Equivalence . . . . .	28
2.1.5	Normalized and Canonical Forms . . . . .	29
2.2	Auto-models . . . . .	30
2.3	Multi-level Logistic Model . . . . .	32
2.4	The Smoothness Prior . . . . .	34
2.5	Hierarchical GRF Model . . . . .	37
2.6	The FRAME Model . . . . .	37
2.7	Multiresolution MRF Modeling . . . . .	40
2.8	Conditional Random Fields . . . . .	43
2.9	Discriminative Random Fields . . . . .	44
2.10	Strong MRF Model . . . . .	45
2.11	$\mathcal{K}$ -MRF and Nakagami-MRF Models . . . . .	46
2.12	Graphical Models: MRF's versus Bayesian Networks . . . . .	47
<b>3</b>	<b>Low-Level MRF Models</b>	<b>49</b>
3.1	Observation Models . . . . .	50
3.2	Image Restoration and Reconstruction . . . . .	51
3.2.1	MRF Priors for Image Surfaces . . . . .	51
3.2.2	Piecewise Constant Restoration . . . . .	54
3.2.3	Piecewise Continuous Restoration . . . . .	56
3.2.4	Surface Reconstruction . . . . .	58
3.3	Edge Detection . . . . .	60
3.3.1	Edge Labeling Using Line Process . . . . .	61
3.3.2	Forbidden Edge Patterns . . . . .	63
3.4	Texture Synthesis and Analysis . . . . .	65
3.4.1	MRF Texture Modeling . . . . .	65
3.4.2	Texture Segmentation . . . . .	69
3.5	Optical Flow . . . . .	71
3.5.1	Variational Approach . . . . .	71
3.5.2	Flow Discontinuities . . . . .	73
3.6	Stereo Vision . . . . .	74
3.7	Spatio-temporal Models . . . . .	76
3.8	Bayesian Deformable Models . . . . .	78
3.8.1	Formulation of EigenSnake . . . . .	80
3.8.2	Experiments . . . . .	86
<b>4</b>	<b>High-Level MRF Models</b>	<b>91</b>
4.1	Matching under Relational Constraints . . . . .	91
4.1.1	Relational Structure Representation . . . . .	92
4.1.2	Work in Relational Matching . . . . .	96
4.2	Feature-Based Matching . . . . .	98
4.2.1	Posterior Probability and Energy . . . . .	99
4.2.2	Matching to Multiple Objects . . . . .	101
4.2.3	Extensions . . . . .	103

4.2.4	Experiments . . . . .	105
4.3	Optimal Matching to Multiple Overlapping Objects . . . . .	113
4.3.1	Formulation of MAP-MRF Estimation . . . . .	113
4.3.2	Computational Issues . . . . .	117
4.4	Pose Computation . . . . .	121
4.4.1	Pose Clustering and Estimation . . . . .	121
4.4.2	Simultaneous Matching and Pose Estimation . . . . .	124
4.4.3	Discussion . . . . .	127
4.5	Face Detection and Recognition . . . . .	127
<b>5</b>	<b>Discontinuities in MRF's</b>	<b>129</b>
5.1	Smoothness, Regularization, and Discontinuities . . . . .	130
5.1.1	Regularization and Discontinuities . . . . .	131
5.1.2	Other Regularization Models . . . . .	135
5.2	The Discontinuity Adaptive MRF Model . . . . .	136
5.2.1	Defining the DA Model . . . . .	136
5.2.2	Relations with Previous Models . . . . .	141
5.2.3	Discrete Data and 2D Cases . . . . .	142
5.2.4	Solution Stability . . . . .	143
5.2.5	Computational Issues . . . . .	144
5.3	Total Variation Models . . . . .	146
5.3.1	Total Variation Norm . . . . .	147
5.3.2	TV Models . . . . .	147
5.3.3	Multichannel TV . . . . .	150
5.4	Modeling Roof Discontinuities . . . . .	151
5.4.1	Roof-Edge Model . . . . .	152
5.4.2	MAP-MRF Solution . . . . .	154
5.4.3	Computational Issues . . . . .	155
5.5	Experimental Results . . . . .	156
5.5.1	Step-Edge-Preserving Smoothing . . . . .	156
5.5.2	Roof-Edge-Preserving Smoothing . . . . .	157
<b>6</b>	<b>MRF Model with Robust Statistics</b>	<b>161</b>
6.1	The DA Prior and Robust Statistics . . . . .	162
6.1.1	Robust M-Estimator . . . . .	163
6.1.2	Problems with M-Estimator . . . . .	165
6.1.3	Redefinition of M-Estimator . . . . .	166
6.1.4	AM-Estimator . . . . .	167
6.1.5	Convex Priors for DA and M-Estimation . . . . .	168
6.1.6	Half-Quadratic Minimization . . . . .	170
6.2	Experimental Comparison . . . . .	173
6.2.1	Location Estimation . . . . .	173
6.2.2	Rotation Angle Estimation . . . . .	177

<b>7</b>	<b>MRF Parameter Estimation</b>	<b>183</b>
7.1	Supervised Estimation with Labeled Data . . . . .	184
7.1.1	Maximum Likelihood . . . . .	184
7.1.2	Pseudo-likelihood . . . . .	188
7.1.3	Coding Method . . . . .	188
7.1.4	Mean Field Approximations . . . . .	190
7.1.5	Least Squares Fit . . . . .	191
7.1.6	Markov Chain Monte Carlo Methods . . . . .	194
7.1.7	Learning in the FRAME Model . . . . .	198
7.2	Unsupervised Estimation with Unlabeled Data . . . . .	199
7.2.1	Simultaneous Restoration and Estimation . . . . .	200
7.2.2	Simultaneous Segmentation and Estimation . . . . .	202
7.2.3	Expectation-Maximization . . . . .	206
7.2.4	Cross Validation . . . . .	208
7.3	Estimating the Number of MRF's . . . . .	210
7.3.1	Akaike Information Criterion (AIC) . . . . .	211
7.3.2	Reversible Jump MCMC . . . . .	211
7.4	Reduction of Nonzero Parameters . . . . .	213
<b>8</b>	<b>Parameter Estimation in Optimal Object Recognition</b>	<b>215</b>
8.1	Motivation . . . . .	215
8.2	Theory of Parameter Estimation for Recognition . . . . .	217
8.2.1	Optimization-Based Object Recognition . . . . .	218
8.2.2	Criteria for Parameter Estimation . . . . .	219
8.2.3	Linear Classification Function . . . . .	222
8.2.4	A Nonparametric Learning Algorithm . . . . .	225
8.2.5	Reducing Search Space . . . . .	227
8.3	Application in MRF Object Recognition . . . . .	228
8.3.1	Posterior Energy . . . . .	228
8.3.2	Energy in Linear Form . . . . .	229
8.3.3	How the Minimal Configuration Changes . . . . .	230
8.3.4	Parametric Estimation under Gaussian Noise . . . . .	232
8.4	Experiments . . . . .	234
8.4.1	Recognition of Line Patterns . . . . .	234
8.4.2	Recognition of Curved Objects . . . . .	238
8.4.3	Convergence . . . . .	240
8.5	Conclusion . . . . .	241
<b>9</b>	<b>Minimization – Local Methods</b>	<b>243</b>
9.1	Problem Categorization . . . . .	243
9.2	Classical Minimization with Continuous Labels . . . . .	246
9.3	Minimization with Discrete Labels . . . . .	247

9.3.1	Iterated Conditional Modes . . . . .	247
9.3.2	Relaxation Labeling . . . . .	248
9.3.3	Belief Propagation . . . . .	253
9.3.4	Convex Relaxation . . . . .	255
9.3.5	Highest Confidence First . . . . .	258
9.3.6	Dynamic Programming . . . . .	260
9.4	Constrained Minimization . . . . .	262
9.4.1	Penalty Functions . . . . .	263
9.4.2	Lagrange Multipliers . . . . .	264
9.4.3	Hopfield Method . . . . .	265
9.5	Augmented Lagrange-Hopfield Method . . . . .	267
9.5.1	MAP-MRF Estimation as Constrained Optimization . . . . .	268
9.5.2	The ALH Method . . . . .	269
<b>10</b>	<b>Minimization – Global Methods</b>	<b>273</b>
10.1	Simulated Annealing . . . . .	274
10.2	Mean Field Annealing . . . . .	276
10.3	Graduated Nonconvexity . . . . .	279
10.3.1	GNC Algorithm . . . . .	279
10.3.2	Annealing Labeling for MAP-MRF Matching . . . . .	284
10.4	Graph Cuts . . . . .	285
10.4.1	Max-Flow . . . . .	285
10.4.2	Two-Label Graph Cuts . . . . .	286
10.4.3	Multilabel Graph Cuts . . . . .	287
10.5	Genetic Algorithms . . . . .	289
10.5.1	Standard GA . . . . .	290
10.5.2	Hybrid GA: Comb Algorithm . . . . .	291
10.6	Experimental Comparisons . . . . .	297
10.6.1	Comparing Various Relaxation Labeling Algorithms . . . . .	297
10.6.2	Comparing the ALH Algorithm with Others . . . . .	304
10.6.3	Comparing the Comb Algorithm with Others . . . . .	306
10.7	Accelerating Computation . . . . .	310
10.7.1	Multiresolution Methods . . . . .	311
10.7.2	Use of Heuristics . . . . .	313
