<i>Preface</i>	----- v
----------------	---------

---

## Chapter 1

### *Objects and Models*

<i>1.1 Graphics Models and Libraries</i>	----- 1
<i>1.2 OpenGL Programming</i>	----- 2
Understanding Example 1.1	3
<i>1.3 Frame Buffer, Scan-conversion, and Clipping</i>	----- 5
Scan-converting Lines	6
Scan-converting Circles and Other Curves	11
Scan-converting Triangles and Polygons	11
Scan-converting Characters	16
Clipping	16
<i>1.4 Attributes and Antialiasing</i>	----- 17
Area Sampling	17
Antialiasing a Line with Weighted Area Sampling	18
<i>1.5 Double-buffering for Animation</i>	----- 21
<i>1.6 Review Questions</i>	----- 26

1.7	<i>Programming Assignments</i>	- - - - -	27
-----	--------------------------------	-----------	----

## Chapter 2

### *Transformation and Viewing*

2.1	<i>Geometric Transformation</i>	- - - - -	29
2.2	<i>2D Transformation</i>	- - - - -	30
	2D Translation		30
	2D Rotation		31
	2D Scaling		32
	Composition of 2D Transformations		33
2.3	<i>3D Transformation and Hidden-surface Removal</i>	- - -	38
	3D Translation, Rotation, and Scaling		38
	Transformation in OpenGL		40
	Hidden-surface Removal		45
	Collision Detection		46
	3D Models: Cone, Cylinder, and Sphere		46
	Composition of 3D Transformations		51
2.4	<i>Viewing</i>	- - - - -	56
	2D Viewing		56
	3D Viewing		57
	3D Clipping Against a Cube		61
	Clipping Against an Arbitrary Plane		62
	An Example of Viewing in OpenGL		62
2.5	<i>Review Questions</i>	- - - - -	65
2.6	<i>Programming Assignments</i>	- - - - -	67

## Chapter 3

### *Color and Lighting*

3.1	<i>Color</i>	- - - - -	69
	RGB Mode and Index Mode		70
	Eye Characteristics and Gamma Correction		71

3.2	<i>Color Interpolation</i>	- - - - -	72
3.3	<i>Lighting</i>	- - - - -	74
	Lighting Components		74
	OpenGL Lighting Model		79
3.4	<i>Visible-Surface Shading</i>	- - - - -	85
	Back-Face Culling		85
	Polygon Shading Models		87
	Ray Tracing and Radiosity		90
3.5	<i>Review Questions</i>	- - - - -	96
3.6	<i>Programming Assignments</i>	- - - - -	100

## Chapter 4

### *Blending and Texture Mapping*

4.1	<i>Blending</i>	- - - - -	101
	OpenGL Blending Factors		102
	Transparency and Hidden-Surface Removal		103
	Antialiasing		105
	Fog		105
4.2	<i>Images</i>	- - - - -	107
4.3	<i>Texture Mapping</i>	- - - - -	108
	Pixel and Texel Relations		108
	Texture Objects		112
	Texture Coordinates		113
	Levels of Detail in Texture Mapping		116
4.4	<i>Advanced Texture Mapping</i>	- - - - -	117
	Bump Mapping		117
	Light Mapping		119
	Environment Mapping		120
	Automatic Texture Coordinates		122
	Displacement Mapping		123
4.5	<i>Review Questions</i>	- - - - -	124
4.6	<i>Programming Assignments</i>	- - - - -	125

## Chapter 5

### *OpenGL Programming in Java: JOGL*

5.1	<i>Introduction</i>	- - - - -	127
5.2	<i>Setting Up Working Environment</i>	- - - - -	128
5.3	<i>Drawing a Point</i>	- - - - -	132
5.4	<i>Drawing Randomly Generated Points</i>	- - - - -	134
5.5	<i>Building an Executable JAR File</i>	- - - - -	136
5.6	<i>Review Questions</i>	- - - - -	138
5.7	<i>Programming Assignments</i>	- - - - -	138

## Chapter 6

### *Curved Models*

6.1	<i>Introduction</i>	- - - - -	141
6.2	<i>Quadratic Surfaces</i>	- - - - -	142
	Sphere	142	
	Ellipsoid	143	
	Cone	144	
	Cylinder	144	
	Texture Mapping on GLU Models	145	
6.3	<i>Tori, Polyhedra, and Teapots in GLUT</i>	- - - - -	148
	Tori	148	
	Polyhedra	148	
	Teapots	149	
6.4	<i>Cubic Curves</i>	- - - - -	152
	Continuity Conditions	153	
	Hermite Curves	155	
	Bezier Curves	158	
	Natural Splines	163	
	B-splines	164	
	Non-uniform B-splines	167	
	NURBS	168	

6.5	<i>Bi-cubic Surfaces</i>	169
	Hermite Surfaces	169
	Bezier Surfaces	171
	B-spline Surfaces	175
6.6	<i>Review Questions</i>	175
6.7	<i>Programming Assignments</i>	176

## Chapter 7

### *Vertex Shading, Pixel Shading, and Parallel Processing*

7.1	<i>Introduction</i>	179
7.2	<i>Programmable Pipelines</i>	180
7.3	<i>GLSL, Cg, and HLSL</i>	182
	Cg Basics	182
	A Vertex Program	183
	Transformation and Viewing	186
	A Fragment Program	188
7.4	<i>Parallel Processing and Cuda</i>	192
7.5	<i>Introduction</i>	194
7.6	<i>Per-Vertex Lighting</i>	194
	Vertex and Light Source Transformation	195
	Vertex Normal Transformation	196
	OpenGL Lighting Model	197
7.7	<i>Per-Fragment Lighting</i>	206
7.8	<i>Per-Fragment Texture Mapping</i>	211
	Texture Coordinates	211
	Texture Objects	212
	Texture and Lighting Blending	213
7.9	<i>Per-Fragment Bump Mapping</i>	215
	Bump Map Texture Coordinates	215
	Bump Map Object	216
	Normal Calculations	217

Fragment Lighting Calculations    **218**

7.10	<i>Review Questions</i>	- - - - -	221
7.11	<i>Programming Assignments</i>	- - - - -	221

**Chapter 8**

***Programming in Java3D***

8.1	<i>Introduction</i>	- - - - -	223
8.2	<i>Scene Graph</i>	- - - - -	223
	Setting Up Working Environment		225
	Drawing a ColorCube Object		228
8.3	<i>The SimpleUniverse</i>	- - - - -	229
8.4	<i>Transformation</i>	- - - - -	232
8.5	<i>Multiple Scene Graph Branches</i>	- - - - -	233
8.6	<i>Animation</i>	- - - - -	236
8.7	<i>Primitives</i>	- - - - -	240
8.8	<i>Appearance</i>	- - - - -	244
8.9	<i>Texture Mapping</i>	- - - - -	247
8.10	<i>Files and Loaders</i>	- - - - -	249
8.11	<i>Summary</i>	- - - - -	251
8.12	<i>Review Questions</i>	- - - - -	251
8.13	<i>Programming Assignments</i>	- - - - -	251

**Chapter 9**

***OpenGL Shading Language***

9.1	<i>Introduction</i>	- - - - -	253
9.2	<i>Anatomy of a GLSL Program</i>	- - - - -	253
9.3	<i>GLSL Shader Basics</i>	- - - - -	255

9.4	<i>Compiling Shaders</i>	256
9.5	<i>Linking Shaders</i>	257
9.6	<i>Executing Shaders</i>	259
9.7	<i>Varying Variables</i>	260
9.8	<i>Uniform Variables</i>	261
9.9	<i>Using Textures</i>	263
9.10	<i>Lighting</i>	264
9.11	<i>Advanced Shaders Techniques</i>	267
	Post Processing	267
	Depth-based Texture Processing	270
	Fog	274

## Chapter 10

### *Direct3D Shader Programming*

10.1	<i>Introduction</i>	283
	Setting Up Working Environment	284
	An Example Framework	285
10.2	<i>Rendering Primitives</i>	288
	Creating Primitives	289
	Animation Using Shaders	294
10.3	<i>Pixel Lighting</i>	298
	Creating Depth Stencil View	299
	Creating Input Layout	300
	Creating Cube Geometry	301
	Interfaces for Accessing Variables In Effect Object	303
	Rendering the Scene	304
	Lighting in Shaders	307
	Directional Pixel Lighting	308
	Directional Pixel Light with Specular	309
	Point Pixel Lighting	310
	Point Pixel Lighting with Specular	312
	Spot Pixel Lighting	312

	Hemisphere Pixel Lighting	313
10.4	<i>Texture Mapping</i>	314
	Creating Views	314
	Creating Input Layout	316
	Render-to-texture Function	317
	Texture Mapping in Shaders	319
	Simple Texture Mapping	320
	Multi-Texture Mapping	321
	Texture and Lighting	321
	Texture Animation	322
	Light Mapping	323
	Bump Mapping	323
10.5	<i>Simulating Fixed Functional Fog</i>	325
	Linear Fog	325
	Exponential Fog	326
	Square Exponential Fog	326
10.6	<i>Cube Mapping</i>	326
	Creating Geometry	327
	Creating Resources for Cube Mapping	327
	Rendering the Scene	329
	Rendering to Cube Map in Shaders	330
	Cube Mapping in Shaders	331
	Cube Mapping with Refraction	332
	Cube mapping with Separated Refraction	334

## Chapter 11

### *Advanced Topics*

11.1	<i>Introduction</i>	335
11.2	<i>Graphics Libraries</i>	336
11.3	<i>Visualization</i>	336
	Interactive Visualization and Computational Steering	336
	Data Visualization: Dimensions and Data Types	337
	Parallel Coordinates	339
11.4	<i>Modeling and Rendering</i>	340

Curves and Surfaces	341
Sweep Representations	341
Instances	341
Constructive Solid Geometry	341
Procedural Models	342
Fractals	342
Particle systems	342
Image-based Modeling and Rendering	344
<i>11.5 Animation and Simulation</i>	<i>345</i>
Physics-Based Modeling and Simulation: Triangular Polyhedra	346
Real-time Animation and Simulation: a Spider Web	348
The Efficiency of Modeling and Simulation	351
<i>11.6 Virtual Reality</i>	<i>352</i>
<i>11.7 Graphics on the Internet: Web3D</i>	<i>354</i>
Virtual Reality Modeling Language (VRML)	354
Java3D	354

## Chapter 12

### *Low-Level Graphics Libraries*

<i>12.1 Introduction</i>	<i>355</i>
<i>12.2 OpenGL and Mesa</i>	<i>355</i>
<i>12.3 Direct3D/DirectX</i>	<i>356</i>
<i>12.4 PHIGS and GKS-3D</i>	<i>356</i>
<i>12.5 QuickDraw3D and XGL</i>	<i>356</i>

## Chapter 13

### *Visualization*

<i>13.1 Introduction</i>	<i>357</i>
<i>13.2 Multipurpose Visualization Tools</i>	<i>358</i>
<i>13.3 Volume Rendering</i>	<i>358</i>

13.4   *Vector Field and Fluid Flow*   - - - - - 359

13.5   *Large Data Sets*   - - - - - 359

**Chapter 14**

***Modeling and Rendering***

14.1   *Modeling*   - - - - - 361

14.2   *Rendering*   - - - - - 361

14.3   *Multipurpose Tools: Modeling, Rendering, and Animation*   362

**Chapter 15**

***Animation and Simulation***

15.1   *Animation*   - - - - - 365

15.2   *Simulation*   - - - - - 366

**Chapter 16**

***Virtual Reality***

16.1   *Virtual Reality*   - - - - - 367

**Chapter 17**

***Web3D Tools and Networked Environment***

17.1   *Web3D*   - - - - - 369

17.2   *Distributed Interactive Simulation*   - - - - - 369

17.3   *Synchronization in a DIS*   - - - - - 370

          The Clock Reckoning — Wall Clock Synchronization   371

**Chapter 18*****3D File Formats***

<i>18.1 Introduction</i>	<i>373</i>
<i>18.2 3D File Formats</i>	<i>374</i>
<i>18.3 3D Programming Tool Libraries</i>	<i>375</i>
<i>18.4 3D Authoring Tools</i>	<i>375</i>
<i>18.5 3D File Format Converters</i>	<i>375</i>
Built-In and Plug-In VRML Exporters	<b>376</b>
Independent 3D File Format Converters	<b>376</b>

***Appendix A******Basic Mathematics for 3D Computer Graphics 377***

<i>A.1 Vector Operations</i>	<i>377</i>
The Length and Direction	<b>377</b>
Addition and Subtraction	<b>378</b>
Dot Product and Cross Product	<b>379</b>
Reflection	<b>380</b>
<i>A.2 Matrix Operations</i>	<i>381</i>
Transpose	<b>381</b>
Addition and Subtraction	<b>382</b>
Multiplications	<b>382</b>
Square Matrix and Inverse	<b>384</b>

***Appendix B******Graphics Software Tools 387***

<i>B.1 Graphics Tools Listed by Categories</i>	<i>387</i>
Low-level Graphics Libraries	<b>387</b>
Visualization Tools	<b>388</b>
Modeling Tools	<b>389</b>

Rendering Tools	393
Animation Tools	395
Simulation Tools	397
Virtual Reality Tools	398
Web 3D Tools	399
3D File Format Converters	400

*B.2 Alphabetical Listing and Description of Graphics Tools*    **401**

20-sim	401
3D CANVAS	401
3D Choreographer	402
3D Grapher	402
3D INSTANT WEBSITE	403
3DSOM Pro	403
3D STUDIO MAX	404
3D Studio VIZ	404
3D Text Maker	405
3D Win	405
3DField	406
3dom	406
3DVIEWNIX	407
3D World Studio	407
AC3D	408
AccuRender	409
AccuTrans 3D	409
ACIS 3D Toolkits	410
ActiveWorlds	410
Active Dimensions 3	411
ADG Panorama Tools	411
Adobe Illustrator CS	412
AIR (Animation and Image Rendering)	412
Aladdin 4D	413
AliasStudio	414
Alice	414
Amapi 3D	415
AMIRA	415
Amorphium	416
Analyze	416
Anark	417
Anfy 3D	417
ANIM8OR	418
Animation Master	419
ANIMATION STAND	419
Antics	420

---

Art of Illusion	420
Astex Viewer	421
AutoCAD	421
AVS5	422
bCAD	423
Behemot Graphics Editor	423
Biturn	424
Blaze 3D Studio	424
Blender	425
Blueberry 3D	425
Body Paint 3D	426
Brand Worlds Tools	426
Breeze Designer	427
BRL-CAD	427
Bryce 3D	428
Calimax	429
Carrara	429
Cheetah3D	430
