

Contents

1	Transport Biofuels: Their Characteristics, Production and Costs	1
1.1	Introduction	1
1.2	The Physical Basis for Biofuels	3
1.3	Biofuel Varieties	4
1.4	Virtual Biofuels	10
1.5	Production and Application of Liquid and Gaseous Transport Biofuels	12
1.5.1	Biofuels from Terrestrial Plants and Animals	12
1.5.2	Biofuels from Aquatic Biomass	21
1.5.3	Hydrogen Production Mediated by Micro-Organisms	24
1.6	Biofuel-Based Electricity for Transport	25
1.7	Recent Development of Transport Biofuel Production: Volume, Costs and Prices	26
1.7.1	Volume of Biofuel Production	26
1.7.2	Costs of Biofuel Production and Biofuel Prices	28
1.8	Key Issues and the Rest of This Book	32
	References	35
2	Energy Balance: Cumulative Fossil Fuel Demand and Solar Energy Conversion Efficiency of Transport Biofuels	49
2.1	Introduction	49
2.2	Allocation	50
2.3	Cumulative Fossil Fuel Demand	52
2.3.1	Transport Biofuels from Terrestrial Plants	52
2.3.2	Transport Biofuels from Wastes	53
2.3.3	Transport Biofuels from Aquatic Biomass	53
2.4	Conversion of Solar Energy into Biomass	55
2.4.1	Terrestrial Plants	56
2.4.2	Terrestrial Biofuels	57
2.4.3	Biofuels from Algae and Aquatic Macrophytes	61
2.5	Solar Conversion Efficiencies of Physical Methods	64

2.6	Overall Energy Efficiencies in Performing Work	65
	References	67
3	Non-energy Natural Resource Demand	75
3.1	Introduction	75
3.2	Soil and Soil Organic Matter	75
3.3	Nutrients	79
3.3.1	Forests and Plantations	80
3.3.2	Agricultural Soils	83
3.4	Water	85
3.5	Sustainable Use of Natural Resources and Biomass Yields	88
	References	89
4	Climate Effects and Non-greenhouse Gas Emissions Associated with Transport Biofuel Life Cycles	101
4.1	Introduction	101
4.2	Uncertainty in the Life Cycle Environmental Impact Assessments of Biofuels	102
4.3	Transport Biofuels and Climate	103
4.3.1	Introduction	103
4.3.2	Fossil-Fuel-Based Carbonaceous Greenhouse Gas Emissions	104
4.3.3	N ₂ O Emissions	105
4.3.4	Biogenic CO ₂ Emissions	106
4.3.5	Other Carbonaceous Biogenic Emissions	111
4.4	Net Greenhouse Gas Emissions for Specific Biofuels and Categories of Biofuels	111
4.4.1	Net Greenhouse Gas Emissions for Specific Biofuels	111
4.4.2	Net Greenhouse Gas Emissions for Categories of Transport Biofuels	113
4.5	Non-greenhouse Gas Emissions	116
4.6	Potential for Emission Reduction	119
	References	120
5	The Impact of Expanded Biofuel Production on Living Nature	129
5.1	Introduction	129
5.2	Loss of Biodiversity and Its Impact on Natural Resources Which Have Monetary Value	134
5.3	Biodiversity and Ecosystem Function Loss Due to Replacement of Nature	135
5.4	Cropping and Harvesting Feedstocks for Biofuels	138
5.4.1	Cropping and Crop Harvesting Practices	138
5.4.2	Harvesting Nature	139
5.5	Invasive Species	140
	References	141

6	Frequently Asked Questions in the Transport Biofuel Debate	149
6.1	Introduction	149
6.2	A Focus on One Transport Biofuel Output or on Biorefineries?	149
6.3	Can Transport Biofuels Significantly Contribute to Energy Security?	151
6.4	Transport Biofuels, Food Prices and Food Security	153
6.5	Is Expanding Biofuel Production a Good Way to Tackle Climate Change?	156
6.6	Transport Biofuel Production and Nature Conservation	158
6.7	How to Use Natural Resources for Biofuel Production in a Sustainable Way?	159
6.8	What Government Policy Should One Aim at for Transport Biofuels?	160
6.8.1	Hard Choices	160
6.8.2	Evident Policy Priorities Regarding the Production of Biofuels	161
	References	162
	Index	167

Biofuels for Road Transport
A Seed to Wheel Perspective
Reijnders, L.; Huijbregts, M.
2009, VII, 170 p., Hardcover
ISBN: 978-1-84882-137-8
