Introduction	A Visit to the Doctor: Three Scenarios	1
1	eHealth and Patient Safety	7
	Medical Error: Woe is Me; Woe is You	8
	Keeping Patients Safe	9
	The eHealth Triangle	11
	The eHealth Professional	11
	The eHospital	13
	Case Study: The VA has HIT Covered.....	13
	Case Study: The Dana Farber Cancer Institute.....	14
	Case Study: The Dashboard at BIDMC.....	15
	ePatients	16
	eHealth Around the World	17
	Key Points	19
	References and Notes.....	20
2	New Health Care Models.....	21
	Continuous Available Information on Every Patient	22
	EHR in the Hospital Setting.....	24
	Driving the Adoption of the EHR in Small Group and Solo Practices	24
	Installation, Implementation, and Impediments to Use	26
	EHR Early Adopters Around the World.....	28
	Health Information Exchange and Compatibility	29
	Regional Health Information Organizations Information Exchange	30
	Case Study: The Indiana Network for Patient Care and Indiana Health Information Exchange.....	31
	Case Study: The Taconic Health Information Network and Community ..	32
	Computer Physician Order Entry	34
	Personal Health Records	35
	Case Study: EMC Corporation	38
	Key Points	39
	References and Notes.....	40

3	Communication	43
	The Media, the Message, and the Internet	43
	The Telephone.....	44
	Smart Phones and PDAs	45
	Electronic Mail	46
	Portals	50
	Case Study: Kaiser Permanente	51
	The eVisit.....	52
	Case Study: Medem	54
	Case Study: Relay Health	54
	Key Points.....	56
	References and Notes.....	57
4	Telemedicine	59
	Why Telemedicine?.....	59
	Telemedicine Technologies and Infrastructure	60
	Obstacles	61
	Telemonitoring and Home Healthcare	64
	Telemedicine for Patients in Remote Areas.....	66
	Case Study: Hayes Medical Center	66
	Case Study: St. Alexius Telecare Network of North Dakota	67
	Telerehabilitation	68
	Speech and Language Therapy	68
	Physical Therapy.....	69
	Mental Health Services.....	69
	Telehospice: Death with Dignity	70
	Telemedicine around the World	70
	The eICU: Remote Monitoring for Intensive Care	70
	Key Points.....	71
	References and Notes.....	72
5	Information Access: Information Overload	75
	Healthcare Finds the Internet	75
	Information Access	76
	Information Overload	77
	Resources for Physicians and Patients.....	80
	Institutional Web Sites	84
	Professional Organizations	84
	Online Resources for Cancer	84
	Online Resources for Cardiac and Lung Disease	85
	Online Resources for Diabetes and Kidney Disease.....	85
	Online Resources for HIV	86
	Online Resources for Ordering Drugs	86
	Key Points.....	89
	References and Notes.....	89

6	Keeping Health Information Away from Prying Eyes.....	91
	Medical Information is no Longer Private.....	92
	Privacy Issues Concern Physicians and Patients	93
	Protecting Data with a Secure Network.....	94
	Malware	95
	Automatic Log-off	95
	Theft of Removable Media.....	95
	US Federal Regulations Regarding Privacy (HIPAA).....	96
	The Privacy Rule	97
	The European Union on Privacy.....	97
	The Internet.....	99
	Email.....	101
	Case Study: CVS	103
	Key Points.....	104
	References and Notes.....	105
7	Medicating Your Patients	107
	Medication Error.....	107
	Electronic Prescribing (E-Prescribing).....	108
	Case Scenario #1.....	108
	Case Scenario #2.....	109
	Patient Information and Collaborative Drug Therapy	111
	Hospital Policies	112
	Confusion in the Naming of Drugs.....	113
	Adherence	115
	Online Pharmacies	116
	Direct-to-Consumer Advertising.....	118
	Resources for Safe Healthcare and Medication Advice.....	118
	Key Points.....	119
	References and Notes.....	120
8	All About Money	121
	How We Measure Healthcare Costs.....	121
	The Underinsured and the Uninsured	123
	Controlling Health Expenses with Information Technology	126
	Consumer Directed Health Plans (CDHP).....	127
	Health Reimbursement Accounts (HRA)	128
	Health Savings Account (HSA)	128
	Pay-for-Performance (P4P).....	129
	Key Points.....	130
	References and Notes.....	131

9 The Quality Quotient	133
A Broken System	134
Why Quality is so Hard to Achieve	135
Health Information Technology	135
Evidence-Based Healthcare Delivery	137
Quality Initiatives Require Change.....	138
Lessons Learned	140
Resources	140
The EHealth Initiative.....	141
Bridges to Excellence	141
Cardiac Care Link (CCL)	142
The Leapfrog Group	142
The National Committee for Quality Assurance (NCQA)	142
Joint Commission on Accreditation of Healthcare Organizations' (JCAHO)	143
The Agency for Healthcare Research and Quality (AHRQ).....	143
The Malcolm Baldrige National Quality Award.....	144
Centers for Medicare and Medicaid Services (CMS).....	145
Key Points.....	146
References and Notes.....	147
10 Healthcare 2020	149
A Portrait.....	149
Devices and Enablers.....	152
Personal Digital Assistants and Smart Phones.....	152
Radio Frequency Identification (RFID).....	152
Robots	153
Telemedicine	153
Decision Support and Evidenced-Based Medicine.....	154
Surgery	154
Personalized Medicine.....	155
Virtual Reality	156
The Practice of Medicine in Healthcare 2020	156
Key Points.....	158
References and Notes.....	159
Glossary	161
Index	169
