

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Introduction	1
1.1.1	Global Energy Sources and the Present Energy Situation	2
1.2	Conventional Fossil Fuel Sources	5
1.2.1	Petroleum and Heavy Oil Refining	6
1.2.2	Petroleum Products and Fuels	9
1.2.3	Coal	10
1.3	Unconventional Fossil Fuel Sources	14
1.3.1	Natural Gas	14
1.3.2	Oil Shale (Shale Oil)	17
1.3.3	Tar Sand Bitumen	18
1.4	Renewable Energy Sources	18
1.4.1	Biomass	21
1.4.2	Hydropower	25
1.4.3	Geothermal	27
1.4.4	Wind	28
1.4.5	Solar	30
1.4.6	Other Renewable Energy Sources	33
1.5	Nuclear Fuel Sources	36
	Summary	39
	References	39
<b>2</b>	<b>Fuels from Biomass</b>	43
2.1	Introduction	43
2.2	Biomass Feedstocks	45
2.3	The Chemistry of Biomass	49
2.4	Production of Fuels from Wood Sources	52
2.5	Production of Fuels from Crops	52
2.5.1	Fuels from Cereal Crops	53
2.5.2	Fuels from Non-Cereal Crops	54
2.5.3	Fuels from Energy Crops	57
	Summary	58
	References	58

<b>3</b>	<b>Biofuels</b>	61
3.1	Introduction	61
3.2	Bioethanol	64
3.3	Other Bioalcohols	65
3.4	Biorefinery	67
3.5	Biodiesel	71
3.6	Biogas	74
3.7	Landfill Gas	78
3.8	Fischer–Tropsch Liquids from Biorenewable Feedstocks	79
	Summary	82
	References	83
<b>4</b>	<b>Transportation Fuels</b>	85
4.1	Introduction	85
4.2	Liquefied Petroleum Gas	89
4.3	Compressed Natural Gas	91
4.4	Hydrogen	93
4.5	Electricity	94
4.6	Solar	94
4.7	Biorenewable Liquid Fuels	94
	Summary	103
	References	104
<b>5</b>	<b>Hydrogen</b>	105
5.1	Introduction	105
5.2	History	106
5.3	Properties of Hydrogen	107
5.4	Fuel Properties of Hydrogen	108
5.5	Hydrogen Production Processes	110
5.5.1	Hydrogen from Natural Gas by Steam Reforming	111
5.5.2	Hydrogen Production from Hydrocarbons	111
5.5.3	Hydrogen from Coal	113
5.5.4	Hydrogen from Water	115
5.5.5	Photocatalytic Hydrogen Production	119
5.5.6	Solar-Powered Hydrogen Generation	129
5.5.7	Hydrogen from Hydrogen Sulfide	130
5.6	Storage of Hydrogen	134
5.6.1	Hydrogen Storage with Metal Hydrides	136
5.6.2	Hydrogen Absorption/Desorption with Oxygen-Contaminated Boron Film	139
5.6.3	Hydrogen Storage with Carbon Structures	140
5.7	Hydrogen Storage Materials	141
5.7.1	Boron Hydrides as Metal Hydrides	142
5.7.2	Hydrogen in Mechanically Milled Amorphous Boron	143
5.7.3	Boron Complex Hydrides	143

5.8	Hydrogen Fuel for Internal Combustion Engine	145
5.8.1	Advantages of Hydrogen as an Engine Fuel	146
5.8.2	Disadvantages of Hydrogen as an Engine Fuel	147
5.9	Liquefaction and Compression of Hydrogen	148
5.9.1	Nanocatalytic Liquefaction of Hydrogen	149
	Summary	152
	References	153
<b>6</b>	<b>Biohydrogen</b>	<b>163</b>
6.1	Introduction	163
6.2	Definition	164
6.3	History	164
6.4	Hydrogen from Biorenewables via Biological Processes	166
6.4.1	Hydrogen Production via Microbial Fermentation of Biomass	170
6.4.2	Anaerobic Hydrogen Production	170
6.4.3	Biophotolytic Hydrogen Production	172
6.4.4	Dark Fermentative Hydrogen Production	174
6.5	Hydrogen from Biorenewables via Thermochemical Processes	176
6.5.1	Potential of Renewable Hydrogen Production	178
6.5.2	Production of Hydrogen from Biomass via Pyrolysis	179
6.5.3	Production of Hydrogen from Biomass via Gasification	186
6.5.4	Hydrogen from Biomass via Non-Conventional Processes	195
6.5.5	Hydrogen from Biomass Gasification by Steam Reforming	197
6.5.6	Hydrogen from Biomass via Air–Steam Gasification	199
6.5.7	Hydrogen from Biomass by Supercritical Water Gasification	202
6.5.8	Hydrogen-rich Gas from Shells via Supercritical Water Extraction	206
6.5.9	Production of Hydrogen from Mosses and Algae via Pyrolysis and Steam Gasification	208
	Summary	214
	References	214
<b>7</b>	<b>Fuel Cells</b>	<b>221</b>
7.1	Introduction	221
7.1.1	History of Fuel Cells	222
7.2	Fundamentals of a Fuel Cell	224
7.3	Different Types of Fuel Cells	226
7.3.1	Proton Exchange Membrane Fuel Cells (PEMFCs)	226
7.3.2	Direct Use of Methanol in Fuel Cells	228
7.3.3	Characteristics of Main Types of Fuel Cells	230
7.4	Catalysts Used in Fuel Cells	231
7.5	Use of Alternative Fuel in Fuel Cells	233

- 7.5.1 Biodiesel-Fueled Cells . . . . . 233
  - 7.6 Hybrid Electric Vehicles and Supercapacitors . . . . . 235
  - Summary . . . . . 237
  - References . . . . . 238
- 8 The Hydrogen Economy . . . . . 241**
  - 8.1 Introduction . . . . . 241
  - 8.2 Cost of Hydrogen . . . . . 243
  - Summary . . . . . 249
  - References . . . . . 250
- 9 Hydrogen Policy . . . . . 253**
  - 9.1 Introduction . . . . . 253
  - 9.2 Political, Environmental, and Economical Impacts of Hydrogen . . . 254
  - 9.3 Global Biofuel Projections . . . . . 257
  - Summary . . . . . 260
  - References . . . . . 260
- 10 Environmental Impacts of Hydrogen . . . . . 263**
  - 10.1 Introduction . . . . . 263
  - 10.2 Environmental Impacts of Hydrogen . . . . . 265
  - Summary . . . . . 268

Biohydrogen

For Future Engine Fuel Demands

Demirbas, A.

2009, XII, 276 p., Hardcover

ISBN: 978-1-84882-510-9
