Part I Fuzzy Control

1 Fuzzy Control of Large Civil Structures Subjected to Natural Hazards	3
Yeesock Kim, Stefan Hurlebaus and Reza Langari	
1.1 Introduction	4
1.1.1 Structural Vibration Control	4
1.1.2 Fuzzy Control Approaches in Large Civil Structures	4
1.2 Smart Control Device: MR Damper	5
1.3 Background Materials	6
1.3.1 Takagi-Sugeno Fuzzy Model	6
1.3.2 Sufficient Stability Condition of T-S Fuzzy Model	7
1.3.3 Parallel Distributed Compensation	7
1.4 LMI Formulation of Semiactive Nonlinear Fuzzy Control Systems	9
1.4.1 Stability LMIs of T-S Fuzzy Control Systems	9
1.4.2 Performance LMIs	10
1.4.3 State Estimator	12
1.4.4 Semiactive Converting Algorithm	13
1.5 Examples	14
1.5.1 Three-story Building Structure	15
1.5.2 Twenty-story Building Structure	17
1.6 Concluding Remarks	17
References	18
2 Approaches to Robust \mathcal{H}_∞ Controller Synthesis of Nonlinear Discrete-time-delay Systems via Takagi-Sugeno Fuzzy Models	21
Jianbin Qiu, Gang Feng and Jie Yang	
2.1 Introduction	21
2.2 Model Description and Robust \mathcal{H}_∞ Piecewise Control Problem ...	23

2.3	Piecewise \mathcal{H}_∞ Control of T-S Fuzzy Systems with Time-delay . . .	27
2.3.1	Delay-independent \mathcal{H}_∞ Controller Design	27
2.3.2	Delay-dependent \mathcal{H}_∞ Controller Design	31
2.4	Simulation Examples	40
2.5	Conclusions	46
	References	46
3	\mathcal{H}_∞ Fuzzy Control for Systems with Repeated Scalar Nonlinearities .	51
	Hongli Dong, Zidong Wang and Huijun Gao	
3.1	Introduction	51
3.2	Problem Formulation	53
3.2.1	The Physical Plant	53
3.2.2	Controller	54
3.2.3	Closed-loop System	55
3.3	\mathcal{H}_∞ Fuzzy Control Performance Analysis	56
3.4	\mathcal{H}_∞ Fuzzy Controller Design	58
3.5	An Illustrative Example	60
3.6	Conclusions	62
	References	64
4	Stable Adaptive Compensation with Fuzzy Cerebellar Model	
	Articulation Controller for Overhead Cranes	67
	Wen Yu and Xiaou Li	
4.1	Introduction	67
4.2	Preliminaries	69
4.3	Control of an Overhead Crane	72
4.4	Position Regulation with FCMAC Compensation	73
4.5	FCMAC Training and Stability Analysis	75
4.6	Experimental Comparisons	79
4.7	Conclusions	84
	References	84

Part II Neural Control

5	Estimation and Control of Nonlinear Discrete-time Systems	89
	Balaje T. Thumati and Jagannathan Sarangapani	
5.1	Background	90
5.1.1	Neural Networks	90
5.1.2	Stability Concepts	92
5.2	Estimation of an Unknown Nonlinear Discrete-time System	92
5.2.1	Introduction	92
5.2.2	Nonlinear Dynamical System	93
5.2.3	Identification Scheme	94
5.2.4	Neural Network Structure Design	96
5.2.5	Simulation Results	103

5.3	Neural Network Control Design for Nonlinear Discrete-time Systems	107
5.3.1	Introduction	107
5.3.2	Dynamics of MIMO Systems	109
5.3.3	Neural Network Controller Design	110
5.4	Simulation Results	121
5.5	Conclusions	123
	References	123
6	Neural Networks Based Probability Density Function Control for Stochastic Systems	125
	Xubin Sun, Jin Liang Ding, Tianyou Chai and Hong Wang	
6.1	Stochastic Distribution Control	125
6.1.1	Neural Networks in Stochastic Distribution Control	127
6.2	Control Input Design for Output PDF Shaping	133
6.3	Introduction of the Grinding Process Control	134
6.4	Model Presentation	135
6.4.1	Grinding Circuit	135
6.4.2	Grinding Process Dynamic Model	137
6.5	System Modeling and Control of Grinding Process	139
6.5.1	Control System Structure	139
6.5.2	PDF Modeling Using Basis Function	140
6.5.3	System Modeling and Control	142
6.6	System Simulation and Results	143
6.6.1	Simulation Parameters	143
6.6.2	Simulation Results	144
6.7	Conclusions	145
	References	147
7	Hybrid Differential Neural Network Identifier for Partially Uncertain Hybrid Systems	149
	Alejandro García, Isaac Chairez and Alexander Poznyak	
7.1	Introduction	149
7.2	Hybrid System	151
7.2.1	Representation	151
7.2.2	Uncertain Hybrid Systems	152
7.3	Hybrid DNN Identifier	153
7.3.1	Practical Stability of Hybrid Systems	153
7.3.2	Stability of Identification Error	154
7.4	Examples	156
7.4.1	Spring-mass System	156
7.4.2	Two Interconnected Tanks System	158
7.5	Conclusions	163
	Appendix	163
	References	167

8	Real-time Motion Planning of Kinematically Redundant Manipulators Using Recurrent Neural Networks	169
	Jun Wang, Xiaolin Hu and Bo Zhang	
8.1	Introduction	170
8.2	Problem Formulation	171
8.2.1	Critical Point Problem	171
8.2.2	Joint Velocity Problem: An Inequality-constrained Formulation	173
8.2.3	Joint Velocity Problem: An Improved Formulation	174
8.3	Neural Network Models	177
8.3.1	Model Selection	177
8.3.2	Model Comparisons	178
8.4	Simulation Results	181
8.5	Concluding Remarks	190
	References	191
9	Adaptive Neural Control of Uncertain Multi-variable Nonlinear Systems with Saturation and Dead-zone	195
	Mou Chen, Shuzhi Sam Ge and Bernard Voon Ee How	
9.1	Introduction	195
9.2	Problem Formulation and Preliminaries	198
9.2.1	Problem Formulation	198
9.2.2	Neural Networks	201
9.3	Adaptive Neural Control and Stability Analysis	201
9.4	Simulation Results	214
9.5	Conclusions	216
	Appendix 1	219
	Appendix 2	220
	References	220
Part III Fuzzy Neural Control		
10	An Online Self-constructing Fuzzy Neural Network with Restrictive Growth	225
	Ning Wang, Meng Joo Er and Xian Yao Meng	
10.1	Introduction	225
10.2	Architecture of the OSFNRRG	228
10.3	Learning Algorithm of the OSFNRRG	229
10.3.1	Criteria of Rule Generation	229
10.3.2	Parameter Adjustment	232
10.3.3	Complete OSFNRRG Algorithm	233
10.4	Simulation Studies	234
10.5	Conclusions	245
	References	246

11 Nonlinear System Control Using Functional-link-based Neuro-fuzzy Networks	249
Chin-Teng Lin, Cheng-Hung Chen and Cheng-Jian Lin	
11.1 Introduction	249
11.2 Structure of Functional-link-based Neuro-fuzzy Network	251
11.2.1 Functional Link Neural Networks	251
11.2.2 Structure of the FLNFN Model	253
11.3 Learning Algorithms of the FLNFN Model	255
11.3.1 Structure Learning Phase	256
11.3.2 Parameter Learning Phase	258
11.4 Simulation Results	260
11.5 Conclusion and Future Works	273
References	274
12 An Adaptive Neuro-fuzzy Controller for Robot Navigation	277
Anmin Zhu and Simon X. Yang	
12.1 Introduction	277
12.2 The Overall Structure of the Neuro-fuzzy Controller	281
12.3 Design of the Neuro-fuzzy Controller	283
12.3.1 Fuzzification and Membership Function Design	283
12.3.2 Inference Mechanism and Rule Base Design	285
12.3.3 Defuzzification	287
12.3.4 The Physical Meanings of Variables and Parameters	288
12.3.5 Algorithm to Tune the Model Parameters	289
12.3.6 Algorithm to Suppress Redundant Rules	290
12.3.7 State Memorizing Strategy	292
12.4 Simulation Studies	294
12.4.1 Off-line Training Phase to Tune Model Parameters	295
12.4.2 Off-line Training to Remove Redundant Rules	297
12.4.3 Effectiveness of the State Memory Strategy	299
12.4.4 Dynamic Environments and Velocity Analysis	300
12.5 Experiment of Studies	302
12.6 Summary	305
References	306

Part IV Intelligent Control

13 Flow Control of Real-time Multimedia Applications in Best-effort Networks	311
Aninda Bhattacharya and Alexander G. Parlos	
13.1 Introduction	311
13.2 Modeling End-to-end Single Flow Dynamics in Best-effort Networks	314
13.2.1 Definitions	314
13.2.2 Packet Loss Signal	315
13.2.3 Packet Delay Signal	316

13.2.4	Accumulation Signal	316
13.2.5	Linear State Space Modeling and End-to-end Flows	317
13.2.6	Deriving the State Equations of a Conservative Single Flow System	318
13.2.7	Deriving the Output/Masurement Equation of a Conservative Single Flow System	322
13.2.8	Summary of the State Space Equations for a Conservative Flow in a Best-effort Network	323
13.3	Proposed Flow Control Strategies	324
13.3.1	Simple Predictor	324
13.3.2	Flow Controllers	324
13.4	Description of the Network Simulation Scenarios	329
13.4.1	Simulated Network Topology for Validating the Performance of the Flow Control Strategies	330
13.4.2	Simulated Network Topology for Studying the Scalability of the Flow Control Strategies	332
13.5	Voice Quality Measurement Test: E-Model	336
13.6	Validation of Proposed Flow Control Strategies	338
13.6.1	Determining I_e Curves for Different Modes of the Ideal Codec	339
13.6.2	Calculation of the MOS to Determine QoS in the Simulations	340
13.6.3	Performance of the Flow Control Schemes in the Network Topology Used for Validation	340
13.6.4	Scalability of the Flow Control Strategies	344
13.7	Summary and Conclusions	351
