

Contents

1	The Societal Capacity to Commit Resources.....	1
1.1	Introduction	1
1.2	Resource Scarcity	3
1.3	Societal Capacity to Commit Resources (SCCR).....	4
1.4	Background	5
1.5	Risk in the Context of Human Development.....	7
1.6	Principles for Managing Risk	9
1.7	The Life Quality Index (LQI).....	11
1.8	Summary	13
	References.....	14
2	Social Indicators for Managing Risk.....	17
2.1	Social Indicators	17
2.1.1	The Human Development Index	18
2.2	The Life Quality Index	20
2.3	Rationale for Use of Life Expectancy and GDP	23
2.4	Quality Adjustment of Life Expectancy: The Real GDP per Capita	27
2.5	The LQI as a Tool for Managing Risk.....	28
2.6	How to Make Decisions About Life Risks	28
2.7	General Criterion of Acceptability	29
2.8	Societal Capacity to Commit Resources.....	30
2.9	Summary	33
	References.....	34
3	Judging Risks Using the Life Quality Method	37
3.1	Introduction	37
3.2	Benefit–Cost Analysis by the LQI Method	38

3.3	Illustrative Application.....	39
3.3.1	Context.....	39
3.3.2	Estimation of Change in Life Expectancy.....	40
3.3.3	Example Calculations	41
3.4	Discounting Models in LQI Method.....	45
3.4.1	Exponential Discounting Function.....	45
3.4.2	Hyperbolic Discounting Function	46
3.4.3	Quasi-hyperbolic Discounting Function	47
3.4.4	Illustration	47
3.5	Summary	49
	References.....	50
4	Air Quality Standards	51
4.1	Introduction	51
4.2	Canada-Wide Standards (CWS) on Air Quality	53
4.2.1	Scientific Context.....	53
4.2.2	Background to the Development of the Canada-Wide Standards.....	54
4.2.3	Approach Used to Set Air Pollution Standards.....	55
4.2.4	Limitations of the CWSDC Analysis	58
4.3	Applying LQI to the Air Pollution Case Study.....	60
4.3.1	Empirical Validation.....	63
4.3.2	Cost–Benefit Analysis of Pollution Control Options	64
4.4	Summary	67
	References.....	67
5	Nuclear Safety	69
5.1	Context	69
5.1.1	Justifiable Expenditure.....	70
5.1.2	Utility Function for Longevity	72
5.1.3	Discounting.....	73
5.1.4	Societal Capacity to Commit Resources	73
5.1.5	Illustrative Calculation.....	75
5.1.6	Empirical Validation	76
5.2	Applications to Risk of Ionizing Radiation Exposure	77
5.3	Application to Nuclear Safety Design Features.....	78
5.4	Conclusions	81
5.5	Summary.....	82
	References.....	82
6	Port Cities with High Exposure to Flood	85
6.1	Background	85
6.2	Data	86

6.3	Exposure Analysis and Assessment.....	88
6.4	Risk Assessment.....	90
6.5	Discussion	92
6.6	Summary	93
	References.....	93
7	Optimal Design of a Flood Protection Levee	95
7.1	Introduction	95
7.2	Discounting Risk and Cash Flow	97
7.3	Cross-Entropy Estimation.....	97
7.4	Flood Control Design Example	99
7.5	Summary	104
	References.....	104
8	Closure.....	107
8.1	Managing Risk Strategically	107
8.2	Principles for Managing Risk	109
8.3	Conclusions	110
	References.....	111
A	Derivation of LQI	113
A.1	Introduction	113
A.2	The Utility Function	114
A.3	Technical Concepts and Definitions	116
A.3.1	Elasticity of a Function	116
A.3.2	Indifference Curve	117
A.3.3	Marginal Rate of Substitution	118
A.3.4	Elasticity of Substitution	119
A.3.5	Remarks	119
A.4	The Role of GDP in LQI	120
A.4.1	Definition of GDP.....	120
A.4.2	Measurement of GDP.....	121
A.4.3	Expenditure Method.....	121
A.4.4	Income Method	121
A.4.5	GDP as an Indicator of Welfare	122
A.5	Production of GDP	123
A.5.1	Production Function.....	123
A.5.2	Key Assumptions of Production Economics.....	123
A.5.3	Economics of Labor–Leisure Trade Off	126
A.6	Derivation of the LQI	127
A.7	Summary	129
	References.....	129

Engineering Decisions for Life Quality

How Safe is Safe Enough?

Nathwani, J.; Pandey, M.D.; Lind, N.C.

2009, XVII, 189 p., Hardcover

ISBN: 978-1-84882-601-4
