<b>1</b>	<b>Introduction—The Group Concept</b>	<b>1</b>
<b>2</b>	<b>Elementary Group Properties</b>	<b>11</b>
2.1	Basic Definitions	11
2.2	Examples	17
2.3	Subgroups, Cosets and Lagrange’s Theorem	24
2.4	Normal Subgroups	30
2.5	Problems	34
<b>3</b>	<b>Group Construction and Representation</b>	<b>41</b>
3.1	Permutations	42
3.2	Permutation Groups	48
3.3	Matrix Groups	52
3.4	Group Presentation	55
3.5	Problems	59
<b>4</b>	<b>Homomorphisms</b>	<b>67</b>
4.1	Homomorphisms and Isomorphisms	69
4.2	Isomorphism Theorems	74
4.3	Cyclic Groups	79
4.4	Automorphism Groups	81
4.5	Problems	84
<b>5</b>	<b>Action and the Orbit–Stabiliser Theorem</b>	<b>91</b>
5.1	Actions	92
5.2	Three Important Examples	99
5.3	Problems	107
<b>6</b>	<b><math>p</math>-Groups and Sylow Theory</b>	<b>113</b>
6.1	Finite $p$ -Groups	114
6.2	Sylow Theory	119
6.3	Applications	126
6.4	Problems	131

<b>7</b>	<b>Products and Abelian Groups</b>	139
7.1	Direct Products	140
7.2	Finite Abelian Groups	146
7.3	Semi-direct Products	151
7.4	Problems	159
<b>8</b>	<b>Groups of Order 24, Three Examples</b>	165
8.1	Symmetric Group $S_4$	165
8.2	Special Linear Group $SL_2(3)$	172
8.3	Exceptional Group $E$	177
8.4	Problems	183
<b>9</b>	<b>Series, Jordan–Hölder Theorem and the Extension Problem</b>	187
9.1	Composition Series and the Jordan–Hölder Theorem	188
9.2	Extension Problem	196
9.3	Problems	205
<b>10</b>	<b>Nilpotency</b>	209
10.1	Nilpotent Groups	210
10.2	Fratini and Fitting Subgroups	217
10.3	Problems	223
<b>11</b>	<b>Solubility</b>	229
11.1	Soluble Groups	230
11.2	Hall’s Theorems and Solubility Conditions	236
11.3	Problems	243
<b>12</b>	<b>Simple Groups of Order Less than 10000</b>	249
12.1	Steiner Systems	250
12.2	Linear Groups	254
12.3	Unitary Groups	265
12.4	Mathieu Groups	267
12.5	Problems	270
<b>Appendices A to E</b>		277
A	Set Theory	277
B	Number Theory	284
C	Data on Groups of Order 24	289
D	Numbers of Groups with Order up to 520	293
E	Representations of $L_2(q)$ with Order $< 10000$	295
<b>Bibliography</b>		297
<b>Notation Index</b>		301
1—	Symbol Index	301
2—	Notation for Classes of Groups	303
3—	Notation for Individual Groups	304
<b>Index</b>		305

# Web Contents

<b>3</b>	<b>Group Construction and Representation</b> . . . . .	321
3.6	Representations of $A_5$	
3.7	Further Problems	
<b>4</b>	<b>Homomorphisms</b> . . . . .	331
4.6	The Transfer	
4.7	Group Presentation, Part 2	
4.8	Further Problems	
<b>5</b>	<b>Action and the Orbit–Stabiliser Theorem</b> . . . . .	351
5.4	Transitive and Primitive Permutation Groups	
5.5	Further Problems	
<b>6</b>	<b><math>p</math>-Groups and Sylow Theory</b> . . . . .	361
6.5	Applications 2—Burnside’s Normal Complement Theorem and Groups with Cyclic Sylow Subgroups	
6.6	Further Problems	
<b>7</b>	<b>Products and Abelian Groups</b> . . . . .	371
7.5	Infinite Abelian Groups—A Brief Introduction	
<b>9</b>	<b>Series, Jordan–Hölder Theorem and the Extension Problem</b> . . . . .	379
9.4	Schur–Zassenhaus Theorem	
9.5	Further Problems	
<b>12</b>	<b>Simple Groups of Order Less than 10000</b> . . . . .	387
12.6	Simple Groups of Order Less than 1000000, Iwasawa’s Lemma and a Method for generating Steiner Systems for some Mathieu Groups	
12.7	Further Problems	
<b>13</b>	<b>Representation and Character Theory</b> . . . . .	401
13.1	Representations and Modules	

13.2	Theorems of Schur and Maschke	
13.3	Characters and Orthogonality Relations	
13.4	Lifts and Normal Subgroups	
13.5	Problems	
<b>14</b>	<b>Character Tables and Theorems of Burnside and Frobenius</b>	<b>433</b>
14.1	Character Tables	
14.2	Burnside's $p^r q^s$ -Theorem	
14.3	Frobenius Groups	
14.4	Problems	
<b>Solution Appendix—Answers and Solutions,</b>		
	<b>Problems 2 to 12, A and B</b>	<b>461</b>
	Problem 2	461
	Problem 3	472
	Problem 4	481
	Problem 5	489
	Problem 6	497
	Problem 7	508
	Problem 8	515
	Problem 9	521
	Problem 10	524
	Problem 11	532
	Problem 12	538
	Problem A	544
	Problem B	545
