

Contents

Preface	vii
Introduction	ix
Part 1: Analysis on Fractals	
<i>A. Grigor'yan, J. Hu and K.-S. Lau</i>	
Heat Kernels on Metric Spaces with Doubling Measure	3
<i>V.A. Kaimanovich</i>	
Self-similarity and Random Walks	45
Part 2: Conformal Dynamics and Schramm-Loewner Evolution	
<i>G.F. Lawler</i>	
Multifractal Analysis of the Reverse Flow for the Schramm-Loewner Evolution	73
Part 3: Random Fractal Processes	
<i>D. Khoshnevisan</i>	
From Fractals and Probability to Lévy Processes and Stochastic PDEs	111
Part 4: Emergence of Fractals in Complex Systems	
<i>J.E. Steif</i>	
A Survey of Dynamical Percolation	145
<i>J. Blath</i>	
Measure-valued Processes, Self-similarity and Flickering Random Measures	175
<i>G. Miermont</i>	
Random Maps and Their Scaling Limits	197

Part 5: Iterated Function Schemes and Transformations of Fractals

<i>M.F. Barnsley</i>	
Transformations Between Fractals	227
<i>M. Furukado, S. Ito and H. Rao</i>	
Geometric Realizations of Hyperbolic Unimodular Substitutions	251
<i>M. Dekking</i>	
Random Cantor Sets and Their Projections	269
Appendix	285

Fractal Geometry and Stochastics IV
Bandt, C.; Mörters, P.; Zähle, M. (Eds.)
2009, X, 290 p., Hardcover
ISBN: 978-3-0346-0029-3
A product of Birkhäuser Basel
