## Part I Introduction

<b>1</b>	<b>Introduction: We Are Pattern-Seeking, Story-Telling Animals</b>	<b>3</b>
1.1	Advice: Do Both Patterns and Stories	5
1.2	We Can Also Analyze	7
1.3	Pictures, Words, and Numbers: In that Order	9
1.4	Analytical Thinking: I think I Can Help	10
1.4.1	Forecasting Is a Participant Sport	10
1.4.2	Tell Someone About It: It Will Help You More Than Them	11
1.5	What Now?	11
1.6	Preview: The Key Pattern	12
1.7	Data Sources	12
1.7.1	Updated Displays	13
1.8	Appendix: Statistical Science Is Severely Limited in Its Applicability	13
1.8.1	Was that 1969 Draft Lottery Random? Was It Fair?	13
1.9	Conclusion	16

## Part II Four Key Variables: Growth, Unemployment, Inflation and Interest Rates

<b>2</b>	<b>Gross Domestic Product</b>	<b>19</b>
2.1	Definitions	19
2.1.1	GDP Is an Imperfect Measure of Economic/ Material Success	19
2.1.2	What Do Those Three Letters Stand For?	22
2.1.3	What's "Gross" About Gross Domestic Product?	24
2.1.4	What's "Real" About "Real GDP" and What Is "Nominal" About "Nominal GDP"?	24

2.1.5	What Does SAAR Mean? . . . . .	27
2.1.6	What Is an Annualized Compound Rate of Growth? . . . . .	28
2.2	What Does Real GDP Look Like? . . . . .	28
2.2.1	Does a Logarithmic Scale Help? The Narrow Corridor of US GDP Growth . . . . .	28
2.2.2	Four Pictures: What Does Growth of Real GDP Look Like? . . . . .	30
2.2.3	How Much Is \$10 Trillion? Does Dividing by Employment Help? . . . . .	34
	Appendix: The Index Number Problem and Chain Indexes . . . . .	35
	Appendix: The Seasonal in GDP Is Very Large . . . . .	36
<b>3</b>	<b>The Components of GDP: <math>C + I + G + X - M</math> . . . . .</b>	<b>39</b>
3.1	How Might GDP Be Measured? . . . . .	39
3.1.1	National Income and Employee Compensation . . . . .	40
3.2	How Is GDP Actually Measured? . . . . .	42
3.3	How Big Are the Components: $C, I, G, X - M$ ? . . . . .	44
3.3.1	Which Are the Most Volatile Components of GDP? . . . . .	45
	Appendix: GDP and National Income . . . . .	49
	Appendix: Answer to Footnote Question . . . . .	49
	Appendix: A Better Way to Treat Imports and Exports . . . . .	49
<b>4</b>	<b>Employment . . . . .</b>	<b>51</b>
4.1	Labor Market Surveys . . . . .	51
4.1.1	CES: Current Employment Statistics . . . . .	52
4.1.2	CPS: Current Population Survey . . . . .	56
4.1.3	Initial Jobless Claims . . . . .	59
4.2	Industry Composition of Payroll Jobs . . . . .	62
	Appendix: Which to Rely on: Business-Reported Payroll Jobs or Household-Reported People-at-Work . . . . .	62
<b>5</b>	<b>Inflation and Interest Rates . . . . .</b>	<b>65</b>
5.1	A Price Is a Ratio . . . . .	66
5.2	The Consumer Price Index (CPI) . . . . .	66
5.3	Two Views of Inflation . . . . .	67
5.3.1	Homework . . . . .	69
5.4	Interest Rates on Short-Term US Government Securities . . . . .	70
5.5	The Real Interest Rate: The Price of Durability and the Compensation for Waiting . . . . .	72
5.5.1	A Look at the Data . . . . .	73
5.6	Interest Rates on Long-Term US Government Securities and Monetary Policy . . . . .	74
5.6.1	The Term Structure of Interest Rates: Theory . . . . .	76
5.6.2	Real Returns on One-Year and Two-Year Treasuries . . . . .	80

5.7	What Determines the Shape of the Yield Curve? . . . . .	82
5.7.1	Why Is the Yield Curve Generally Upward Sloping? . . . . .	82
5.7.2	Why Is the Yield Curve Sometimes Steep and Sometimes Inverted? . . . . .	83
5.7.3	What Determines the Level (Not the Slope) of the Yield Curve? . . . . .	85
	Appendix: Q and A from BLS Web Site Regarding the CPI . . . . .	86
	Appendix: Risk Characteristics of Bonds . . . . .	88
	Summary . . . . .	90
<b>6</b>	<b>Extrapolative Forecasting . . . . .</b>	<b>91</b>
6.1	Regression Toward the Mean . . . . .	91
6.2	Forecasting and Regression Toward the Mean . . . . .	94
6.3	Persistence, Momentum . . . . .	96
6.4	Pictures that Help to Understand the Numbers . . . . .	99
6.5	Stories that Help to Understand the Numbers . . . . .	99
 <b>Part III A Recession Symptoms</b>		
<b>7</b>	<b>Unwanted Idleness: Recessions and Recoveries . . . . .</b>	<b>103</b>
7.1	Worker Idleness: Unemployment . . . . .	104
7.1.1	The NBER Definition of a Recession Isn't So Great . . . . .	104
7.1.2	Identifying the Recessions in the Unemployment Data Is Child's Play . . . . .	105
7.2	Capital Idleness: Capacity Utilization in Manufacturing . . . . .	107
7.3	Work Intensity: Hours per Week in Manufacturing . . . . .	108
7.4	Five Episodes: Normal Growth, Sputters, Spurts, Recessions and Recoveries . . . . .	109
<b>8</b>	<b>Recession Comparison Charts . . . . .</b>	<b>111</b>
8.1	Recession Comparisons: Employment and Output . . . . .	111
8.1.1	Payroll Employment . . . . .	111
8.1.2	Real GDP . . . . .	113
8.2	Idleness . . . . .	115
8.2.1	Household Unemployment Rate . . . . .	115
8.2.2	Capacity Utilization in Manufacturing . . . . .	116
8.2.3	Hours per Week in Manufacturing . . . . .	117
8.3	Other Indicators . . . . .	118
8.3.1	Industrial Production . . . . .	118
8.3.2	Employment in Manufacturing and Construction . . . . .	119
8.4	Numbers . . . . .	121

<b>9 Who Struggles and Who Does Well in Recessions?</b>	123
9.1 Job Losses in Recessions Affect Some Sectors	
More than Others	124
9.1.1 The 2001 Recession Was an Anomaly	130
9.1.2 With that Anomalous 2001 Recession, What Will the Next Recession Be Like?	132
9.2 Many Sectors Lose Profits in Recessions	133

## Part III B Recession Stories

<b>10 Idleness Stories</b>	139
10.1 How Do Economists Explain Unwanted Idleness?	140
10.1.1 The Job Cycle Is Mostly Construction and Manufacturing	143
10.2 Broken Relationships	143
10.3 Soaking the Rich When Times Are Bad	146
10.4 Making Do with the Old Car	149
10.5 A Pyrrhic Victory of Hope Over Reason	150
Appendix: Supply and Demand Models of Unemployment	152
<b>11 Cycle Stories</b>	155
11.1 The Harrod-Samuelson Multiplier-Accelerator Model	158
11.2 Some Acceleration Facts	160
11.3 The Supply Chain Bull-Whip	162
11.4 Rush to Exploit New Ideas	164
11.4.1 The Intensive Margin and the Extensive Margin	164
11.4.2 The Simple Agronomy of an Idea Rush	167
11.4.3 Kondratieff Long Waves	169
11.5 Ponzi Schemes and Asset Bubbles	170
11.5.1 Housing Bubbles	171

## Part III C Recession Early Warning Signs

<b>12 Clues: Temporal Ordering of Components of GDP</b>	175
12.1 Help from Sherlock Holmes	176
12.2 Contributions to GDP Growth	177
12.2.1 Normal Trend Contributions to GDP Growth	180
12.2.2 Abnormal Cumulatives	182
12.3 Average Temporal Orderings: It's a Consumer Cycle, Not a Business Cycle	183
12.4 Eight Consumer Cycles, a Disarmament Downturn, and an Internet Rush Comeuppance	186
12.4.1 The 1953 Department of Defense Downturn	190
12.4.2 The 2001 Internet Comeuppance	191
12.5 Housing False Positives and False Negatives	195

12.6	A Story of the Consumer Cycle: Our Collective Bipolar Disease .....	196
12.7	Numbers, If the Pictures Are Not Enough .....	197
12.7.1	Regression Analyses to Support What the Pictures Say ...	197
12.7.2	A Summary Table .....	199
12.8	Summary .....	201
	Appendix: Normal Contributions in Three Episodes .....	201
<b>13</b>	<b>More Clues: Episodic Forecasting with Components of Conference Board's Index of Leading Indicators .....</b>	<b>203</b>
13.1	Components of the Leading Indicator Index .....	203
13.2	Forget that Expectations Variable .....	205
13.3	Only a Few of Those Components Predict Oncoming Recessions .....	207
13.4	Combining the Components into an Overall Index .....	211
	Appendix: Description of Leading Indicators .....	214
 <b>Part III D Recession Causes</b>		
<b>14</b>	<b>The Art of Drawing Causal Inferences from Nonexperimental Data ..</b>	<b>219</b>
14.1	Post Hoc Ergo Propter Hoc .....	219
14.2	Cause = Intervention .....	221
14.2.1	Our Hypothetical Interventions Are Very Few .....	222
14.3	There Are Many Roadblocks in the Way of Causal Inferences .....	223
14.3.1	We Can Pretend to Draw Causal Inferences, Even If We Cannot Do It .....	225
14.4	Use Biological, Not Mechanical Metaphors .....	226
<b>15</b>	<b>In Search of Recession Causes .....</b>	<b>231</b>
15.1	What Are We Looking for? .....	232
15.2	Fiscal Policy Seems to Both Cause and Prevent Recessions .....	235
15.2.1	The Department of Defense Is Implicated in the 1953 and 1969 Downturns .....	235
15.2.2	Federal Taxation Might Matter .....	238
15.3	The Causal Path Through Houses and Cars .....	239
15.3.1	Housing Predicts Recessions .....	240
15.3.2	Consumer Durables Spending Predicts Recessions .....	242
15.3.3	Housing and Consumer Durables Are Predicted by Interest Rates .....	244
15.3.4	Not So Fast .....	246
15.3.5	The Fed Raises Short-Term Interest Rates at the Ends of Expansions .....	248
15.3.6	Spillovers from Housing: The Wealth Effect or Not? .....	254
15.3.7	Two Stories of How Monetary Policy Causes Recessions ..	255

Appendix: Two More “Causes” . . . . .	258
Oil Price Increases Preceded Some of the Recessions . . . . .	258
Weakness in Exports Has Not Caused US Recessions . . . . .	258

## **Part IV Expansions: With and Without Spurts**

### **16 The Life Cycle of US Expansions:**

<b>Sputters and Spurts</b> . . . . .	263
16.1 Production and Employment During Expansions . . . . .	264
16.1.1 Real GDP Grows During Economic Expansions . . . . .	264
16.1.2 Labor Markets Sometimes Tighten Twice During Expansions . . . . .	266
16.1.3 Cycles in Hours and Unemployment . . . . .	267
16.1.4 Spurt Comparison Graphs . . . . .	273
16.2 What Caused the Spurts? . . . . .	274
16.2.1 A Big Fiscal Stimulus Has Three Times Rejuvenated a Sputtering Economy . . . . .	275
16.2.2 The Reagan Spurt Was Helped by Falling Interest Rates, Falling Oil Prices and a Falling Value of the Dollar (Which Stimulated Exports) . . . . .	277
16.2.3 Animal Spirits and the Mad Dash for the Web Drove the Clinton Spurt . . . . .	279
Appendix: Presidents and Fed Chairmen . . . . .	280

## **Part V The Longer Run: Savings, Investment, Government Borrowing, Foreign Lending and Your Home**

<b>17 Savings and Investment</b> . . . . .	283
17.1 The NIPA Definition of Savings: It Is Not What You Think . . . . .	283
17.1.1 Investments Are New Homes, New Offices, New Factories, and New Equipment . . . . .	283
17.1.2 Flows and Not Stocks . . . . .	284
17.1.3 Savings Depends on What Consumption Is . . . . .	285
17.2 Do We Save Enough? . . . . .	288
17.2.1 US Savings in 2004 . . . . .	288
17.2.2 How Much Should We Save? . . . . .	288
17.2.3 Do We Save Enough? . . . . .	290
17.3 Another Important Accounting Identity: Savings = Investment . . . . .	291
17.3.1 US Savings and Investment . . . . .	292
17.3.2 What If There Is a Big Tax Cut and Public Savings Declines? . . . . .	295
17.4 Crowding Out, Ricardian Equivalence, or Twin Deficits in the 1990s? . . . . .	297

<b>18 Government</b>	299
18.1 Government Purchases of Goods and Services Are Not as Great as You Think	299
18.2 It's Transfers	300
18.2.1 Transfers Are Done also by State Governments	302
18.2.2 Those Transfers Are Mostly Social Security, Medicare, and Medicaid	303
18.2.3 The States Do Not Run Deficits	305
18.3 An Accounting Scandal to Rival Enron: Phantom Assets Created by Government Borrowing	305
18.4 The Outstanding Federal Debt Is Great Enough to Be Worrisome	307
18.5 The Real Effect of the Federal Deficit: Trickle-Down Social Responsibilities	308
18.5.1 Being a "Grown-Up"	309
18.5.2 The Debate over the Privatization of Social Security Is Confusing All of Us	310
<b>19 The External Deficit and the Value of the Dollar Hu's in Charge?</b>	313
19.1 An Important Accounting Identity: The Current Account = The Capital Account	314
19.2 What Determines the Value of the Dollar and the External Deficit?	318
19.2.1 The Exchange Rate	318
19.2.2 The Real Exchange Rate	319
19.2.3 The Demand and Supply of US Dollars	321
19.2.4 US Deficits: Good or Bad?	322
19.3 How Can the US External Deficit Close?	323
19.3.1 Capital Account Adjustment: Foreign Investors Go Elsewhere	325
19.3.2 Capital Account Adjustment: More US Savings	326
19.3.3 Current Account Adjustment: Barriers Against Imports	326
<b>20 The Ups and Downs of Real Estate Values</b>	329
20.1 Household Assets and Liabilities	329
20.2 It Is Not Real Until You Realize It	332
20.3 What Determines the Price and What Determines the Value of Your Home?	335
20.3.1 The Rental Market and the Ownership Market	335
20.3.2 Do not Confuse the Rental Market and the Ownership Market	336
20.3.3 Survivor Investing Can Temporarily Disconnect Earnings and Valuations	337
20.3.4 Survivor Investing Requires a Good Story	337

20.3.5	Fundamental Valuation Depends on the Growth of Earnings and the Discount Rate . . . . .	339
20.3.6	A House Has a p/e Ratio, Too . . . . .	341
20.3.7	The p/r Ratios in US Cities . . . . .	341
20.4	Some Realities of a Very Imperfect Ownership Market: The Very Persistent Gap Between Values and Prices . . . . .	343
20.4.1	Home Appraisals: Bob's \$1 Million Tie . . . . .	343
20.4.2	Hormones and Housing: It's a Volume Cycle Not a Price Cycle . . . . .	344
	Appendix: Homework re the LA Market . . . . .	349
	Appendix: Home Ownership Data from the Survey of Consumer Finances . . . . .	350
	Appendix: Rents or Asset Prices in the CPI? . . . . .	351
	Owner-Equivalent Rent . . . . .	351
	Appendix: There Is no Such Thing as a Housing Shortage . . . . .	352
	Supply Restrictions Do not Guarantee that Prices Can Only Go Up . . . . .	353
<b>Index</b>	. . . . .	<b>355</b>
