Preface to the English Edition	V
Preface to the Russian Edition	VII
1 On Superconductivity and Superfluidity (What I Have and Have Not Managed to Do), As Well As on the ‘Physical Minimum’ at the Beginning of the 21st Century^{1*}	1
1.1 Introduction	1
1.2 A Brief Account of My Activity in the Field of Superconductivity, Prior to the Advent of High-Temperature Superconductors	2
1.3 On High-Temperature and Room-Temperature Superconductors (HTSCs and RTSCs)	10
1.4 Thermoelectric Phenomena in the Superconducting State	15
1.5 Superfluidity Research and the Ψ -Theory of Superfluidity	21
1.6 The ‘Physical Minimum’: What Problems of Physics and Astrophysics Seem Now to be Especially Important and Interesting in the Beginning of the 21st Century?	27
1.7 Notes	31
References	31
2 Superconductivity and Superfluidity (What was Done and What was Not Done)^{1*}	35
2.1 Introduction. Early Works	35
2.2 The Ψ -Theory of Superconductivity (The Ginzburg–Landau Theory)	38
2.3 The Development of the Ψ -Theory of Superconductivity	50
2.4 The Ψ -Theory of Superfluidity	59
2.5 Thermoelectric Phenomena in Superconductors	65
2.6 Miscellanea (Superfluidity, Astrophysics, and Other Things) ..	71
2.7 High-Temperature Superconductivity	74

2.8	Concluding Remarks	83
2.9	Notes	85
	References	87
3	A Few Comments on Superconductivity Research	99
3.1	Part I	99
3.2	Part II	106
	References	109
4	On the Theory of Superconductivity	
	(by V.L. Ginzburg and L.D. Landau)	113
4.1	Introduction	113
4.2	Basic Equations	115
4.3	The Superconducting Half-Space	121
4.4	The Surface Energy at the Boundary of the Superconducting and Normal Phases	124
4.5	Superconducting Plates (Films)	127
4.6	Comments on the Present Edition	135
	References	137
5	‘Nobel’ Autobiography (A Supplement to the Nobel Lecture, 2003)	139
	Notes on the English Translation	166
6	A Scientific Autobiography: An Attempt	175
6.1	Introduction	175
6.2	Classical and Quantum Electrodynamics	176
6.3	Radiation by Uniformly Moving Sources (the Vavilov– Cherenkov and Doppler Effects, Transition Radiation, and Related Phenomena)	178
6.4	About This Chapter	181
6.5	Higher Spins	183
6.6	The Propagation of Electromagnetic Waves in Plasmas (in the Ionosphere). Radio Astronomy	185
6.7	Cosmic-Ray Astrophysics. Gamma-Ray Astronomy. Selected Astrophysical Results	188
6.8	Scattering of Light. Crystal Optics with Spatial Dispersion Taken into Account	190
6.9	The Theory of Ferroelectric Phenomena. Soft Modes. The Limits of Applicability of the Landau Theory of Phase Transitions	191
6.10	The Superfluidity of Helium II Near the Lambda Point. Other Publications on Superfluidity	195
6.11	The Theory of Superconductivity	199
6.12	Concluding Remarks	204

6.13 Notes	206
References	209
A Vitaly L. Ginzburg: A Bibliometric Study	
by Manuel Cardona and Werner Marx	217
A.1 Introduction	217
A.2 The WoS Search Modes	218
A.3 The Scientific Output	218
A.4 The Informal Citations	220
A.5 The Overall Citation Impact	221
A.6 The Impact of Single Publications	222
A.7 The Citations of Ginzburg's Books	224
A.8 The Citation Ranking	226
A.9 The Hirsch-Index h	227
A.10 Concluding Remarks	230
Note Added in Proof	231
References	232

On Superconductivity and Superfluidity

A Scientific Autobiography

Ginzburg, V.L.

2009, XII, 232 p., Hardcover

ISBN: 978-3-540-68004-8
