Detailed Table of Contents

Preface	v
Contents Overview	vii
1 Introduction	1
1.1 Health – a Priceless Commodity?	1
1.2 The Micro- and Macroeconomic Views of Health	3
1.2.1 A Simplified Microeconomic View of Health	3
1.2.2 Health Care at the Macroeconomic Level	6
1.2.3 A Critique of Global Budgeting	7
1.3 ‘Economics of Health’ vs. ‘Economics of Health Care’	10
1.3.1 Economics of Health	10
1.3.2 Health and the Use of Health Care Services	11
1.3.3 Economics of Health Care	11
1.4 A System Analysis of the Economics of Health and Health Care ...	12
1.5 Summary	15
2 Economic Valuation of Life and Health	17
2.1 Introduction	17
2.2 Approaches to the Economic Evaluation of Health	18
2.3 Cost-Utility Analysis	25
2.3.1 Concepts of Utility Measurement	25

2.3.2	The QALY Concept	26
2.3.2.1	Calculating QALYs	26
2.3.2.2	Decision-Theoretic Foundation	28
2.3.2.3	QALYs and Consumption	32
2.3.2.4	Aggregation of QALYs and Collective Decision-Making	34
2.3.3	Evaluating Health States	36
2.3.3.1	Rating Scale	36
2.3.3.2	Time Trade-Off.....	36
2.3.3.3	Standard Gamble	38
2.4	Cost-Benefit Analysis	40
2.4.1	Ethical Objections and Counterarguments.....	40
2.4.1.1	Objections Against Weighing Life Against Money	40
2.4.1.2	Arguments Against a Finite Value of Life	42
2.4.2	The Human-Capital Approach	43
2.4.3	The Willingness-To-Pay Approach.....	45
2.4.4	Aggregating Willingness To Pay and Principles of Collective Decision-Making	47
2.4.4.1	Cost-Benefit Analysis and the Potential Pareto Criterion	48
2.4.4.2	Cost-Benefit Analysis with Many Interventions ...	49
2.4.4.3	Cost-Benefit Analysis and Social Welfare Analysis	49
2.4.5	Measuring Willingness To Pay: Using Surveys.....	54
2.4.5.1	General Problems of Surveys	54
2.4.5.2	The Contingent Valuation Method	55
2.4.5.3	Discrete Choice Experiments	58
2.4.6	Measuring Willingness to Pay: Using Market Data	61
2.5	Cost-Utility, Cost-Benefit and Social Welfare Analysis	63
2.5.1	Comparing Cost-Utility and Cost-Benefit Analysis	63
2.5.2	Social Welfare and QALYs	66
2.6	Summary	69
2.7	Further Reading.....	70
2.E	Exercises	71

3	Individuals as Producers of Their Health	75
3.1	Introduction	75
3.2	The Concept of Health Production	77
3.3	Health as Part of Human Capital	79
3.3.1	A Simplified Grossman Model	79
3.3.2	The Demand for Health and Medical Services	83
3.3.2.1	The Structural Demand Function for Medical Services	83
3.3.2.2	The Demand Functions in the Investment Model	84
3.3.2.3	The Demand Functions in the Consumption Model	85
3.3.3	Preliminary Assessment of the Grossman Model	86
3.4	The Production of Health as the Modification of a Stochastic Process	89
3.4.1	Conditional Health Production Functions	89
3.4.2	Short-run Optimization and Willingness to Pay for Health	91
3.4.3	A Model with State-Dependent Production Possibilities: The Short Term	94
3.4.3.1	State-Dependent Optimization of a Stochastic Process	94
3.4.3.2	The Elements of the Model	96
3.4.3.3	Conditional Short-term Production Frontiers	98
3.4.3.4	Alleged Instability of Health Behavior	101
3.4.4	State-Dependent Production Possibilities: The Longer Run	103
3.4.4.1	The Longer-Run Trade-Off Given Good Health	104
3.4.4.2	The Longer-Run Trade-Off Given Bad Health	106
3.4.5	Complementarity or Substitutability in the Production of Health?	107
3.4.5.1	Significance of the Issue	107
3.4.5.2	Substitutability in the Healthy State	108
3.4.5.3	Complementarity in the Sick State	109
3.5	Summary	109
3.6	Further Reading	110
3.A	Appendix to Chapter 3	111
3.E	Exercises	118

4	Empirical Studies of the Production of Health	119
4.1	Introduction	119
4.2	Studies Based on Aggregate Data	121
4.2.1	Mortality Rates and Life Expectancy as Measures of Output?	121
4.2.2	Marginal Productivity of a Health Care System	122
4.2.2.1	Early Evidence from the United States	122
4.2.2.2	Recent Evidence from the United States	127
4.2.2.3	Evidence from Industrialized Countries	129
4.2.2.4	Evidence from a Comparison of Two Neighboring Areas	131
4.2.2.5	Evidence from a Developing Region (Sub-Saharan Africa)	132
4.2.3	Marginal Productivity of Selected Medical Interventions	135
4.2.4	Environmental Determinants of Health Status	136
4.2.5	Economic Instability and Health	137
4.3	Studies Based on Individual Data	140
4.3.1	Measurement of Health Status	140
4.3.2	Marginal Productivity of Medical Infrastructure at the Individual Level	141
4.3.3	The Productivity of Medical Interventions at the Individual Level	142
4.3.4	Environmental Quality and the State of Health	143
4.3.4.1	Air Quality and Smoking as Exogenous Factors	143
4.3.4.2	Smoking as an Endogenous Factor	146
4.4	Demand for Health, Demand for Health Services	148
4.5	Summary	152
4.6	Further Reading	152
4.E	Exercises	153
5	Health Goods, Market Failure and Justice	155
5.1	Introduction	155
5.2	Market Failure in Markets for Health Goods	157
5.2.1	Externalities and the Problem of Public Goods	157
5.2.2	Option-Good Property of Medical Services	159

5.2.3	Lack of Consumer Sovereignty	160
5.2.3.1	Incapability of Rational Decision Making	160
5.2.3.2	Excess Discounting of Future Needs	161
5.2.4	Lack of Perfect Information in Markets for Health Goods ..	161
5.3	Market Failure in Health Insurance Markets	163
5.3.1	The Basic Model	163
5.3.2	The Free-Rider Problem	166
5.3.3	Asymmetric Information in the Health Insurance Market ...	171
5.3.3.1	Risk Types	171
5.3.3.2	Market Equilibrium under Symmetric Information	172
5.3.3.3	Market Equilibrium under Asymmetric Information	173
5.3.3.4	Welfare-Enhancing Government Intervention in Insurance Markets	176
5.3.3.5	Alternative Equilibrium Definitions	178
5.3.4	Premium Risk	180
5.3.4.1	Pure-Market Solutions	181
5.3.4.2	Community Rating as a Solution	185
5.3.4.3	Comparing the Solutions	187
5.4	Justice as an Argument in Favor of Government Intervention in Health Care	189
5.4.1	Willingness and Ability to Pay and Access to Health Care ..	189
5.4.2	Congenital Differences in Health and Access to Health Insurance	192
5.4.2.1	Redistribution and the Veil of Ignorance	192
5.4.2.2	Implementing Cross-Subsidies between High and Low Risks	193
5.5	Rationing of Health Care Services	194
5.5.1	The Concept of Rationing	195
5.5.2	Types of Primary Rationing	196
5.6	Summary	198
5.7	Further Reading	199
5.E	Exercises	200

6	Optimal Health Insurance Contracts	203
6.1	Introduction	203
6.2	Types of Health Insurance Contracts	205
6.3	Optimal Insurance Protection in the Absence of Moral Hazard	208
6.3.1	Financial Consequences of Illness Only	208
6.3.1.1	A Model with Two Health States	209
6.3.1.2	A Model with an Arbitrary Number of Health States	215
6.3.2	Direct Utility Effects of Illness	221
6.3.3	Summary	224
6.4	Optimal Insurance Coverage with Moral Hazard	224
6.4.1	Ex-Ante Moral Hazard	224
6.4.1.1	Assumptions	224
6.4.1.2	Optimal Prevention without Insurance	226
6.4.1.3	The Optimum with Observable Prevention	227
6.4.1.4	The Optimum with Unobservable Prevention	228
6.4.1.5	Implications	232
6.4.1.6	Empirical Evidence on Ex-Ante Moral Hazard	232
6.4.2	Ex-Post Moral Hazard	233
6.4.2.1	Assumptions	233
6.4.2.2	Optimal Insurance Coverage with Observable State of Health	235
6.4.2.3	Optimal Insurance Coverage with Unobservable State of Health	237
6.4.2.4	Implications	241
6.4.2.5	The Empirical Relationship Between Insurance Coverage and the Demand for Health Care Services	242
6.5	Consequences for the Design of Social Health Insurance	244
6.6	Summary	246
6.7	Further Reading	247
6.A	Appendix	248
6.E	Exercises	250

7	Risk Selection in Health Insurance Markets	253
7.1	Introduction	253
7.2	Modeling Risk Selection	255
7.2.1	Direct Risk Selection	255
7.2.2	Indirect Risk Selection	257
7.2.2.1	Indirect Risk Selection Using the Quantity of Benefits	259
7.2.2.2	Risk Selection Using the Structure of Benefits	270
7.3	Further Arguments in Favor of Risk Adjustment and Cost Reimbursement	276
7.3.1	Fair Competition in the Health Insurance Market	277
7.3.2	Stabilization of the Health Insurance Market	277
7.4	Designing Risk Adjustment Schemes	278
7.4.1	An Overview of Risk Adjusters	278
7.4.2	Costs and Payment Flows	280
7.4.3	Calculating Risk Adjustment Payments	282
7.4.3.1	The Statistical Approach to Risk Adjustment	282
7.4.3.2	The Incentive Approach to Risk Adjustment	283
7.5	Designing Cost Reimbursement Schemes	284
7.5.1	The Basis of Cost Reimbursement	285
7.5.2	The Structure of Cost Reimbursement	285
7.5.3	Findings of Empirical Studies	286
7.6	Summary	287
7.7	Further Reading	289
7.E	Exercises	290
8	Physicians as Suppliers of Medical Services	293
8.1	Introduction	293
8.2	The Relationship Between Physician Density and the Utilization of Medical Services	294
8.3	The Hypothesis of Supplier-Induced Demand for Ambulatory Medical Services	295

- 8.4 Utility Maximization of the Physician and Supplier-Induced Demand 298
 - 8.4.1 A Model of Physician Behavior 298
 - 8.4.2 Increasing Physician Density 300
 - 8.4.3 Increasing Fee Level 304
- 8.5 Physician Density and Utilization of Medical Services: Alternative Explanations 304
- 8.6 Empirical Examination of the Supplier-Induced Demand Hypothesis 306
 - 8.6.1 Physician Density and Volume of Services 306
 - 8.6.2 Regulated Fees and Volume of Services 307
- 8.7 Summary 308
- 8.8 Further Reading 309
- 8.E Exercises 309

- 9 Hospital Services and Efficiency 311**
 - 9.1 Introduction 311
 - 9.2 The Hospital as a Productive Unit 312
 - 9.2.1 Hospital Output: Health as a Latent Variable 312
 - 9.2.2 The Multi-Stage Character of Production in the Hospital ... 313
 - 9.2.3 The Heterogeneity of Hospital Output 317
 - 9.3 Comparing Hospital Efficiency 318
 - 9.3.1 Regulation and Asymmetric Information..... 318
 - 9.3.2 Hospital Cost Functions..... 319
 - 9.3.3 Data Envelopment Analysis 322
 - 9.3.3.1 Introduction..... 322
 - 9.3.3.2 Comparing the Efficiency of Swiss Hospitals 324
 - 9.3.4 Potential and Limits of Efficiency Measurement 328
 - 9.4 Summary 328
 - 9.5 Further Reading 329
 - 9.E Exercises 329

- 10 Paying Providers 331**
 - 10.1 Introduction 331
 - 10.2 Paying Providers to Achieve Cost Control 333
 - 10.2.1 The Principle of Full Cost Responsibility 333

10.2.1.1	The Basic Model	333
10.2.1.2	The First-Best Payment System	334
10.2.1.3	Implementing the First-Best Solution	336
10.2.2	Paying Risk-Averse Providers	338
10.2.2.1	Contractible Effort to Control Costs	338
10.2.2.2	Noncontractible Effort to Control Costs	340
10.2.3	Casemix and Information Rent	344
10.2.3.1	Symmetric Information about Casemix	344
10.2.3.2	Asymmetric Information about Casemix	344
10.3	Concerns Beyond Cost Control	348
10.3.1	Quality of Treatment	348
10.3.1.1	Extending the Basic Model	348
10.3.1.2	Verifiable Quality or Treatment Outcomes	350
10.3.1.3	Unverifiable Quality and Treatment Outcomes	351
10.3.2	Patient Selection	355
10.3.2.1	Extending the Basic Model	356
10.3.2.2	Symmetric Information about Patients' Cost Types	358
10.3.2.3	Asymmetric Information about Patients' Cost Types	359
10.4	Implications for the Design of Payment Systems	363
10.4.1	General Considerations	363
10.4.2	Paying Physicians	365
10.4.2.1	Overview of Payment Systems	365
10.4.2.2	Optimal Physician Payment	366
10.4.3	Paying Hospitals	368
10.4.3.1	Overview of Payment Systems	368
10.4.3.2	Optimal Hospital Payment	368
10.4.3.3	Hospital Payment Based on Diagnosis Related Groups	370
10.5	Summary	371
10.6	Further Reading	372
10.A	Appendix	372
10.E	Exercises	374

11	Forms of Delivery of Medical Care	379
11.1	Introduction	379
11.2	The Physician as the Patient's Agent	382
11.3	Complementary Principal-Agent Relationships in Health Care	384
11.3.1	The Employer as Complementary Agent	384
11.3.2	The Government as Complementary Agent	384
11.3.2.1	National Health Service	385
11.3.2.2	National Health Insurance	385
11.3.3	Private Health Insurers as Complementary Agents	386
11.4	The Managed Care Organization as an Alternative Form of Provision of Care	387
11.4.1	The Managed Care Organization as a Complementary Agent	387
11.4.2	Cost Advantages of Managed Care	388
11.4.3	Cost Effects of Managed Care Organizations at the System Level	390
11.4.4	Final Assessment of Managed Care Organizations	395
11.5	Summary	396
11.6	Further Reading	396
11.A	Appendix	397
11.E	Exercises	400
12	The Market for Pharmaceuticals	401
12.1	Introduction	401
12.2	The Development of a New Drug	403
12.2.1	The Consumption Technology of a Drug	403
12.2.2	Regulation of Market Access by Public Authorities	404
12.2.3	Effect of Copayment	404
12.3	Pharmaceutical Innovation as an Investment	406
12.3.1	The Chronology of a Pharmaceutical Innovation	407
12.3.2	Probability of Success and the Cost of Innovation	408
12.3.3	Excessive Returns to Pharmaceutical Innovation?	410
12.4	The Role of Patent Protection	412
12.4.1	Why Patent Protection?	412
12.4.2	The Decision Situation of the Innovator	413

12.4.3 The Length of Patent Protection from the Regulator's Point of View	416
12.5 Price Regulation of Pharmaceuticals	418
12.5.1 Reasons for Price Regulation	418
12.5.2 The Conflict Between National Regulation and Global Optimization	420
12.5.3 Types of Price Regulation and Their Consequences	422
12.5.3.1 Direct Price Regulation	422
12.5.3.2 Reference Prices	423
12.5.3.3 Rate-of-Return Regulation	423
12.5.3.4 Pharmaceutical Budgets Imposed on Physicians ..	424
12.6 Price Competition on Pharmaceutical Markets	424
12.7 Summary	427
12.8 Further Reading	427
12.E Exercises	428
13 The Political Economy of Health Care	429
13.1 Introduction	429
13.2 Collectively Financed Health Care in a Democracy	430
13.2.1 Basic Assumptions	431
13.2.2 The Decision Process	432
13.2.3 Purchase of Private Health Insurance and Demand for Health Care	433
13.2.4 Voting on Public Health Care for a Given Regime	434
13.2.5 Choice of Regime	436
13.2.6 Empirical Implications of the Analysis	437
13.3 The Role of Professional Associations in Health Care	439
13.3.1 Why Are Professional Associations so Important in Health Care?	439
13.3.2 Tasks of Associations in Health Care	441
13.3.3 Competition among Service Providers, Competition among Associations	443
13.4 Summary	445
13.5 Further Reading	445
13.E Exercises	446

14 Future Challenges to Health Care Systems	447
14.1 Introduction	447
14.2 The Technological Challenge	449
14.2.1 Three Types of Innovation	449
14.2.2 Criteria for an Optimal Allocation of Innovative Effort	451
14.2.3 Distortions of Criteria at the Aggregate Level	454
14.3 The Demographic Challenge	457
14.3.1 Ageing of the Population	457
14.3.1.1 Improved Control over Health Thanks to Medicine?	457
14.3.1.2 The Redistributive Effects of Ageing	459
14.3.2 Changes in Household Composition	461
14.4 Demographic Ageing, Medical Progress, and Health Care Expenditure	462
14.4.1 The ‘Sisyphus Syndrome’ in Health Care	463
14.4.1.1 A Simple Dynamic Model of the Sisyphus Syndrome	463
14.4.1.2 Empirical Evidence	465
14.4.2 Ageing of Population and Health Care Expenditure	471
14.4.3 Funding of Health Insurance	474
14.5 International Challenges	476
14.5.1 Integration of Insurance Markets	476
14.5.2 Migration of Health Care Personnel	478
14.5.3 Direct International Investment in Hospitals	478
14.6 Summary	480
14.7 Further Reading	482
14.E Exercises	482
References	483
