1 Role of Defects and Disorder

in the Half-Metallic Full-Heusler Compounds

<i>I. Galanakis, K. Özdoğan, and E. Şaşıoğlu</i>	1
1.1 Introduction	1
1.2 Defects in Full-Heuslers Containing Co and Mn	3
1.3 Defects Driven Half-Metallic Ferrimagnetism	7
1.4 A Possible Route to Half-Metallic Antiferromagnetism	11
1.5 Vacancies	13
1.6 Summary and Outlook	14
References	16

2 Clustering in Heusler Alloys

<i>N. Lakshmi, V. Sebastian, and K. Venugopalan</i>	21
2.1 Introduction	21
2.2 Experimental Methods	24
2.3 Results and Discussion	24
2.3.1 X-Ray Diffraction Studies	24
2.3.2 Mössbauer Studies	28
2.3.3 DC Magnetization Studies	31
References	34

3 Anisotropy of Ferromagnetic Heusler Alloys Thin Films

<i>R. Yilgin and B. Aktas</i>	37
3.1 Introduction	37
3.1.1 TMR and GMR Effects	38
3.1.2 Critical Current	39
3.1.3 Theoretical Background	41
3.2 The Theory of Ferromagnetic Resonance	42
3.2.1 Dynamics of Magnetization	42
3.2.2 Resonance Field for Polycrystalline Film	44

3.2.3	Ferromagnetic Resonance in Single Crystalline Film	45
3.2.4	Line-Width of Resonance Absorption	47
3.3	Introduction	50
3.3.1	Sample Preparation	50
3.3.2	Magnetic Characterizations	53
3.3.3	FMR Results	55
3.4	Conclusions	62
	References	64

4 Quantum Monte Carlo Study of Anderson Magnetic Impurities in Semiconductors

	<i>N. Bulut, Y. Tomoda, K. Tanikawa, S. Takahashi, and S. Maekawa</i>	67
4.1	Introduction	67
4.2	Model	69
4.3	Two-Dimensional Case	71
4.3.1	Magnetic Correlations Between the Impurities	71
4.3.2	Impurity–Host Correlations	76
4.4	Three-Dimensional Case	79
4.5	Tight-Binding Model for a Mn <i>d</i> Orbital in GaAs	82
4.6	Discussion and Summary	84
	References	86

5 New Type of Nanomaterials: Doped Magnetic Semiconductors Contained Ferrons, Antiferrons, and Afmons

	<i>L.I. Koroleva and D.M. Zashchirinskii</i>	89
5.1	Introduction	89
5.2	Ferrons	90
5.2.1	Giant Red Shift of Fundamental Absorption Edge Connected with Ferromagnetic Ordering	90
5.2.2	Notion of Ferrons	92
5.2.3	Electrical Resistivity and Magnetoresistance of Nondegenerate Ferromagnetic Semiconductors with <i>n</i> -Type of Electrical Conductivity	94
5.2.4	Magnetic Two-Phase Ferromagnetic–Antiferromagnetic State in Manganites	99
5.2.5	Antiferrons	103
5.2.6	Afmons	108
	References	110

6 Cerium-Doped Yttrium Iron Garnet Thin Films Prepared by Sol-Gel Process: Synthesis, Characterization, and Magnetic Properties

	<i>Y. Öztürk, I. Avcı, M. Erol, and E. Çelik</i>	113
6.1	Introduction	114
6.2	Experimental Details	117

6.3	Results and Discussion	120
6.4	Summary and Conclusions	127
	References	128

7 Tuning the Magnetic and Electronic Properties of Manganite Thin Films by Epitaxial Strain

	<i>G.H. Aydogdu, Y. Kuru, and H.-U. Habermeier</i>	131
7.1	Introduction.....	131
7.2	Preparation and Analysis of Films	135
	7.2.1 Deposition Technique and Film Growth	135
	7.2.2 Analysis of Films	137
7.3	Structural Characterization, Electrical and Magnetic Properties of Manganites Film	138
	7.3.1 Structural Characterization	138
	7.3.2 Magnetic Properties	139
	7.3.3 Electrical Properties	142
7.4	General Discussion	144
7.5	Conclusions	146
	References	146

8 Radiation Nanostructuring of Magnetic Crystals

	<i>V.A. Ageev, V.I. Kirischuk, Yu.V. Koblyanskiy, G.A. Melkov, L.V. Sadovnikov, A.N. Slavin, N.V. Strilchuk, V.I. Vasyuchka, and V.A. Zheltonozhsky</i>	149
8.1	Introduction.....	149
8.2	The Influence of Inhomogeneities upon the Properties of Ferrites and Ferrite Devices	150
8.3	Wave-Front Reversal in a Medium with Inhomogeneities	151
8.4	Experimental Results.....	153
8.5	Discussions	159
8.6	Conclusions	164
	References	165

9 Electromagnetic Radiation of Micro and Nanomagnetic Structures with Magnetic Reversal

	<i>B.A. Gurovich, K.E. Prihodko, E.A. Kuleshova, A.G. Domantovsky, K.I. Maslakov, and E.Z. Meilikhov</i>	167
9.1	Introduction.....	167
9.2	Experimental.....	168
9.3	Results and Discussion	170
	9.3.1 Coercivity Static Measurements of Magnetic Patterned Media	170
	9.3.2 The Dependence of the Amplitude and Duration of Emitted Signal on the External Magnetic Field Amplitude	173

XII Contents

9.3.3	Experimental Determination of Dynamic Emitted Parameters of Magnetic Patterned Media	174
9.3.4	Dependence of Dynamical Coercivity of Bit Arrays with Underlayer on the Bits Structural Geometry	176
9.3.5	Peculiarities of the Magnetic Structure of Cobalt Bits with and without a Soft Magnetic Underlayer	177
9.4	Conclusions	180
	References	181

10 Structural and Magnetic Properties and Preparation Techniques

of Nanosized M-type Hexaferrite Powders

	<i>T. Koutzarova, S. Kolev, C. Ghelev, K. Grigorov, and I. Nedkov</i>	183
10.1	Introduction	183
10.2	Crystalline Structure	184
10.3	Magnetic Properties	186
10.4	Methods for Preparation	192
10.5	Microemulsion Technique	196
	References	199

11 Nanocrystallization and Surface Magnetic Structure of Ferromagnetic Ribbons and Microwires

	<i>A. Chizhik, A. Zhukov, V. Zhukova, C. Garcia, J.M. Blanco, J.J. del Val, L. Fernandez, N. Iturriza, and J. Gonzalez</i>	205
11.1	Introduction	205
11.2	Co-Rich Ribbons	206
	11.2.1 Experimental Details	206
	11.2.2 Results and Discussion	207
11.3	Ni-Rich Ribbons	210
	11.3.1 XRD and AFM Structural Results	210
	11.3.2 Magnetic Results	210
11.4	Microwires with Novel Composition $\text{Cu}_{70}(\text{Co}_{70}\text{Fe}_5\text{Si}_{10}\text{B}_{15})_{30}$	212
	11.4.1 Experimental Details	213
	11.4.2 Results and Discussion	213
	References	217

12 On Structural and Magnetic Properties of $\text{Fe}_{73.5-x}\text{Si}_{13.5}\text{B}_9\text{Cu}_1\text{Nb}_3\text{Mn}_x$ Metal Alloys

	<i>R. Brzozowski, M. Wasiak, P. Sovák, and M. Moneta</i>	219
12.1	Introduction	219
12.2	Experiment	220
12.3	Results and Discussion	220
	12.3.1 As-Quenched $\text{Fe}_{73.5-x}\text{Si}_{13.5}\text{B}_9\text{Cu}_1\text{Nb}_3\text{Mn}_x$	220
	12.3.2 Annealed $\text{Fe}_{73.5-x}\text{Si}_{13.5}\text{B}_9\text{Cu}_1\text{Nb}_3\text{Mn}_x$	224
12.4	Conclusions	229
	References	230

13 FeCoZr–Al₂O₃ Granular Nanocomposite Films with Tailored Structural, Electric, Magnetotransport and Magnetic Properties

<i>J.A. Fedotova</i>	231
13.1 Introduction	231
13.1.1 Granular Nanocomposites for Electronics: Reasons of Interest	232
13.1.2 Preparation and Structure of Granular MMCs	233
13.1.3 Percolation in Granular Nanocomposites	235
13.1.4 Carrier Transport in Granular MMCs around Metal–Insulator Transition	237
13.1.5 Magnetic Properties of Granular Nanocomposites	242
13.2 Properties of FeCoZr–Al ₂ O ₃ Nanocomposite Films: Synthesis in Pure Ar and Mixed Ar + O Ambient	243
13.2.1 Synthesis and Samples Preparation	243
13.2.2 Mössbauer Spectroscopy	244
13.2.3 Alternation Grads- and SQUID-Magnetometry	246
13.2.4 Atomic Force–Magnetic Force Microscopy	249
13.2.5 Electric and Magnetotransport Properties	253
13.3 Concluding Remarks	261
References	263

14 Ferromagnetism of Nanostructures Consisting of Ferromagnetic Granules with Dipolar Magnetic Interaction

<i>E. Meilikhov and R. Farzetdinova</i>	269
14.1 Introduction	269
14.2 Lattices of Point-like and Rod-like Ferromagnetic Granules with Dipole Interaction	273
14.2.1 3D Lattice of Point-Like Granules	275
14.2.2 2D Lattice of Point-Like Granules	277
14.2.3 3D Lattice of Rod-Like Granules	279
14.2.4 2D Lattice of Rod-Like Granules	279
14.3 Lattices of Ellipsoidal Granules with Dipole Interaction	280
14.3.1 Magnetic Field of the Ellipsoidal Granule	280
14.3.2 3D Lattice of Ellipsoidal Granules	282
14.3.3 2D Lattice of Prolate Ellipsoidal Granules	282
14.3.4 2D Lattice with Oblate Ellipsoidal Granules	284
14.3.5 2D Lattice of Oblate Ellipsoidal Granules in a Magnetic Field	285
14.4 Partially Populated Lattices of Point-Like Ising Dipoles	287
14.4.1 Distribution of Local Magnetic Fields	288
14.4.2 Magnetic Phase Diagram	290
14.5 Random Systems of Point-Like and Rod-Like Ising Dipoles	295
14.5.1 Introduction	295

XIV Contents

14.5.2	Generalized Mean Field Theory for Point (Spherical) Dipoles	296
14.5.3	Generalized Mean Field Theory for Rod-Like Dipoles	303
14.5.4	Magnetic Properties of a Random System of Rod-Like Dipoles	308
14.6	Experimental Examples	311
14.6.1	Magnetism of Ultrathin Films	311
14.6.2	2D Lattices of Disk-Shaped Granules in a Magnetic Field . .	314
14.6.3	Magnetic Recording Density	314
14.6.4	Conclusions	318
	References	318
 15 Magnetic Dipolar Interactions in Nanoparticle Systems: Theory, Simulations and Ferromagnetic Resonance		
	<i>D.S. Schmool and M. Schmalzl</i>	321
15.1	Introduction	321
15.2	Theory of Dipole – Dipole Interactions in Magnetic Nanoparticles	322
15.2.1	Dipolar Interactions	322
15.2.2	Simulations for Arrays of Nanoparticles	323
15.3	Ferromagnetic Resonance in Magnetic Nanoparticles	325
15.4	Conclusions	326
	References	326
	Contributors	327
