## Part I Molecular Cytogenetics, Probes and Equipment

<b>1 Molecular Cytogenetic Applications in Diagnostics and Research: An Overview.....</b>	<b>3</b>
Nedime Serakinci and Steen Kølvrå	
<b>2 Molecular Cytogenetics: The Standard FISH and PRINS Procedure .....</b>	<b>23</b>
Thomas Liehr and Franck Pellestor	
<b>3 Generation of Paint Probes by Flow-Sorted and Microdissected Chromosomes .....</b>	<b>35</b>
Fengtang Yang, Vladimir Trifonov, Bee Ling Ng, Nadezda Kosyakova, and Nigel P. Carter	
<b>4 ISH Probes Derived from BACs, Including Microwave Treatment for Better FISH Results .....</b>	<b>53</b>
Anja Weise, Kristin Mrasek, Nadezda Kosyakova, Hasmik Mkrtchyan, Madeleine Gross, Vivien Klaschka, and Thomas Liehr	
<b>5 PNA-FISH Technique for In Situ Assessment of Aneuploidy.....</b>	<b>61</b>
Franck Pellestor, Petra Paulasova, and Samir Hamamah	
<b>6 Oligonucleotide FISH Probes.....</b>	<b>67</b>
Sean Bradley, Leah Zamechek, and Joan Aurich-Costa	
<b>7 Microscopy and Imaging Systems .....</b>	<b>75</b>
Ivan Iourov	

<b>8</b>	<b>Optical Filters for FISH .....</b>	<b>85</b>
	Michael Sommerauer and Ingrid Feuerbacher	
<b>9</b>	<b>FISH With and Without COT1 DNA.....</b>	<b>99</b>
	Vladimir A. Trifonov, Nadezhda N. Vorobieva, and Willem Rens	
<b>Part II FISH Applications in Different Tissue Preparations</b>		
<b>10</b>	<b>Pre- and Postnatal Diagnostics and Research on Peripheral Blood, Chorion, Amniocytes, and Fibroblasts.....</b>	<b>113</b>
	Anja Weise and Thomas Liehr	
<b>11</b>	<b>Prenatal Diagnostics on Uncultured Amniocytes.....</b>	<b>123</b>
	Bernd Eiben, Ralf Glaubitz, and Hans-Jürgen Arens	
<b>12</b>	<b>Tumorcytogenetic Diagnostics and Research on Uncultured Blood or Bone Marrow and Smears.....</b>	<b>131</b>
	Anita Heller, Madeleine Gross, Vera Witthuhn, Katja Behr, Sophie Hinreiner, Hasmik Mkrtchyan, and Thomas Liehr	
<b>13</b>	<b>Application of FISH to Archival Cytogenetic Slides.....</b>	<b>137</b>
	Thomas Liehr and Erich Gebhart	
<b>14</b>	<b>Characterization of Mosaicism in Various Easy-to-Acquire Body Tissues Such as Buccal Smears, Hair Root Cells or Urine .....</b>	<b>141</b>
	Kristin Mrasek, Anja Weise, Madeleine Gross, Hasmik Mkrtchyan, and Thomas Liehr	
<b>15</b>	<b>Characterization of Archived Formalin-Fixed/ Paraffin-Embedded or Cryofixed Tissue, Including Nucleus Extraction .....</b>	<b>147</b>
	Thomas Liehr and Marina Manvelyan	
<b>16</b>	<b>FISH on Sperms, Spermatocytes and Oocytes .....</b>	<b>157</b>
	Maria Oliver-Bonet	
<b>Part III Characterization of Marker Chromosomes</b>		
<b>17</b>	<b>Multiplex FISH and Spectral Karyotyping .....</b>	<b>175</b>
	Thomas Liehr, Kristin Mrasek, Nadezda Kosyakova, Hasmik Mkrtchyan, Joana Melo, Anna Polityko, and Lukrecija Brecevic	

<b>18</b>	<b>Tips and Tricks for mFISH .....</b>	<b>183</b>
	Karin M. Greulich-Bode, Maren Kaufmann, Klaus Gilbertz, and Roderick A.F. MacLeod	
<b>19</b>	<b>Simultaneous Fluorescence Immunostaining and FISH .....</b>	<b>193</b>
	Christine J. Ye, Lesley Lawrenson, Guo Liu, Joshua Stevens, Steve Bremer, Karen J. Ye, and Henry H.Q. Heng	
<b>20</b>	<b>Color-Changing Karyotyping (CCK), an M-FISH/SKY Alternative .....</b>	<b>217</b>
	Octavian Henegariu	
<b>21</b>	<b>Three-Color FISH for the Detection of Individual Radiosensitivity .....</b>	<b>231</b>
	Luitpold Distel, Ulrike Keller, and Susann Neubauer	
<b>22</b>	<b>FISH Banding Techniques.....</b>	<b>243</b>
	Thomas Liehr, Kristin Mrasek, Nadezda Kosyakova, Heike Nelle, Vladimir Trifonov, Marina Manvelyan, and Anja Weise	
<b>23</b>	<b>cenM-FISH Approaches .....</b>	<b>251</b>
	Nadezda Kosyakova, Anja Weise, Kristin Mrasek, Hasmik Mkrtchyan, Vivien Klaschka, Elisabeth Ewers, Daniela Reich, Nadine Rüdiger, and Thomas Liehr	
<b>Part IV Characterization of Cryptic and Epigenetic Aberrations</b>		
<b>24</b>	<b>Subtelomeric and/or Subcentromeric Probe Sets .....</b>	<b>261</b>
	Anja Weise, Kristin Mrasek, Madeleine Gross, Vivien Klaschka, and Thomas Liehr	
<b>25</b>	<b>Quantitative DNA Fiber Mapping.....</b>	<b>269</b>
	Chun-Mei Lu, Mei Wang, Karin M. Greulich-Bode, Jingly F. Weier, and Heinz-Ulli G. Weier	
<b>26</b>	<b>Parental Origin Determination FISH: Pod-FISH.....</b>	<b>293</b>
	Anja Weise, Kristin Mrasek, Hasmik Mkrtchyan, Madeleine Gross, Sophie Hinreiner, and Thomas Liehr	

## **Part V Interphase FISH and Characterization of the Nuclear Architecture**

- 27 Interphase FISH: Detection of Intercellular Genomic Variations and Somatic Chromosomal Mosaicism** ..... 301  
Ivan Y. Iourov, Svetlana G. Vorsanova, Ilia V. Soloviev,  
and Yuri B. Yurov
- 28 Three-Dimensional Interphase Analysis Enabled by Suspension FISH ..** 313  
Friederike Hunstig, Marina Manvelyan, Samarth Bhatt,  
Ulf Steinhaeuser, and Thomas Liehr

## **Part VI Applications of FISH in Zoology, Botany and Microbiology**

- 29 Animal Probes and ZOO-FISH** ..... 323  
Fengtang Yang and Alexander S. Graphodatsky
- 30 FISH Targeting of Chromosomes and Subchromosomal Regions in Yeast**..... 347  
Harry Scherthan
- 31 FISH on Insect Cells Transfected with Heterologous DNA: A Single-Cell-Directed Approach** ..... 361  
Thomas Liehr
- 32 FISH on Plant Chromosomes**..... 365  
Peng Zhang and Bernd Friebe
- 33 FISH in Food Microbiology** ..... 395  
Benedetta Bottari, Danilo Ercolini, Monica Gatti,  
and Erasmo Neviani

## **Part VII Comparative Genomic Hybridization (CGH) and Array CGH**

- 34 Micro-CGH: Microdissection-Based Comparative Genomic Hybridization** ..... 411  
Anita Heller and Thomas Liehr
- 35 Array CGH: Opening New Horizons** ..... 421  
Joris R. Vermeesch

## **Part VIII Internet Links for FISH**

- 36 FISH and Chips on the Internet** ..... 441  
Thomas Liehr and Anja Weise
- Index**..... 447

Fluorescence In Situ Hybridization (FISH) - Application  
Guide

Liehr, Th. (Ed.)

2009, XVIII, 451 p., Hardcover

ISBN: 978-3-540-70580-2
