## Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Point Defects in <math>\text{LiNbO}_3</math></b>	<b>9</b>
2.1	Intrinsic Defect Structure of $\text{LiNbO}_3$	10
2.2	Point Defects Induced in $\text{LiNbO}_3$ by a Reduction Treatment and the Polaron Model	14
2.3	Hydrogen in the $\text{LiNbO}_3$ Lattice	24
2.4	Photorefractive and Relative Impurity Ions in the $\text{LiNbO}_3$ Lattice	27
2.5	Optical-Damage-Resistant (Non-Photorefractive) Impurity Ions in the $\text{LiNbO}_3$ Lattice and Their Impact on the Incorporation of Other Impurity Ions	34
2.5.1	Incorporation of the Optical-Damage-Resistant Ions into the Lattice	34
2.5.2	Effect of Optical-Damage-Resistant Impurities on the Incorporation of Other Impurity Ions	44
2.5.3	OH-Spectra in Optical-Damage-Resistant $\text{LiNbO}_3$ Crystals	48
<b>3</b>	<b>General Introduction to Photorefraction in <math>\text{LiNbO}_3</math></b>	<b>51</b>
3.1	Background with Basic Relations	52
3.2	Photoinduced Charge Transport in $\text{LiNbO}_3$ Crystals	58
3.2.1	Dark Conductivity in $\text{LiNbO}_3$	59
3.2.2	One-Center Charge Transport Scheme in $\text{LiNbO}_3$	62
3.2.3	Two-Center Charge Transport Scheme in $\text{LiNbO}_3$ : The Intrinsic Defects as <i>Secondary</i> Electron Traps	68
<b>4</b>	<b>Photorefraction in <math>\text{LiNbO}_3</math> Crystals with Different Stoichiometry and/or Doped with Optical-Damage-Resistant Impurities</b>	<b>75</b>
4.1	Photorefractive Properties of Near-Stoichiometric $\text{LiNbO}_3$ Crystals	76

4.2	Photorefraction in LiNbO <sub>3</sub> Crystals Doped with Optical-Damage-Resistant Ions .....	82
4.2.1	Photorefractive Properties of Optical-Damage-Resistant Compositions .....	82
4.2.2	Fundamental Changes of the Charge Transport Process Produced by ODRI in LiNbO <sub>3</sub> : Charge Transport Process in LiNbO <sub>3</sub> Crystals Doped with ODRI .....	85
4.2.3	Dark-Trace and GRIIRA (BLIIRA) Effects in Optical-Damage-Resistant LiNbO <sub>3</sub> Crystals .....	94
4.2.4	LiNbO <sub>3</sub> with Optical-Damage-Resistant Impurities as Media for the Photorefractive Recording .....	97
<b>5</b>	<b>Problem of a Non-Erasable Photorefractive Hologram .....</b>	<b>103</b>
5.1	Two-Color Holography .....	104
5.1.1	Principles of the Two-Color Holography .....	104
5.1.2	Two-Step Recording via Short-Living Centers (Gating Process) .....	106
5.1.3	Two-Color Recording in Doubly-Doped Crystals .....	114
5.2	Thermal Hologram Fixation .....	117
5.2.1	Basics and the Theoretical Approach of Thermal Fixing .....	118
5.2.2	Experimental Studies in the Thermal Fixing .....	127
5.2.3	Thermal Fixing of Holograms in Other Photorefractive Materials .....	132
5.2.4	Attempts of Practical Applications of Thermal Hologram Fixing in LiNbO <sub>3</sub> .....	135
5.2.5	Conclusions for Thermal Hologram Fixation .....	137
<b>6</b>	<b>Properties to Characterize Undoped and Optical-Damage-Resistant LiNbO<sub>3</sub> Crystals .....</b>	<b>139</b>
6.1	Methods to Measure the Composition and Homogeneity of Crystals .....	139
6.1.1	Melt Composition and Curie Temperature .....	140
6.1.2	UV Absorption Edge .....	142
6.1.3	Homogeneity .....	143
6.2	Refractive Indices and Birefringence: A Generalized Sellmeier Equation .....	143
6.3	Phase-Matching Temperature and Angle .....	148
6.4	Electro-Optic Properties .....	150
<b>7</b>	<b>Polarization Reversal and Ferroelectric Domains in LiNbO<sub>3</sub> Crystals .....</b>	<b>153</b>
7.1	Classical Description of the Ferroelectric Switching .....	153
7.1.1	Phenomenological Description .....	154

7.1.2	Model Description of the Domain Dynamics and Ferroelectric Switching .....	161
7.1.3	Experimental Methods for Domain Studies and Polarization Kinetics .....	167
7.1.4	Background of the Optical Frequency Conversion in the Quasi-phasematching (QPM) Regime .....	173
7.2	Ferroelectric Switching of $\text{LiNbO}_3$ and $\text{LiTaO}_3$ Crystals .....	176
7.2.1	First Steps of Regular Domain Pattern Creation in $\text{LiNbO}_3$ and $\text{LiTaO}_3$ Crystals .....	177
7.2.2	Fundamental Role of the Composition in Ferroelectric Switching .....	181
7.2.3	Photoinduced Effects in Ferroelectric Switching of $\text{LiNbO}_3$ and $\text{LiTaO}_3$ (Photodomain Effects) .....	197
7.2.4	Recording of Ferroelectric Domains by Electron Beams and AFM Voltages: Microstructured Domain Patterns .....	200
7.2.5	Conclusion .....	209
