## Contents

Preface .....	VII
Conventions .....	XVII
<hr/>	
<b>Introduction</b>	<b>1</b>
<hr/>	
<b>1</b> Couplings and changes of variables .....	5
<b>2</b> Three examples of coupling techniques .....	21
<b>3</b> The founding fathers of optimal transport .....	29
<hr/>	
<b>Part I Qualitative description of optimal transport</b>	<b>39</b>
<hr/>	
<b>4</b> Basic properties .....	43
<b>5</b> Cyclical monotonicity and Kantorovich duality .....	51
<b>6</b> The Wasserstein distances .....	93
<b>7</b> Displacement interpolation .....	113
<b>8</b> The Monge–Mather shortening principle .....	163
<b>9</b> Solution of the Monge problem I: Global approach ...	205
<b>10</b> Solution of the Monge problem II: Local approach ...	215

XIV Contents

11	The Jacobian equation .....	273
12	Smoothness .....	281
13	Qualitative picture .....	333

---

Part II	Optimal transport and Riemannian geometry	353
---------	---	-----

---

14	Ricci curvature .....	357
15	Otto calculus.....	421
16	Displacement convexity I .....	435
17	Displacement convexity II.....	449
18	Volume control .....	493
19	Density control and local regularity .....	505
20	Infinitesimal displacement convexity .....	525
21	Isoperimetric-type inequalities .....	545
22	Concentration inequalities .....	567
23	Gradient flows I.....	629
24	Gradient flows II: Qualitative properties .....	693
25	Gradient flows III: Functional inequalities.....	719

---

Part III	Synthetic treatment of Ricci curvature	731
----------	--	-----

---

26	Analytic and synthetic points of view .....	735
27	Convergence of metric-measure spaces .....	743
28	Stability of optimal transport .....	773

<b>29 Weak Ricci curvature bounds I: Definition and Stability .....</b>	<b>795</b>
<b>30 Weak Ricci curvature bounds II: Geometric and analytic properties.....</b>	<b>847</b>
<hr/>	
<b>Conclusions and open problems</b>	<b>903</b>
<hr/>	
<b>References .....</b>	<b>915</b>
<b>List of short statements .....</b>	<b>957</b>
<b>List of figures .....</b>	<b>965</b>
<b>Index .....</b>	<b>967</b>
<b>Some notable cost functions .....</b>	<b>971</b>

Optimal Transport

Old and New

Villani, C.

2009, XXII, 976 p., Hardcover

ISBN: 978-3-540-71049-3
