1 *Brucella*
Nammalwar Sriranganathan, Mohamed N. Seleem, Steven C. Olsen, Luis E. Samartino, Adrian M. Whatmore, Betsy Bricker, David O'Callaghan, Shirley M. Halling, Oswald R. Crasta, Rebecca A. Wattam, Anjan Purkayastha, Bruno W. Sobral, Eric E. Snyder, Kelley Williams, Gong-Xi Yu, Thomas A. Ficht, C. Marty Roop II, Paul deFigueiredo, Stephen M. Boyle, Oliver He, and Rene M. Tsolis 1

1.1.1 Discovery of the *Brucellae* 1
1.1.2 Species Discovery 1
1.1.3 Zoonoses 2
1.1.4 Eradication Program 3
1.1.5 Vaccination 3
1.1.6 Molecular Study and Diagnoses 4
1.2 Economic and Zoonotic Implications of *Brucella* 4
1.2.1 Distribution of *Brucella* spp. Worldwide 4
1.2.2 Zoonotic Characteristics of *Brucella* spp. 5
1.2.3 Ecomonic Losses to Producers and Costs for Human Clinical Care 5
1.2.4 Control Programs and Associated Economic Costs 6
1.2.5 Conclusions 7
1.3 *Brucella* Taxonomy 7
1.3.1 Morphology/Life Cycle 7
1.3.2 Phylogenetic Position of the Genus 7
1.3.3 *Brucella* Taxonomy 9
1.4 Molecular Epidemiology and Population Dynamics of *Brucella* 10
1.4.1 Tools for Molecular Epidemiology 10
1.4.2 Population Dynamics and How They Can Impact Molecular Epidemiology 11
1.4.3 Conclusions 13
1.5 Physical and Genetic Map of Genomes 13
1.5.1 Bacterial Genomes and Their Analyses 13
1.5.2 Global Organization–Physical Maps 13
1.5.3 The *Brucella* Genome is Highly Conserved 14
1.5.4 The *Brucella* Genome and α-Proteobacteria Evolution 14
1.5.5 Multiple Genomes and Genome Rearrangements 14
1.5.6 Mobile Genetic Elements, Repeat Elements and Genomic Rearrangements 15
1.5.7 Genomic Polymorphisms: Transposons, Phage and Plasmid Associated Sequences 16
1.5.8 Genetic Maps: Synteny 16

1.6 Genome Sequencing and Bioinformatics Resources 16
1.6.1 Introduction 16
1.6.2 Genome Sequencing 17
1.6.3 High-Throughput Sequencing Technologies 17
1.6.4 *Brucella* Genome Sequences 18
1.6.5 Bioinformatics Resources 20
1.6.6 Biological Data Curation in the Age of High-Throughput Technologies 21
1.6.7 Bioinformatics Resources for *Brucella* 21
1.6.8 The *Brucella* Bioinformatics Portal 21
1.6.9 The Pathogen Portal 23
1.6.10 The PathoSystems Resource Integration Center 24
1.6.11 Summary 26
1.7 Comparative Genomics of *Brucella* 26
1.7.1 Introduction 26
1.7.2 Comparative Analysis of *Brucella* and Related Species 27
1.7.3 Comparative Genomic Analysis of *Brucella* 29
1.7.4 Summary 35
1.8 Functional Genomics 35
1.8.1 Introduction 35
1.8.2 Genomics: Global Approaches 36
1.8.3 Rational Approaches 38
1.8.4 Transcriptomics 40
1.8.5 Bacterial Microarrays 40
1.8.6 Host Cell Microarrays 41
1.8.7 Proteomics 41
1.8.8 Higher Order (Protein–Protein) Interactions 42
1.8.9 Conclusions 42
1.9 Genome Mapping and Microarray Contributions to Understanding *Brucella* Pathobiology and Host Responses to *Brucella* Infections 43
1.9.1 Introduction 43
1.9.2 Biology of a *Brucella* Infection 43
1.9.3 Genome Mapping for Understanding *Brucella* Pathobiology 44
1.9.4 Genome Mapping for Understanding Host Response Against *Brucella* Infections 47
1.10 Future Directions and Prospects 51
References 52

2 *Mycobacterium avium* subspecies *paratuberculosis*
Ling-Ling Li, Sushmita Singh, John Bannantine, Sagarika Kanjilal, and Vivek Kapur 65
2.1 Introduction 65
2.1.1 The Pathogen and the Disease It Causes 65
2.1.2 Morphology, Taxonomic Position, Life-Cycle, and Host-Range of *Map* 67
2.2 The Genome Sequence of *Map* 68
2.2.1 Characteristics of the *Map* K-10 Genome 68
2.2.2 Repetitive DNA in *Map* 68
2.2.3 Protein Encoding Genes 69
2.2.4 Unique Regions and Unique Genes 69

2.2.5 Mycobactin Synthesis . . . 70
2.2.6 Insights into Virulence and Pathogenicity Gleaned from the *Map* Genome . . . 70
2.2.7 Distinguishing Characteristics of the *Map* Genome . . . 70
2.2.8 Genomics-Based Insights into *Map* Metabolism . . . 71
2.3 Population Studies of *Map* . . . 72
2.3.1 Multi-Locus Enzyme Electrophoresis (MLEE) . . . 73
2.3.2 DNA-Based Tools . . . 73
2.3.3 Multi-Locus Short Sequence Repeats (MLSSR) . . . 75
2.3.4 Variable Number of Tandem Repeats (VNTR) . . . 77
2.4 Concluding Comments . . . 78
References . . . 79

3 *Anaplasma*
Kelly A. Brayton, Michael J. Dark, and Guy H. Palmer . . . 85
3.1 Introduction . . . 85
3.2 History . . . 85
3.3 Impact on Animal Health . . . 87
3.4 Taxonomy . . . 87
3.5 Strains . . . 91
3.5.1 Genotype . . . 91
3.5.2 Strain Diversity . . . 91
3.6 Population Studies . . . 93
3.7 Genome Sequence and Resources . . . 94
3.7.1 Genome Architecture and General Features . . . 94
3.7.2 Metabolism . . . 96
3.7.3 Cell Wall Biogenesis . . . 98
3.7.4 Transporters . . . 99
3.7.5 Paralogous Gene Families . . . 102
3.8 Comparative Genomics . . . 105
3.9 Future Scope . . . 108
References . . . 110

4 *Ehrlichia*
Basil A. Allsopp and Jere W. McBride . . . 117
4.1 Introduction . . . 117
4.1.1 History of *Ehrlichia* . . . 117
4.1.2 Taxonomic Position . . . 117
4.1.3 Ultrastructure . . . 118
4.1.4 Life Cycle . . . 119
4.1.5 Entry and Development in Host Cells . . . 120
4.1.6 Epidemiology . . . 120
4.1.7 Diseases . . . 121
4.1.8 Economic Importance . . . 122
4.1.9 *Ehrlichia* as Zoonotic Pathogens . . . 123
4.2 Genomics . . . 123
4.2.1 Genetic Variability of *Ehrlichia* . . . 124
4.2.2 Genome Sequencing . . . 128
4.2.3 Genomic Insights into the Biology of *Ehrlichia* . . . 140
4.2.4 Molecular Diagnostics . . . 148

4.2.5 Vaccine Development 150
4.2.6 Comparative Genomics of *Ehrlichia* Species 152
4.3 Future Scope 155
References 156

5 *Cryptosporidium*
Guan Zhu, Shinichiro Enomoto, Jason M. Fritzler, Mitchell S. Abrahamsen, and Thomas J. Templeton 165
5.1 *Cryptosporidium* and Cryptosporidiosis 165
5.1.1 Introduction 165
5.1.2 Taxonomic Position 166
5.1.3 Life Cycle 167
5.1.4 *Cryptosporidium* Genotypes 170
5.1.5 Treatment 170
5.2 Genome Sequencing, Mapping, and Resources 172
5.2.1 History of Genome Sequencing Projects 172
5.2.2 General Features of *Cryptosporidium* Genomes 172
5.2.3 Comparison Between *C. parvum* and *C. hominis* Genomes 174
5.2.4 Genome Databases and Resources 176
5.2.5 Genome Maps 177
5.3 *Cryptosporidium* Biology: Insights from the Complete Genome 178
5.3.1 Streamlined Metabolism 178
5.3.2 Expanded Families of Transporters 179
5.3.3 Lineage-Specific Expansion of Proteases 180
5.3.4 *Cryptosporidium*-Specific Amplified Gene Families 180
5.3.5 The Surface Protein Repertoire of *Cryptosporidium* 180
5.3.6 Mucin-Like Proteins 181
5.3.7 The TRAP Family of Motility and Invasion Proteins 181
5.3.8 The LCCL Domain Family 182
5.3.9 The Oocyst Wall Proteins 182
5.3.10 The Role of Lateral Gene Transfer in the Origin of Apicomplexan Extracellular Proteins 182
5.4 Parasite Targets for New Therapeutics 184
References 185

6 *Theileria*
Richard P. Bishop, David O. Odongo, David J. Mann, Terry W. Pearson, Chihiro Sugimoto, Lee R. Haines, Elizabeth Glass, Kirsty Jensen, Ulrike Seitzer, Jabbar S. Ahmed, Simon P. Graham, and Etienne P. de Villiers 191
6.1 Introduction 191
6.1.1 The Genus *Theileria* 191
6.1.2 Economic Importance of *Theileria* 192
6.1.3 Theileria Taxonomy 192
6.1.4 Epidemiology and Pathology of *Theileria* Infections 193
6.1.5 Theileria Life Cycle and Cell Biology 194
6.2 Physical Mapping of the *T. parva* Genome 196
6.3 The *Theileria parva* and *T. annulata* Genome Sequences 196
6.3.1 Telomere-Associated Sequences 198
6.3.2 Comparative Genomics of *T. parva* and *T. annulata* 200
6.3.3 Current Status of the *Theileria orientalis* Genome Sequencing Project 201

6.4 Population Genetics and Molecular Epidemiology of *T. parva* and *T. annulata* 202
6.5 Genetic Recombination in *T. parva*. 203
6.6 The Transcriptome of *Theileria parva* Schizonts as Revealed Using MPSS. 205
6.6.1 Transcription of the Multicopy *Tpr* and *Tar* Loci 206
6.7 A Snapshot of the *T. parva* Proteome 206
6.8 Transcriptional Analyses of Host–Pathogen Interactions of *T. annulata* Infections in Bovine Macrophages 209
6.9 Application of Genomics to Understand the Biology of *Theileria*–Mammalian Host Cell Interaction 211
6.9.1 Insights into the Interaction of *Theileria* with Bovine Leukocytes Derived from Analysis of the Virtual Proteomes of *T. parva* and *T. annulata*. 211
6.9.2 Analysis of the *T. parva* Predicted Proteome in Relation to Cell Cycle Regulation and Modulation of Mammalian Host Cell Function 213
6.9.3 Predicted Cyclin-Dependent Kinases in the *T. parva* Genome 213
6.9.4 Predicted Cyclins in the *T. parva* Genome 213
6.9.5 Sequence Homologues of Additional Parasite-Encoded Cell Cycle Regulators 219
6.9.6 Potential Modulators of the Host Cell Identified in the *Theileria* Genomes 219
6.10 Application of Genomics to the Development and Deployment of Vaccines for the Control of *Theileria* 221
6.10.1 Molecular Tools to Support Live Vaccination Against East Coast Fever 221
6.10.2 Live Attenuated Cell Culture Vaccines for the Control of *T. annulata* 221
6.10.3 Application of Genomics to Development of Subunit Vaccines for Control of ECF 222
6.11 Initial Investigation of *Theileria* Interaction with Ixodid Tick Vectors Using Expressed Sequence Tags Derived from *R. appendiculatus* and *A. variegatum* Tick Salivary Gland Transcripts 224
6.12 Opportunities for Future Research 224

Genome Mapping and Genomics in Animal-Associated Microbes

Vishvanath, N.; Kole, C. (Eds.)
2009, XXI, 237 p. 43 illus., 3 illus. in color., Hardcover
ISBN: 978-3-540-74040-7
