1	Radio Pulsar Statistics	1
	Duncan R. Lorimer	
1.1	Introduction	1
1.2	The Observed Pulsar Spatial Distribution	4
1.3	Selection Effects in Radio Pulsar Surveys	5
1.4	Techniques to Account for Observational Selection	7
1.5	Outstanding Problems	9
1.6	Concluding Remarks	14
	References	16
2	Radio Emission Properties of Pulsars	19
	Richard N. Manchester	
2.1	Introduction	19
2.2	Parkes Multi-Beam Pulsar Surveys	22
2.3	Other Recent Surveys	25
2.4	Pulsar Nulling and Mode Changing	27
2.5	Pulse Modulation and Drifting	31
2.6	Giant and Not-So-Giant Pulses	33
2.7	Transient Radio Emission from a Magnetar	35
2.8	Rotation Axis: Proper Motion Correlation	36
2.9	Conclusions	38
	References	38
3	Rotating Radio Transients	41
	Maura McLaughlin	
3.1	Introduction	41
3.2	The Discovery of Rotating Radio Transients	43
3.3	Ongoing Radio Observations of the RRATs	48
3.4	X-Ray Properties of the RRATs	54
3.5	What Are They?	59
3.6	Population Estimates	61

3.7	Recent Discoveries	63
3.8	Concluding Remarks	64
	References	65
4	Intermittent Pulsars	67
	Andrew G. Lyne	
4.1	Introduction	67
4.2	PSR B1931+24	67
4.3	Discussion	70
	References	72
5	The Double Pulsar: A Unique Lab for Relativistic Plasma Physics and Tests of General Relativity	73
	Michael Kramer	
5.1	Introduction	73
5.2	The Double Pulsar	74
5.3	Orbital Decay Measurements and Alternative Theories of Gravity	88
5.4	Future Tests	88
5.5	Concluding Remarks	89
	References	90
