1 Condensed-Phase Explosives: Shock Initiation and Detonation Phenomena

<i>S.A. Sheffield and R. Engelke</i>	1
1.1 Introduction	2
1.1.1 Relationship of Initiation and Detonation to Shocks	2
1.1.2 Brief History: Materials Development	4
1.1.3 Brief History: Development of Understanding	5
1.2 Some Chemical Structures and Chemical Properties of Condensed-Phase HEs	6
1.2.1 HE Classifications	7
1.2.2 Properties of Selected HEs	7
1.3 Conservation Relations and Equation of State	9
1.3.1 Conservation Relationships	9
1.3.2 Unreacted Material EOS: Hugoniot	12
1.3.3 Reaction Products Hugoniot and EOS	17
1.4 Detonation Phenomena	19
1.4.1 1-D Steady Detonation	21
1.4.2 Zeldovich–von Neumann–Doering Theory	22
1.4.3 Taylor Wave	24
1.4.4 2-D Steady Detonation	27
1.4.5 Detonation Shock Dynamics	31
1.4.6 Reaction-Zone Measurements	33
1.4.7 Corner Turning	35
1.4.8 Detonation Properties of Selected Explosives	37
1.4.9 3-D Detonation	38
1.5 Shock Initiation Phenomena; Shock-to-Detonation Transition	40
1.5.1 1-D Homogeneous HE SDT	41
1.5.2 1-D Heterogeneous HE SDT	43
1.5.3 Experimental Methods For Making Shock Initiation Measurements	44
1.5.4 Explosively Driven Wedge Experiments	45

1.5.5	Multiple Gauge Measurements	47
1.5.6	Multiple Magnetic-Gauge Measurements: Homogeneous Explosives	50
1.5.7	Multiple Magnetic-Gauge Measurements: Heterogeneous Explosives	52
1.5.8	Numerical Modeling of Initiation	55
1.6	Summary and Future Developments	56
1.7	Glossary	57
	References	59

2 First Principles Molecular Simulation of Energetic Materials at High Pressures

	<i>F. Zhang, S. Alavi, A. Hu, and T.K. Woo</i>	65
2.1	Introduction	65
2.1.1	Introduction to First Principles Molecular Simulation	66
2.1.2	Density Functional Theory	69
2.1.3	Plane Wave Basis Sets	72
2.1.4	Periodic Boundary Conditions	74
2.1.5	Molecular Dynamics	75
2.1.6	Ab initio Molecular Dynamics	77
2.2	Collision Dissociation of Nitromethane	79
2.2.1	Impact of a Single Molecule on Multiple Molecules	79
2.2.2	Impact of Multiple Molecules on Multiple Molecules	82
2.3	Pressure Dissociation of Nitromethane	86
2.4	High Pressure Non-molecular Solid Phases of Polynitrogen	89
2.4.1	Polynitrogen Phases from Simple Cubic Motifs	90
2.4.2	Polynitrogen Phases from Chain Motifs	95
2.4.3	Polynitrogen Phases from Helical Motifs	98
2.5	Final Remarks	103
	References	104

3 Combined Compression and Shear Plane Waves

	<i>Z. Tang and J.B. Aidun</i>	109
3.1	Introduction	109
3.2	Theory of Combined Stress Plane Waves	110
3.2.1	Basic Equations	110
3.2.2	Combined Compression Shear Waves in Nonlinear Elastic Solids	112
3.2.3	Combined Compression Shear Stress Plane Waves in Elastic-Plastic Materials	116
3.3	Experimental and Diagnostics Methods	123
3.3.1	Experimental Methods to Generate Combined Pressure-Shear Plane Waves	123
3.3.2	Diagnostics	130

3.4	Applications	139
3.4.1	Plasticity Under Combined Compression and Shear Loading	139
3.4.2	Investigations of Post-Yield Material Behavior	142
3.4.3	Damage and Failure Investigations for Cementitious Composites	150
3.4.4	Inclined Impact Surface Behavior Investigations	152
3.5	Summary	161
	References	163
4 Dynamic Fragmentation of Solids		
	<i>D. Grady</i>	169
4.1	Size Distributions and Probabilistic Methods in Dynamic Fragmentation	170
4.1.1	Early Applications and Empirical Distributions	172
4.1.2	Poisson Processes and Geometric Methods	177
4.1.3	Geometric Fragmentation of a Surface	180
4.1.4	Alternative Fragment Size Statistics Methods	187
4.1.5	Entropy and Energy Approaches to Fragment Distributions	196
4.2	Fragment Size in Dynamic Fragmentation	208
4.2.1	Historical Theories of Fragment Size Prediction	208
4.2.2	Weibull Critical Flaw Fragmentation	213
4.2.3	Impulse and Energy Criteria for Fragment Size	215
4.2.4	Mott Fracture with Dissipation	217
4.2.5	Mott-Wave Solutions	221
4.2.6	Energy-Based Criteria for Fragment Size	228
4.3	Dynamic Fragmentation in Brittle Materials	237
4.3.1	Gilvarry-Bergstrom Brittle Spheres	237
4.3.2	Hopkinson Bar Fragmentation	241
4.3.3	Fragmentation as a Fractal Process	246
4.3.4	Unlikelihood that Brittle Fragmentation is a Poisson Process	247
4.3.5	Scale Invariance in the Catastrophic Fracture of Brittle Solids	250
4.4	Fragmentation in the Spall Process	252
4.4.1	Spall Fragmentation from a Pulse Emerging at a Free Surface	253
4.4.2	Cohesive Zone Spall Solution	258
4.4.3	Shock Attenuation and Spall Fragmentation in a Dissipative Medium	262
	References	272
	Index	277
