Springer Handbook of Automation

Edited by **Shimon Y. Nof**, Purdue University, West Lafayette, IN, USA

- Research and application-oriented handbook on one of the hottest topics in science and technology
- Edited by an internationally renowned expert
- Ideal resource not only for experts but also for people new to this growing field, such as computer scientists, medical doctors, engineers, economists, and manufacturers

Key to the global economy, automation is undergoing a major transformation in scope and dimension. Engineers combine automated devices with mathematical and organizational tools to create complex systems for a rapidly expanding range of applications and human activities.

The **Springer Handbook of Automation**, edited by the renowned and experienced Professor Nof, incorporates these new developments. It presents a widespread and well-structured conglomeration of new emerging application

areas, including medical systems and health, transportation, security and maintenance, service, construction and retail as well as production or logistics.

Prepublication review ► *...This is an important and ambitious project, and will be of interest to those involved with the IEEE Transactions on Automation Science and Engineering. I think Shimon Nof is the perfect person for this job.* ► **Ken Goldberg**, Vice President Technical Activities IEEE Robotics and Automation Society, Chair of Advisory Board IEEE Transactions on Automation Science and Engineering

Feel free to download the sample chapter "A History of Automatic Control" from springer.com/engineering to experience the look and feel of this invaluable handbook yourself.

Advisory Board

Hans-Jörg Bullinger, Rick J. Echevarria, Yael Edan, Yukio Hasegawa, Steven W. Holland, Clyde W. Holsapple, Rolf Isermann, Kazuyoshi Ishii, Alberto Isidori, Stephen Kahne, Aditya P. Mathur, Hakkyung Sung, Gavriel Salvendy, George Stephanopoulos, Kazuo Tanie (d), Tibor Vámos, François. B. Vernadat, Birgit Vogel-Heuser, Andrew B. Whinston

Forewords by

Alberto Isidori, J. Bruce Harreld, Seiueemon Inaba, Hans-Jörg Bullinger

Table of Contents

- Development and Impacts of Automation.
- Automation Theory and Scientific Foundations
- Automation Design: Theory, Elements, and Methods
- Automation Design: Theory and Methods for Integration
- Automation Management
- Industrial Automation
- Infrastructure and Service Automation
- Automation in Medical and Healthcare Systems
- Home, Office, and Enterprise Automation
- Statistical Appendix
