Part I Joseph Lipman: Notes on Derived Functors and Grothendieck Duality

Abstract	3
Introduction	5
1 Derived and Triangulated Categories	11
1.1 The Homotopy Category \mathbf{K}	12
1.2 The Derived Category \mathbf{D}	13
1.3 Mapping Cones	15
1.4 Triangulated Categories (Δ -Categories)	16
1.5 Triangle-Preserving Functors (Δ -Functors)	25
1.6 Δ -Subcategories	29
1.7 Localizing Subcategories of \mathbf{K} ; Δ -Equivalent Categories	30
1.8 Examples	33
1.9 Complexes with Homology in a Plump Subcategory	35
1.10 Truncation Functors	36
1.11 Bounded Functors; Way-Out Lemma	38
2 Derived Functors	43
2.1 Definition of Derived Functors	43
2.2 Existence of Derived Functors	45
2.3 Right-Derived Functors via Injective Resolutions	52
2.4 Derived Homomorphism Functors	56
2.5 Derived Tensor Product	60
2.6 Adjoint Associativity	65
2.7 Acyclic Objects; Finite-Dimensional Derived Functors	71
3 Derived Direct and Inverse Image	83
3.1 Preliminaries	85
3.2 Adjointness of Derived Direct and Inverse Image	89

3.3	Δ -Adjoint Functors	97
3.4	Adjoint Functors between Monoidal Categories	101
3.5	Adjoint Functors between Closed Categories	110
3.6	Adjoint Monoidal Δ -Pseudofunctors	118
3.7	More Formal Consequences: Projection, Base Change	124
3.8	Direct Sums	131
3.9	Concentrated Scheme-Maps	132
3.10	Independent Squares; Künneth Isomorphism	144
4	Abstract Grothendieck Duality for Schemes	159
4.1	Global Duality	160
4.2	Sheafified Duality—Preliminary Form	169
4.3	Pseudo-Coherence and Quasi-Properness	171
4.4	Sheafified Duality, Base Change	177
4.5	Proof of Duality and Base Change: Outline	179
4.6	Steps in the Proof	179
4.7	Quasi-Perfect Maps	190
4.8	Two Fundamental Theorems	203
4.9	Perfect Maps of Noetherian Schemes	230
4.10	Appendix: Dualizing Complexes	239
	References	253
	Index	257
 Part II Mitsuyasu Hashimoto: Equivariant Twisted Inverses		
	Abstract	265
	Introduction	267
1	Commutativity of Diagrams Constructed from a Monoidal Pair of Pseudofunctors	271
2	Sheaves on Ringed Sites	287
3	Derived Categories and Derived Functors of Sheaves on Ringed Sites	311
4	Sheaves over a Diagram of S-Schemes	321
5	The Left and Right Inductions and the Direct and Inverse Images	327
6	Operations on Sheaves Via the Structure Data	331
7	Quasi-Coherent Sheaves Over a Diagram of Schemes	345

8	Derived Functors of Functors on Sheaves of Modules Over Diagrams of Schemes	351
9	Simplicial Objects	359
10	Descent Theory	363
11	Local Noetherian Property	371
12	Groupoid of Schemes	375
13	Bökstedt–Neeman Resolutions and HyperExt Sheaves	381
14	The Right Adjoint of the Derived Direct Image Functor	385
15	Comparison of Local Ext Sheaves	393
16	The Composition of Two Almost-Pseudofunctors	395
17	The Right Adjoint of the Derived Direct Image Functor of a Morphism of Diagrams	401
18	Commutativity of Twisted Inverse with Restrictions	405
19	Open Immersion Base Change	413
20	The Existence of Compactification and Composition Data for Diagrams of Schemes Over an Ordered Finite Category	415
21	Flat Base Change	419
22	Preservation of Quasi-Coherent Cohomology	423
23	Compatibility with Derived Direct Images	425
24	Compatibility with Derived Right Inductions	427
25	Equivariant Grothendieck’s Duality	429
26	Morphisms of Finite Flat Dimension	431
27	Cartesian Finite Morphisms	435
28	Cartesian Regular Embeddings and Cartesian Smooth Morphisms	439
29	Group Schemes Flat of Finite Type	445
30	Compatibility with Derived G-Invariance	449

31	Equivariant Dualizing Complexes and Canonical Modules	451
32	A Generalization of Watanabe's Theorem.....	457
33	Other Examples of Diagrams of Schemes	463
	Glossary	467
	References	473
	Index	477
