

# Contents

## Part I Megaplastids in Archaea

<b>Haloarchaeal Megaplastids</b> .....	3
Shiladitya DasSarma, Melinda Capes, and Priya DasSarma	

## Part II Megaplastids and Biodegradation

<b>Megaplastids and the Degradation of Aromatic Compounds by Soil Bacteria</b> .....	33
Eve Vedler	

<b>Catabolic Plasmids Involved in the Degradation of Polycyclic Aromatic Hydrocarbons and Heteroaromatic Compounds</b> .....	55
Hideaki Nojiri, Masahiro Sota, and Masaki Shintani	

## Part III Megaplastids in Plant Symbionts and Pathogens

<b><i>Sinorhizobium meliloti</i> Megaplastids and Symbiosis in <i>S. meliloti</i></b> .....	91
Frédérique Barloy-Hubler and Mohamed Jebbar	

<b>The Megaplastid pNGR234a of <i>Rhizobium</i> sp. Strain NGR234</b> .....	119
Patrick Mavingui	

<b>Ti and Ri Plasmids</b> .....	133
Katsunori Suzuki, Katsuyuki Tanaka, Shinji Yamamoto, Kazuya Kiyokawa, Kazuki Moriguchi, and Kazuo Yoshida	

## Part IV Megaplastids in Human Pathogens

<b>The Virulence Plasmids of <i>Shigella flexneri</i></b> .....	151
Charles J. Dorman	

<b>The Three Bears and Virulence-Associated Plasmids in the Genus <i>Yersinia</i>.....</b>	<b>171</b>
Sarah L. Howard, Philippa C.R. Strong, and Brendan W. Wren	
<b>Virulence Megaplasms in <i>Bacillus anthracis</i> and Their Relatives in the <i>Bacillus cereus</i> Group .....</b>	<b>187</b>
Agnès Fouet and Marie Moya	
 <b>Part V Megaplasms and Special Metabolic Functions</b>	
<b>Megaplasms in <i>Cupriavidus</i> Genus and Metal Resistance .....</b>	<b>209</b>
Max Mergeay, Sébastien Monchy, Paul Janssen, Rob Van Houdt, and Natalie Leys	
<b>Megaplasms of Aerobic Hydrogenotrophic and Carboxidotrophic Bacteria .....</b>	<b>239</b>
Edward Schwartz	
<b>The Megaplasmid pAO1 of <i>Arthrobacter Nicotinovorans</i> and Nicotine Catabolism .....</b>	<b>271</b>
Petra Ganas, Gabor L. Igloi, and Roderich Brandsch	
<b>The pMUM Megaplasmid of <i>Mycobacterium ulcerans</i> and Closely Related Mycobacteria: A Blueprint for the Synthesis of Mycolactones.....</b>	<b>283</b>
Sacha J. Pidot, Nicholas J. Tobias, and Tim Stinear	
<b>Megaplasmid pKB1 of the Rubber-Degrading Bacterium <i>Gordonia westfalica</i> Strain Kb1 .....</b>	<b>297</b>
Daniel Bröker and Alexander Steinbüchel	
<b>Megaplasmid pMP118 of <i>Lactobacillus salivarius</i> .....</b>	<b>311</b>
Paul W. O'Toole and Emma J. Raftis	
<b>Index.....</b>	<b>327</b>
