Abstract	1
1 Introduction	3
2 Theory and Model	7
2.1 Theory	7
2.1.1 Secondary Forces: The Loading and Self-Attraction Effect .	8
2.1.2 The Equations of Motion and the Equation of Continuity ...	11
2.1.3 Energy Balance	14
2.1.4 Parameterization of the LSA - An Analytical Approach	16
2.2 Model	18
2.2.1 The Implicitly Restarted Arnoldi Method	19
2.2.2 The Parallelization with MPI	21
2.2.3 The Performance of the Model	21
3 The Free Oscillations	23
3.1 Gravitational Modes	23
3.1.1 The β -value	24
3.1.2 The Influence of the LSA	25
3.1.3 The Antarctic Kelvin Wave	30
3.1.4 New Modes	30
3.1.5 The Slowest Modes	31
3.2 Vorticity Modes	32
3.2.1 Topographical Vorticity Modes	32
3.2.2 Planetary Vorticity Modes	34
4 Synthesis of Forced Oscillations	39
4.1 Tidal Dynamics and the Influence of LSA	40
4.1.1 The Procedure of Tidal Synthesis	40
4.1.2 LSA-effect on Forced Oscillations	45
4.1.3 The Synthesis of the Semidiurnal and Diurnal Tides	50

4.2 Integration of the Solutions of a Tidal Model with Assimilation of Data 55

4.2.1 New Expansion Coefficients 55

4.2.2 New Frequencies and Adjoint Eigenfunctions 59

4.2.3 Results 61

4.2.4 Summary 70

4.2.5 Discussion 71

5 Conclusion 73

Figures 75

Tables 101

Appendix 105

List of Symbols 109
