

Table of Contents

1	Introduction	1
	W. EVERSHEIM, E. BAESSLER, T. BREUER	
2	Integrated Innovation Management	5
	W. EVERSHEIM, E. BAESSLER, T. BREUER	
2.1	The Aachen Innovation Management Model AIM.....	7
2.1.1	Innovation planning	9
2.1.2	The innovation organization	16
2.1.3	Innovation Leadership	17
2.1.4	The operational level.....	18
2.2	Innovation Portfolio	19
2.3	Aachen Strategy Model for Product Innovation.....	22
3	The InnovationRoadMap Methodology	25
	W. EVERSHEIM, F. BRANDENBURG, T. BREUER, M. HILGERS, C. ROSIER	
3.1	Requirements for the methodology	26
3.2	The W-model: Structure of the IRM-Methodology.....	30
	<i>The planning phases of the IRM Methodology</i>	<i>36</i>
3.3	Goal setting	36
3.3.1	The deduction of goals and strategies relevant to innovation	37
3.3.2	Analysis and development of enterprise potentials.....	39
3.3.3	Identification of strategic formation fields.....	40
3.4	Future analysis.....	45
3.4.1	Finding future requirements.....	47
3.4.2	Chance analysis.....	56
3.4.3	Task definition	58

3.5	Idea generation	66
3.5.1	Analysis of the innovation task	67
3.5.2	Collection and generation of primary product ideas	69
3.5.3	Structuring and condensing of ideas	69
3.5.4	Formulation of secondary product ideas	70
3.6	Idea evaluation	76
3.6.1	Set-up of a rating and evaluation system	77
3.6.2	Evaluation of product ideas.....	80
3.7	Idea detailing	88
3.8	Concept Evaluation	95
3.8.1	Evaluation of the requirements fulfillment	97
3.8.2	Evaluation of the technical feasibility	98
3.8.3	Economic considerations	99
3.9	Implementation Planning.....	105
3.9.1	Grouping and structuring of the future projections and innovation tasks	107
3.9.2	Correlating market-deduced and technology-based innovation tasks	108
3.9.3	Deduction of company-specific implementation activities	109
3.10	Conclusions for the IRM Methodology.....	114
4	Methods Description	117
	W. EVERSHEIM, T. BREUER, M. GRAWATSCH, M. HILGERS, M. KNOCHÉ, C. ROSIER, S. SCHÖNING, D. E. SPIELBERG	
4.1	Scenario Management	119
4.2	Quality Function Deployment (QFD).....	124
4.3	Intuitive- and Analogy-based Solution Finding	129
4.3.1	Brainstorming and brainwriting including the 6-3-5 method.....	130
4.3.2	Synectics	132
4.4	TRIZ Methodology.....	135
4.4.1	Innovation checklist	137
4.4.2	Problem formulation/Effect structure analysis.....	139
4.4.3	Ideality	141
4.4.4	Anticipative error detection	143
4.4.5	Analysis of technical conflicts: contradiction matrix.....	144
4.4.6	Analysis of physical contradictions: separation principles	146
4.4.7	Effects database	148
4.4.8	Substance-Field (S-Field) analysis.....	149
4.4.9	76 Standard solutions.....	151
4.4.10	Laws of Technical Systems Evolution.....	151
4.5	Laws of Technical Systems Evolution	154

4.6	Bionics.....	165
4.6.1	Direct use of biological systems	168
4.6.2	Biological structures	168
4.6.3	Laws of evolution and other biological principles	169
4.6.4	Inspiration from nature	172
4.7	Portfolio Analysis.....	175
4.7.1	Market portfolio	177
4.7.2	Portfolio of the Boston Consulting Group	177
4.7.3	Technology portfolio	180
4.7.4	Technology portfolio according to PFEIFFER	182
4.7.5	Potential portfolio according to PELZER (Fraunhofer IPT)	184
4.7.6	Portfolio use on the example of Hilti AG	186
4.7.7	Critical appreciation of technology portfolios	188
4.8	Conjoint Analysis	189
4.8.1	Steps for the realization of the conjoint analysis.....	191
4.8.2	Choice of product characteristics and the corresponding specifications	191
4.8.3	Choice of preference model and design	193
4.8.4	Presentation of stimuli and interview	195
4.8.5	Selection of the estimation procedure for the determination of part worth utilities.....	197
4.8.6	Analysis and interpretation of the results.....	198
4.9	Technology Roadmapping.....	202
4.9.1	Technology calendar according to SCHMITZ (Fraunhofer IPT)..	203
4.9.2	Usages of the technology calendar.....	206
4.9.3	ProjectRoadMap – combination of InnovationRoadMap and technology calendar.....	208
5	Case studies.....	211
5.1	SCHOTT Glas “How a manufacturer of materials became a provider of systems”	213
	U. H. BÖHLKE, M. GRAWATSCH	
5.2	Hilti AG “Strategic Exploitation of New Business Fields”	220
	W. J. HUPPMANN, T. BREUER	
5.3	SUSPA Holding GmbH “Developing existing markets, discovering new opportunities”	233
	D. E. SPIELBERG	
5.4	Survey “MicroMed 2000+” “Discovering applications in growth markets”. 246	
	C. ROSIER	
5.5	Neumag GmbH & Co. KG “Systematic innovation management as the basis for effectiveness in product development”	263
	C. VOIGTLÄNDER, T. BAUERNHANSL, J. SCHRÖDER	

5.6	Dräger Medical AG & Co. KGaA “Reorganization of the business process Innovation”	273
	R.-H. LOHSE, M. HILGERS	
Bibliography.....		291
Appendix		317
Appendix A	Method Data Sheets (Gerhards 2002).....	319
	A. GERHARDS	
Appendix B	Selected tools of the TRIZ-Methodology	397
	The 39 technical parameters of the TRIZ-Methodology	397
	The Contradiction Matrix (Temiko et al. 1998)	401
	The 40 Inventive Principles (according to the TRIZ methodology).....	409
Appendix C	Product-idea data-sheet.....	421
Appendix D	EDEN™ as software platform to support the Aachen Innovation Model	425
	Introduction to EDEN™.....	425
	The EDEN™ Graphical User Interface	426
	How EDEN™ is supporting the Aachen Innovation Model.....	428
	Accessing EDEN™	431
Index		433
Editor and Authors.....		437

Innovation Management for Technical Products
Systematic and Integrated Product Development and
Production Planning

Eversheim, W. (Ed.)

2009, XII, 444 p. 100 illus., Hardcover

ISBN: 978-3-540-85726-6
