## Contents

### A Primer on Stochastic Partial Differential Equations

<i>Davar Khoshnevisan</i> . . . . .	1
1    What is an SPDE? . . . . .	1
2    Gaussian Random Vectors . . . . .	2
3    Gaussian Processes . . . . .	2
4    Regularity of Random Processes . . . . .	8
5    Martingale Measures . . . . .	14
6    A Nonlinear Heat Equation . . . . .	23
7    From Chaos to Order . . . . .	32
References . . . . .	36

### The Stochastic Wave Equation

<i>Robert C. Dalang</i> . . . . .	39
1    Introduction . . . . .	39
2    The Stochastic Wave Equation . . . . .	41
3    Spatially Homogeneous Gaussian Noise . . . . .	47
4    The Wave Equation in Spatial Dimension 2 . . . . .	49
5    A Function-Valued Stochastic Integral . . . . .	56
6    The Wave Equation in Spatial Dimension $d \geq 1$ . . . . .	58
7    Spatial Regularity of the Stochastic Integral ( $d = 3$ ) . . . . .	61
8    Hölder-Continuity in the 3-d Wave Equation . . . . .	70
References . . . . .	71

### Application of Malliavin Calculus to Stochastic Partial Differential Equations

<i>David Nualart</i> . . . . .	73
1    Introduction . . . . .	73
2    Malliavin Calculus . . . . .	73
3    Application of Malliavin Calculus to Regularity of Probability Laws . . . . .	83
4    Stochastic Heat Equation . . . . .	92

X      Contents

5	Spatially Homogeneous SPDEs .....	99
	References .....	108

**Some Tools and Results for Parabolic Stochastic Partial  
Differential Equations**

	<i>Carl Mueller</i> .....	111
1	Introduction .....	111
2	Basic Framework .....	113
3	Duality .....	115
4	Large Deviations for SPDEs .....	125
5	A Comparison Theorem .....	129
6	Applications .....	131
	References .....	142

**Sample Path Properties of Anisotropic Gaussian Random  
Fields**

	<i>Yimin Xiao</i> .....	145
1	Introduction .....	145
2	Examples and General Assumptions .....	148
3	Properties of Strong Local Nondeterminism .....	160
4	Modulus of Continuity .....	164
5	Small Ball Probabilities .....	168
6	Hausdorff and Packing Dimensions of the Range and Graph .....	170
7	Hausdorff Dimension of the Level Sets and Hitting Probabilities ..	183
8	Local Times and Their Joint Continuity .....	194
	References .....	207

	<b>List of Participants</b> .....	213
