1	Introduction	1
1.1	Stable and unstable leaves	1
1.2	Marking	3
1.3	Metric	4
1.4	Interval notation	5
1.5	Basic holonomies	6
1.6	Foliated atlas	6
1.7	Foliated atlas $\mathcal{A}^t(g, \rho)$	8
1.8	Straightened graph-like charts	10
1.9	Orthogonal atlas	17
1.10	Further literature	19
2	HR structures	21
2.1	Conjugacies	21
2.2	HR - Hölder ratios	22
2.3	Foliated atlas $\mathcal{A}(r)$	23
2.4	Invariants	25
2.5	HR Orthogonal atlas	27
2.6	Complete invariant	28
2.7	Moduli space	33
2.8	Further literature	36
3	Solenoid functions	37
3.1	Realized solenoid functions	37
3.2	Hölder continuity	38
3.3	Matching condition	38
3.4	Boundary condition	39
3.5	Scaling function	40
3.6	Cylinder-gap condition	41
3.7	Solenoid functions	41
3.8	Further literature	43

4	Self-renormalizable structures	45
4.1	Train-tracks	45
4.2	Charts	47
4.3	Markov maps	47
4.4	Exchange pseudo-groups	48
4.5	Markings	49
4.6	Self-renormalizable structures	51
4.7	Hyperbolic diffeomorphisms	52
4.8	Explosion of smoothness	52
4.9	Further literature	53
5	Rigidity	55
5.1	Complete sets of holonomies	55
5.2	$C^{1,1}$ diffeomorphisms	58
5.3	C^{1,HD^t} and cross-ratio distortions for ratio functions	59
5.4	Fundamental Rigidity Lemma	62
5.5	Existence of affine models	65
5.6	Proof of the hyperbolic and Anosov rigidity	67
5.7	Twin leaves for codimension 1 attractors	68
5.8	Non-existence of affine models	70
5.9	Non-existence of uniformly C^{1,HD^t} complete sets of holonomies for codimension 1 attractors	71
5.10	Further literature	72
6	Gibbs measures	73
6.1	Dual symbolic sets	73
6.2	Weighted scaling function and Jacobian	74
6.3	Weighted ratio structure	75
6.4	Gibbs measure and its dual	76
6.5	Further literature	84
7	Measure scaling functions	85
7.1	Gibbs measures	85
7.2	Extended measure scaling function	86
7.3	Further literature	92
8	Measure solenoid functions	93
8.1	Measure solenoid functions	93
8.1.1	Cylinder-cylinder condition	94
8.2	Measure ratio functions	95
8.3	Natural geometric measures	96
8.4	Measure ratio functions and self-renormalizable structures	99
8.5	Dual measure ratio function	104
8.6	Further literature	106

9 Cocycle-gap pairs	107
9.1 Measure-length ratio cocycle	107
9.2 Gap ratio function	109
9.3 Ratio functions	109
9.4 Cocycle-gap pairs	111
9.5 Further literature	117
10 Hausdorff realizations	119
10.1 One-dimensional realizations of Gibbs measures	119
10.2 Two-dimensional realizations of Gibbs measures	122
10.3 Invariant Hausdorff measures	127
10.3.1 Moduli space \mathcal{SOL}'	131
10.3.2 Moduli space of cocycle-gap pairs	132
10.3.3 δ_ϵ -bounded solenoid equivalence class of Gibbs measures	132
10.4 Further literature	134
11 Extended Livšic-Sinai eigenvalue formula	135
11.1 Extending the eigenvalues's result of De la Llave, Marco and Moriyon	135
11.2 Extending the eigenvalue formula of A. N. Livšic and Ja. G. Sinai	140
11.3 Further literature	141
12 Arc exchange systems and renormalization	143
12.1 Arc exchange systems	143
12.1.1 Induced arc exchange systems	145
12.2 Renormalization of arc exchange systems	148
12.2.1 Renormalization of induced arc exchange systems	150
12.3 Markov maps versus renormalization	152
12.4 C^{1+H} flexibility	155
12.5 $C^{1,HD}$ rigidity	156
12.6 Further literature	159
13 Golden tilings (in collaboration with J.P. Almeida and A. Portela)	161
13.1 Golden diffeomorphisms	161
13.1.1 Golden train-track	162
13.1.2 Golden arc exchange systems	163
13.1.3 Golden renormalization	165
13.1.4 Golden Markov maps	167
13.2 Anosov diffeomorphisms	168
13.2.1 Golden diffeomorphisms	169
13.2.2 Arc exchange system	170
13.2.3 Markov maps	172
13.2.4 Exchange pseudo-groups	173

13.2.5	Self-renormalizable structures	174
13.3	HR structures	174
13.4	Fibonacci decomposition	175
13.4.1	Matching condition	176
13.4.2	Boundary condition	176
13.4.3	The exponentially fast Fibonacci repetitive property	177
13.4.4	Golden tilings	177
13.4.5	Golden tilings versus solenoid functions	178
13.4.6	Golden tilings versus Anosov diffeomorphisms	181
13.5	Further literature	182
14	Pseudo-Anosov diffeomorphisms in pseudo-surfaces	183
14.1	Affine pseudo-Anosov maps	183
14.2	Paper models Σ_k	184
14.3	Pseudo-linear algebra	186
14.4	Pseudo-differentiable maps	191
14.4.1	C^r pseudo-manifolds	194
14.4.2	Pseudo-tangent spaces	195
14.4.3	Pseudo-inner product on Σ_k	195
14.5	C^r foliations	198
14.6	Further literature	199
A	Appendix A: Classifying C^{1+} structures on the real line	201
A.1	The grid	201
A.2	Cross-ratio distortion of grids	202
A.3	Quasisymmetric homeomorphisms	204
A.4	Horizontal and vertical translations of ratio distortions	207
A.5	Uniformly asymptotically affine (uaa) homeomorphisms	214
A.6	C^{1+r} diffeomorphisms	224
A.7	C^{2+r} diffeomorphisms	228
A.8	Cross-ratio distortion and smoothness	232
A.9	Further literature	233
B	Appendix B: Classifying C^{1+} structures on Cantor sets	235
B.1	Smooth structures on trees	235
B.1.1	Examples	236
B.2	Basic definitions	239
B.3	$(1 + \alpha)$ -contact equivalence	240
B.3.1	$(1 + \alpha)$ scale and contact equivalence	241
B.3.2	A refinement of the equivalence property	242
B.3.3	The map L_t	243
B.3.4	The definition of the contact and gap maps	246
B.3.5	The map L_n	247
B.3.6	The sequence of maps L_n converge	247
B.3.7	The map L_∞	251

B.3.8	Sufficient condition for $C^{1+\alpha^-}$ -equivalent	252
B.3.9	Necessary condition for $C^{1+\alpha^-}$ -equivalent	252
B.4	Smooth structures with α -controlled geometry and bounded geometry	254
B.4.1	Bounded geometry	257
B.5	Further literature	259
C	Appendix C: Expanding dynamics of the circle	261
C.1	$C^{1+Hölder}$ structures U for the expanding circle map E	261
C.2	Solenoids (\tilde{E}, \tilde{S})	263
C.3	Solenoid functions $s : C \rightarrow \mathbb{R}^+$	265
C.4	d-Adic tilings and grids	267
C.5	Solenoidal charts for the $C^{1+Hölder}$ expanding circle map E	269
C.6	Smooth properties of solenoidal charts	271
C.7	A Teichmüller space	272
C.8	Sullivan's solenoidal surfaces	273
C.9	(Uaa) structures U for the expanding circle map E	274
C.10	Regularities of the solenoidal charts	275
C.11	Further literature	277
D	Appendix D: Markov maps on train-tracks	279
D.1	Cookie-cutters	279
D.2	Pronged singularities in pseudo-Anosov maps	280
D.3	Train-tracks	281
D.3.1	Train-track obtained by glueing	282
D.4	Markov maps	283
D.5	The scaling function	286
D.5.1	A Hölder scaling function without a corresponding smooth Markov map	290
D.6	Smoothness of Markov maps and geometry of the cylinder structures	291
D.6.1	Solenoid set	291
D.6.2	Pre-solenoid functions	292
D.6.3	The solenoid property of a cylinder structure	293
D.6.4	The solenoid equivalence between cylinder structures	295
D.7	Solenoid functions	297
D.7.1	Turntable condition	298
D.7.2	Matching condition	298
D.8	Examples of solenoid functions for Markov maps	299
D.8.1	The horocycle maps and the diffeomorphisms of the circle	300
D.8.2	Connections of a smooth Markov map	301
D.9	α -solenoid functions	302
D.10	Canonical set C of charts	303
D.11	One-to-one correspondences	305

D.12 Existence of eigenvalues for (uaa) Markov maps	307
D.13 Further literature	311
E Appendix E: Explosion of smoothness for Markov families .	313
E.1 Markov families on train-tracks	313
E.1.1 Train-tracks	313
E.1.2 Markov families	314
E.1.3 (Uaa) Markov families	315
E.1.4 Bounded Geometry	318
E.2 (Uaa) conjugacies	319
E.3 Canonical charts	324
E.4 Smooth bounds for C^r Markov families	325
E.4.1 Arzelà-Ascoli Theorem	330
E.5 Smooth conjugacies	331
E.6 Further literature	334
References	335
