

## Contents

<b>DNA in Metal Catalysis</b> . . . . .	1
Ewold W. Dijk, Ben L. Feringa, and Gerard Roelfes	
<b>Artificial Metalloproteins Exploiting Vacant Space: Preparation, Structures, and Functions</b> . . . . .	25
Satoshi Abe, Takafumi Ueno, and Yoshihito Watanabe	
<b>Manganese-Substituted <math>\alpha</math>-Carbonic Anhydrase as an Enantioselective Peroxidase</b> . . . . .	45
Qing Jing, Krzysztof Okrasa, and Romas J. Kazlauskas	
<b>Directed Evolution of Stereoselective Hybrid Catalysts</b> . . . . .	63
Manfred T. Reetz	
<b>Artificial Metalloenzymes for Enantioselective Catalysis Based on the Biotin–Avidin Technology</b> . . . . .	93
Johannes Steinreiber and Thomas R. Ward	
<b>Index</b> . . . . .	113
