

Contents

1	Introduction: Common Themes Across Diverse Taxa	1
1.1	Resource Supply and Organismal Demand	1
1.2	Principal Components of Animals and Plants	4
1.3	Scaling Body Size and Demands for Energy and Nutrients	9
1.4	Dietary Requirements and Nutritional Niche	11
1.5	Summary: Introduction	15
Part I	Functional Relationships	17
2	Food and Populations	19
2.1	Population Growth and Animal Density	19
2.2	Individual Demands and Food Limits	22
2.3	Trophic Relationships	24
2.4	Environmental Variation	28
2.5	Summary: Populations	31
3	Feeding Dynamics: Functional and Behavioral Responses	33
3.1	Functional Response and Diet Breadth	34
3.2	Predicting Foraging Behavior with Models	36
3.2.1	Optimal Foraging Time	37
3.2.2	Risk-Sensitive Foraging	39
3.3	Mechanics of Foraging	42
3.4	Form and Function of the Mouth	43
3.5	Mechanisms of Food Selection	48
3.5.1	Physical Characteristics of Foods	48
3.5.2	Chemical Characteristics of Foods	49
3.6	Summary: Feeding Dynamics	52
4	Measuring Food Consumption	53
4.1	Adjustment and Steady State	54
4.2	Direct Measures of Intake	57
4.2.1	Behavioral Observations of Food Intake	57
4.2.2	Food Intake by Mass Balance	60

4.2.3	Digestible and Metabolizable Food Intake	61
4.3	Indirect Measures of Intake	63
4.3.1	Measuring Intake with Indigestible Markers	64
4.3.2	Measuring Intake with Digestible Markers	69
4.4	Summary: Food Consumption	72
5	Digestive Function.....	73
5.1	Food Intake, Digestive Efficiency and Digestive Tract Capacity	73
5.2	Reaction Rates and Retention Time.....	78
5.3	Common Functions of Digestive Systems	81
5.4	Digesta Flow	87
5.4.1	Digesta Flow in the Foregut of Ruminants and Kangaroos	88
5.4.2	Digesta Flow in the Hindgut of Herbivores	90
5.5	Optimizing Digestive Systems	91
5.6	Summary: Digestive Function	93
Part II	Substrates and Tissue Constituents	95
6	Carbohydrates: Sugars, Fiber and Fermentation.....	97
6.1	Complementary Substrates for Metabolism.....	97
6.2	Functions of Carbohydrates	98
6.3	Functional Chemistry of Carbohydrates	99
6.4	Digestion and Absorption of Non-Structural Carbohydrates.....	104
6.5	Glucose Metabolism and Homeostasis	106
6.6	Digestion of Structural Carbohydrates.....	109
6.7	Microbial Fermentation	113
6.7.1	Host–Microbe Relationships	114
6.8	Summary: Carbohydrates.....	118
7	Lipids: Fatty Acids and Adipose Tissue.....	119
7.1	Functional Chemistry of Fatty Acids	119
7.2	Classes of Lipids	124
7.3	Digestion and Transport of Lipids	126
7.4	Fat Synthesis and Mobilization.....	129
7.5	Summary: Lipids.....	131
8	Nitrogenous Substrates: Nucleic Acids to Amino Excretion.....	133
8.1	Amino Acids and Essentiality.....	133
8.2	Proteins and Digestion	138
8.3	Intermediary Metabolism of Amino Acids	142
8.4	Nucleic Acids and Digestion	143
8.5	Nitrogen Metabolism	145
8.5.1	Ammonia	145
8.5.2	Urea.....	147

8.5.3	Uric Acid	148
8.5.4	Creatinine	149
8.6	Nitrogen Balance and the Requirement for N	150
8.6.1	Endogenous Urinary N.....	151
8.6.2	Fecal N Losses.....	152
8.6.3	Protein Quality	154
8.7	Summary: Nitrogen	155
9	Metabolic Constituents: Water, Minerals and Vitamins	157
9.1	Water and Electrolytes	157
9.1.1	Transport Mechanisms	160
9.1.2	Aquatic Exchanges of Water	161
9.1.3	Terrestrial Exchanges of Water	164
9.1.4	Water Turnover and Balance	165
9.2	Minerals	170
9.2.1	Sodium, Chlorine and Potassium	173
9.2.2	Calcium and Phosphorus	176
9.2.3	Magnesium and Sulfur	181
9.2.4	Trace Metals	183
9.2.5	Iodine and Selenium.....	187
9.3	Vitamins	190
9.3.1	Water-Soluble Vitamins.....	193
9.3.2	Fat-Soluble Vitamins.....	196
9.4	Summary: Metabolic Constituents	206
Part III	Energy and Integration	207
10	Energy: Carbon as a Fuel and a Tissue Constituent	209
10.1	Energy Flow and Balance	209
10.1.1	Digestible Energy	209
10.1.2	Metabolizable Energy.....	210
10.1.3	Net Energy.....	213
10.2	Measuring Energy Expenditure	214
10.3	Basal Metabolism and Maintenance of the Body	218
10.4	Temperature	220
10.4.1	Ectothermy	221
10.4.2	Endothermy	222
10.5	Activity	226
10.6	Energy Budgets and Field Metabolic Rate	231
10.7	Body Condition.....	231
10.7.1	Morphometry.....	232
10.7.2	Chemical Composition	234
10.8	Survival	237
10.9	Reproduction.....	240
10.9.1	Life History	240

10.9.2	Capital–Income Continuum	246
10.10	Growth	249
10.11	Summary: Energy	255
11	Integrating Nutrient Supply and Demand	
	in Variable Environments.....	257
11.1	Neuro-Endocrine Integration of Food Intake and Metabolism	259
11.2	Stressors	263
11.3	Plasticity of Food Intake and Production.....	267
11.4	Global Climate Change.....	275
11.5	Resilience and Wildlife.....	278
11.6	Conclusion	284
	References	285
	List of Common and Scientific Names of Animals and Plants.....	325
	Index.....	333
