

Contents

List of Acronyms	xv
Part I Basics	
1 Matter on the Nanoscale	3
1.1 Nanotechnology and the ($N + 1$) Problem	4
1.2 Microelectronics is a Nanotechnology	5
1.3 From Microelectronics to Molecular Electronics	6
2 Top-Down Paradigm to Miniaturization	9
2.1 The Path Toward Size Reduction	10
2.2 Going Down with Device Size is a Hard Uphill Path	14
2.2.1 The Physical Limit	14
2.2.2 The Technological Limit	15
2.2.3 The Economic Limit	16
2.3 Going Beneath the Limiting Size	17
3 Physical Limits to Miniaturization	19
3.1 A Case Study: The Limits of Computation	19
3.2 The Basic Computational Unit	20
3.3 Programming	24
3.3.1 Limits Imposed by the Uncertainty Principle	24
3.3.2 Limits Imposed by Ballistic Material Motion	25
3.3.3 Limits Imposed by the Thermal Embedding	26
3.4 Computation and Irreversibility	29
3.4.1 Irreversible Computation	29
3.4.2 Reversible Computation	30
3.4.3 Minimum Dissipation	32
3.4.4 Computation and Measure	36
3.5 Reading	39
3.5.1 Coupling the Carrier with the External World	40
3.5.2 Physical Limits in READ Operation	40
3.5.3 A Little Step Toward Practical Implementation	44

4	The Crossbar Structure	45
4.1	The Crossbar Process	46
4.2	Process Integration	50
4.3	Why Molecules?	51
5	Crossbar Production	53
5.1	Imprint Lithography	54
5.2	Spacer Patterning Technology	56
5.3	Multispacer Patterning Technology	56
5.3.1	Multiplicative Route: S^nPT_{\times}	57
5.3.2	Additive Route: S^nPT_{+}	61
5.4	Minimum Exploitable Bar Width	67
6	The Litho-to-Nano link	69
6.1	The Horizontal Beveling Technique	71
6.2	Fusing Adjacent Lines in S^nPT_{+}	72
6.3	Energetic Filtering	75
6.4	Technology and Architecture	77
6.5	Not Only Crossbars	79
6.5.1	Supercapacitors	80
6.5.2	Photoluminescent Nanosheets	80
6.5.3	Nanowire Arrays as Seebeck Generators	81
7	Functional Molecules	83
7.1	The Molecule as a One-Dimensional Wire	83
7.1.1	The Role of Contacts: Landauer Resistance	84
7.1.2	Barrier Transparency	84
7.2	Conduction Along Alkanes	87
7.3	Switchable π -Conjugated Molecules	88
7.4	Molecules Exhibiting Superexchange Conduction	90
7.5	A Comparison of the Switching Mechanisms	92
8	Grafting Functional Molecules	95
8.1	Silicon and Its Surfaces	95
8.1.1	Silicon Chemistry	97
8.1.2	The Role of Surfaces	98
8.1.3	The Surface of Single-Crystalline Silicon	99
8.1.4	The Surface of Polycrystalline Silicon	105
8.1.5	The Surface of Porous Silicon	106
8.1.6	Inner Surfaces and the Fantastic Chemistry in Nanocavities	107
8.2	Routes for Silicon Functionalization	111
8.2.1	Hydrosilation	113
8.2.2	Hydrosilation at the Hydrogen-Terminated (1 0 0) Si Surface	114

8.3	Grafting in Restricted Geometries	116
8.4	Three-Terminal Molecules	123
8.5	Nanostructured Oxo-Bonded Silicon	125
8.5.1	Hydrothermal Synthesis: Zeolites	126
8.5.2	Hydrolysis and Polycondensation: Aerogels	127
Concluding Remarks		131
 Part II Advanced Topics: Self-Similar Structures, Molecular Motors, and Nanobiosystems		
9	Examples	135
9.1	Hybrid Molecule–MOS-FET Combination	135
9.2	Crossbar Functionalization	137
10	Self-Similar Nanostructures	141
10.1	Fractals	141
10.1.1	Queer Systems	141
10.1.2	Fractals in Mathematics	142
10.2	Fractals in Nature	143
10.2.1	Fractal Biological Systems	143
10.2.2	Fractal Surfaces	144
10.3	Fractals in Technology	146
11	Molecular Motors	151
11.1	Molecular Building Blocks	153
11.2	Controlling Movement with Electric Field	155
11.3	Combining Ballistic and Brownian Motions	157
11.4	Brownian Motors	160
12	Nanobiosensing	165
12.1	Reducing Cell Biology to Molecular Biology	165
12.2	From Molecular Biology to Systems Biology	168
12.3	Sensing as a Key Tool for Systems Biology	169
12.4	From ICs to Nanobiosensors	170
12.4.1	The Incremental Increase of Complexity of ICs and Sensors	171
12.4.2	The Shift of Paradigm	172
12.5	A Roadmap for Nanobiosensing	174
12.5.1	Nanobiosensing In Vitro	174
12.5.2	Nanobiosensing In Vivo	177

13 Abstract Technology	179
13.1 Material Bodies and Surfaces	180
13.2 Processes Controlled by Geometry	181
13.2.1 Conformal Processes	182
13.2.2 Directional Processes	184
13.3 Processes Controlled by the Material	186
13.4 Abstract Technology in Concrete	188
References	191
Index	201

Nanoscale Devices

Fabrication, Functionalization, and Accessibility from
the Macroscopic World

Cerofolini, G.

2009, XVI, 205 p. 84 illus., 54 illus. in color., Hardcover

ISBN: 978-3-540-92731-0
