1	ANEPI: Economic Analysis of Oil Field Development Projects under Uncertainty	1
	<i>Alexandre Anozé Emerick, Marco Aurélio Cavalcanti Pacheco, Marley Maria Bernardes Rebuzzi Vellasco, Marco Antonio G. Dias, Juan Guillermo Lazo Lazo</i>	
1.1	Introduction.....	1
1.2	Objectives of Economic Analysis of Oil Field Development Projects under Uncertainty.....	1
1.3	Why Economic Analysis of Oil Field Development Projects under Uncertainty?.....	3
1.4	Characteristics and Products of Economic Analysis of Oil Field Development Projects under Uncertainty.....	3
1.5	Economic Analysis Methodologies for Oil Field Development Projects under Uncertainty.....	4
2	Real Options Theory.....	7
	<i>Juan Guillermo Lazo Lazo, Marco Aurélio Cavalcanti Pacheco, Marley Maria Bernardes Rebuzzi Vellasco</i>	
2.1	Introduction	7
2.2	Financial Options.....	7
2.2.1	Call Options.....	8
2.2.2	Put Options.....	8
2.3	Real Options.....	10
2.3.1	Types of Real Options	11
2.3.1.1	Abandonment Option.....	12
2.3.1.2	Temporary Shut-Down Option.....	12
2.3.1.3	Option to Exchange One Group of Commodities for Another.....	12
2.3.1.4	Future Growth Option.....	13
2.3.1.5	Option to Defer Investment.....	13
2.3.1.6	Option to Expand.....	13
2.3.1.7	Option to Contract.....	14
2.3.2	Real Options Valuation Methods.....	14
2.3.3	Contingent Claims.....	15
2.3.4	Dynamic Programming.....	16

2.3.5	Numerical Methods.....	16
2.3.6	Simulation Techniques.....	18
2.3.6.1	European-style Options.....	19
2.3.6.2	American-style Options.....	20
	References.....	21
3	Decision Support Methods.....	23
	<i>André Vargas Abs da Cruz, Carlos Hall Barbosa,</i>	
	<i>Juan Guillermo Lazo Lazo, Karla Figueiredo, Luciana Faletti Almeida,</i>	
	<i>Marco Aurélio Cavalcanti Pacheco,</i>	
	<i>Marley Maria Bernardes Rebuzzi Vellasco, Yván Jesús Túpac Valdivia</i>	
3.1	Evolutionary Computation.....	23
3.1.1	Genetic Algorithms.....	23
3.1.1.1	Representation.....	24
3.1.1.2	Evaluation.....	25
3.1.1.3	Genetic Operators.....	25
3.1.1.4	Evolution Parameters.....	26
3.1.2	Cultural Algorithms.....	27
3.1.2.1	Cultural Algorithm Components.....	28
3.1.2.2	Representation of the Belief Space.....	29
3.1.2.3	Updating the Belief Space.....	29
3.1.2.4	Specialization.....	30
3.1.2.5	Generalization.....	30
3.1.2.6	Splitting.....	30
3.1.2.7	Merging.....	30
3.1.3	Coevolution.....	30
3.1.4	Genetic Programming (GP).....	31
3.1.4.1	Representation.....	32
3.1.4.2	Preparation for Genetic Programming.....	33
3.1.4.3	Evaluation.....	34
3.1.4.4	Operators.....	36
3.1.4.5	Evolutionary Techniques.....	39
3.1.4.6	Control Parameters.....	40
3.1.4.7	Symbolic Regression.....	40
3.1.4.8	Enhancement Techniques for GP.....	41
3.1.5	Quantum-Inspired Genetic Algorithm.....	43
3.1.5.1	Current Representation of the Chromosome.....	44
3.1.5.2	Quantum-Inspired Evolutionary Algorithms.....	44
3.1.5.3	Application to the Well Placement Problem.....	46
3.1.5.4	Results.....	49
3.1.6	Parallel Genetic Algorithms.....	50
3.1.6.1	Global Parallel Genetic Algorithms.....	50
3.1.6.2	Island Parallel Genetic Algorithms.....	52
3.1.6.3	Parallel Cellular Genetic Algorithms.....	53
3.2	Neural Networks.....	54
3.2.1	History.....	54
3.2.2	Definition.....	55

3.2.3	The Artificial Neuron.....	55
3.2.4	Activation Function.....	56
3.2.5	Artificial Neural Network Topology.....	57
3.2.6	Type of Training.....	58
3.2.7	Backpropagation.....	59
3.2.8	Elman Networks.....	60
3.2.9	Radial Basis Functions – RBF.....	63
3.2.9.1	Radial Basis Function Neural Networks.....	64
3.2.9.2	Approximation Properties of RBF Networks.....	64
3.2.9.3	The Dimensionality Problem.....	66
3.3	Fuzzy Logic.....	66
3.3.1	Fuzzy Sets Theory.....	66
3.3.1.1	Fuzzy Set.....	67
3.3.1.2	Singleton Set.....	68
3.3.1.3	α -Cut of a Fuzzy Set.....	68
3.3.2	Fuzzy Logic.....	69
3.3.3	Fuzzy Inference System.....	70
3.3.4	Fuzzy Numbers.....	71
3.3.4.1	Triangular Fuzzy Number.....	73
3.3.4.2	Trapezoidal Fuzzy Number.....	74
3.3.4.3	Interval Arithmetic.....	75
3.3.4.4	Operations on Fuzzy Numbers.....	76
3.4	Neuro-Fuzzy Models.....	80
3.4.1	Hierarchical Neuro-Fuzzy BSP System.....	81
3.4.2	Hierarchical Neuro-Fuzzy BSP Model.....	82
3.4.2.1	BSP Partitioning.....	82
3.4.2.2	Neuro-Fuzzy BSP Cell.....	83
3.4.2.3	HNFB Architecture.....	85
3.4.3	Learning Algorithm.....	88
	References.....	93
4	Intelligent Optimization System for Selecting Alternatives for Oil Field Exploration by Means of Evolutionary Computation.....	97
	<i>Alexandre Anozé Emerick, Yván Jesús Túpac Valdivia, Luciana Faletti Almeida, Marco Aurélio Cavalcanti Pacheco, Marley Maria Bernardes Rebuzzi Vellasco, Ricardo Cunha Mattos Portella</i>	
4.1	Introduction.....	97
4.2	System Modeling.....	97
4.3	Representation of the Chromosome for the Genetic Algorithm.....	98
4.4	Variable Size Chromosome.....	98
4.5	Chromosome Encoding.....	99
4.6	Genetic Operators.....	101
4.7	Evaluation Function.....	102
4.8	Chromosome Validation.....	104
4.9	Hybridization of the Genetic Algorithm with a Cultural Algorithm.....	105

4.10	Belief Space Representation.....	106
4.11	Communication Protocol.....	107
4.11.1	Voting Process.....	107
4.11.2	Promotion Process.....	107
4.11.3	Adjusting the Belief Space.....	108
4.12	Population Modeling for Cooperative Coevolution.....	109
4.13	Customizations in the Implemented Intelligent Systems.....	110
4.14	Use of a Priori Available Strategic Information for Optimization by Genetic Algorithms.....	113
4.14.1	Quality Maps.....	113
4.14.2	Quality Map: Definition.....	114
4.14.3	Quality Map Generation.....	115
4.14.3.1	Approximation of Quality Maps through the Hierarchical Neuro-Fuzzy Model.....	115
4.14.3.2	Quality Map Interpolation Experiments.....	118
4.14.4	Using the Quality Map in the Initialization of the Initial Population.....	120
4.14.5	Using Quality Map Information during the Genetic Algorithm Evolution Process.....	122
4.15	On-Line Approximator for the Flow Simulator.....	125
4.15.1	Flow Approximation with FF-BP, Elman and RBF Neural Networks.....	125
4.15.1.1	Model Based on Curve Points.....	125
4.15.1.2	Approximation Experiments: Curve Points.....	126
4.15.2	Integration of the HNFB Model in the ANEPI-3 Module.....	130
4.16	Implementation Considerations.....	132
4.16.1	Main Interfaces Implemented in This Subsection.....	132
4.16.1.1	Optimization System Interfaces.....	132
4.16.1.2	On-Line Dialogs during Distributed Simulation.....	133
4.16.1.3	Quality Map Generation.....	134
4.16.1.4	Interface with the HNFB Module.....	135
4.16.1.5	Interface of the Evaluation / Simulation Server.....	135
4.17	Conclusions.....	136
	References.....	136
5	Real Option Value Calculation by Monte Carlo Simulation and Approximation by Fuzzy Numbers and Genetic Algorithms.....	139
	<i>Juan Guillermo Lazo Lazo, Marco Antonio G. Dias, Marco Aurélio Cavalcanti Pacheco, Marley Maria Bernardes Rebuszi Vellasco</i>	
5.1	Introduction.....	139
5.2	Description of the Method Proposed for Approximate Valuation of Real Options Using Fuzzy Numbers.....	139
5.2.1	Module: Random Sampling Generator.....	140
5.2.2	Module: Stochastic Processes for Commodity Prices.....	141
5.2.3	Module: Fuzzy Number.....	141
5.2.4	Module: Calculation of the Threshold Curve.....	142

5.2.5	Module: Monte Carlo Simulation for Determining the Option Value.....	145
5.2.6	Module: Option Value.....	145
5.3	Description of the Methodology Proposed for Obtaining an Optimal Decision Rule Approximation Using Genetic Algorithms.....	146
5.3.1	Module: Random Sampling Generator.....	146
5.3.2	Module: Stochastic Processes for Commodity Prices.....	147
5.3.3	Module: Genetic Algorithm.....	147
5.3.4	Module: Decision Rule and Option Value.....	149
5.4	Case Studies: Expansion Option Value Approximation Using Fuzzy Numbers.....	149
5.4.1	Problem Description.....	150
5.4.2	Solution by Stochastic Simulation.....	153
5.4.2.1	Valuation of the Expansion Option Using the Traditional Method.....	154
5.4.3	Solution Based on the Hybrid Stochastic-Fuzzy Method.....	155
5.4.4	Experiments and Results.....	157
5.4.4.1	Experiment 1.....	157
5.4.4.2	Experiment 2.....	159
5.4.4.3	Experiment 3.....	161
5.4.4.4	Experiment 4.....	163
5.4.5	Conclusions.....	164
5.5	Case Studies: Value of the Option to Invest in Information Using Approximation by Fuzzy Numbers.....	165
5.5.1	Problem Description.....	166
5.5.2	Solution by Stochastic Simulation.....	167
5.5.2.1	Valuation of the Option to Invest in Information Using the Traditional Methodology.....	168
5.5.3	Solution Based on the Hybrid Stochastic-Fuzzy Method.....	169
5.5.4	Experiments and Results.....	170
5.5.4.1	Experiment 1.....	171
5.5.4.2	Experiment 2.....	172
5.5.5	Conclusions.....	175
5.6	Case Studies: Obtaining an Approximation of the Optimal Decision Rule Using Genetic Algorithms.....	175
5.6.1	Problem Description.....	175
5.6.2	Modeling Oil Price Uncertainty.....	176
5.6.3	Optimal Decision Rule.....	176
5.6.4	Problem Modeling.....	177
5.6.5	Representation of the Chromosome.....	178
5.6.6	Evaluation of the Chromosome.....	181
5.6.7	Results.....	182
	References.....	185

6	Analysis of Alternatives for Oil Field Development under Uncertainty.....	187
	<i>Juan Guillermo Lazo Lazo, Alexandre Anozé Emerick, Dan Posternak, Thiago Souza Mendes Guimarães, Marco Aurélio Cavalcanti Pacheco, Marley Maria Bernardes Rebuszi Vellasco</i>	
6.1	Modular System for Alternatives Analysis.....	187
6.1.1	Problem Modeling.....	187
6.1.2	Experiments.....	193
6.1.3	Conclusion.....	196
6.2	Analysis of Alternatives under Multiple Technical Uncertainties.....	197
6.2.1	Introduction.....	197
6.2.2	Gaussian Fuzzy Numbers.....	197
6.2.3	Operations on Gaussian Fuzzy Numbers.....	199
6.2.4	Mean and Variance of Gaussian Fuzzy Numbers.....	200
6.2.5	Tests with Gaussian Fuzzy Numbers.....	201
6.2.6	LogNormal-Shaped Fuzzy Numbers.....	204
6.2.7	Operations on LogNormal-Shaped Fuzzy Numbers.....	205
6.2.8	Tests with LogNormal-Shaped Fuzzy Numbers.....	207
6.3	Methodology for Controlling Domain Growth in Fuzzy Number Operations.....	208
6.3.1	Mapping a Probability Distribution to a Fuzzy Number.....	208
6.3.2	Mapping a Fuzzy Number to a Probability Distribution.....	209
6.3.3	Conclusions.....	213
6.4	Option Value Approximation by Symbolic Regression.....	213
6.4.1	Model Description.....	214
6.4.2	Case Study.....	216
6.4.3	Results.....	217
6.4.4	Conclusion.....	223
	References.....	224
