<b>1</b>	<b>Introduction</b>	1
1.1	Problems	1
1.2	Construction of Invariants	3
1.2.1	Orientation and Reduced $L$ -Bradlow Pairs	3
1.2.2	Virtual Fundamental Classes	5
1.3	Transition Formulas in a Simple Case	6
1.4	Rank Two Case	9
1.4.1	Dependence on Polarizations	9
1.4.2	Reduction to Integrals over Hilbert Schemes	11
1.5	Higher Rank Case	12
1.5.1	$p_g > 0$	12
1.5.2	Transition Formula in the Case $p_g = 0$	13
1.5.3	Weak Intersection Rounding Formula	15
1.6	Master Space	16
1.6.1	Master Space in the Case that a 2-Stability Condition is Satisfied	17
1.6.2	$G_m$ -Localization Method (I)	19
1.6.3	Enhanced Master Space	20
1.6.4	$G_m$ -Localization Method (II)	22
<b>2</b>	<b>Preliminaries</b>	25
2.1	Some Convention	25
2.1.1	Product and Projection	25
2.1.2	Vector Bundles	26
2.1.3	Coherent Sheaves on a Product	26
2.1.4	Quotient Stacks	26
2.1.5	Signature in Complexes	26
2.1.6	Filtrations and Complexes on a Curve	27
2.1.7	Virtual Vector Bundle	28
2.1.8	Compatible Diagrams	29

2.2	Geometric Invariant Theory	29
2.2.1	GIT Quotient and Algebraic Stacks	29
2.2.2	Mumford-Hilbert Criterion and Some Elementary Examples	30
2.3	Cotangent Complex	32
2.3.1	Basic Facts	32
2.3.2	Quotient Stacks	34
2.3.3	Some More Examples	39
2.4	Obstruction Theory	44
2.4.1	Definition and Fundamental Theorems	44
2.4.2	Easy Example	46
2.4.3	Locally Free Subsheaves	48
2.4.4	Filtrations of a Vector Bundle on a Curve	51
2.5	Equivariant Complexes on Deligne-Mumford Stacks with GIT Construction	55
2.5.1	Locally Free Resolution	55
2.5.2	Equivariant Representative	56
2.6	Elementary Remarks on Some Extremal Sets	57
2.6.1	Preparation for a Proof of Proposition 4.3.3	57
2.6.2	Preparation for a Proof of Proposition 4.4.4	59
2.7	Twist of Line Bundles	61
2.7.1	Construction	61
2.7.2	Weight of the Induced Action	61
<b>3</b>	<b>Parabolic <math>L</math>-Bradlow Pairs</b>	<b>63</b>
3.1	Sheaves with Some Structure and their Moduli Stacks	64
3.1.1	Orientation	64
3.1.2	Parabolic Structure	65
3.1.3	$L$ -Bradlow Pairs and Reduced $L$ -Bradlow Pairs	66
3.1.4	Type and Moduli Stacks	68
3.1.5	Tautological Line Bundle and Relations Among Some Moduli Stacks	69
3.2	Hilbert Polynomials	71
3.2.1	Hilbert Polynomials of Coherent Sheaves	71
3.2.2	Hilbert Polynomials of Parabolic Sheaves	71
3.2.3	Hilbert Polynomial for Parabolic $L$ -Bradlow Pairs	72
3.2.4	Hilbert Polynomials Associated to a Type	72
3.3	Semistability	73
3.3.1	Semistability Conditions and the Associated Moduli Stacks	73
3.3.2	Harder-Narasimhan Filtration and Partial Jordan-Hölder Filtration	76
3.3.3	$(\delta, \ell)$ -Semistability	77
3.4	Some Boundedness	78
3.4.1	Fundamental Theorems	78
3.4.2	Boundedness of Semistable $L$ -Bradlow Pairs	79
3.4.3	Boundedness of Yokogawa Family	80

3.5	1-Stability Condition and 2-Stability Condition	84
3.5.1	Parabolic Sheaf	84
3.5.2	Parabolic $L$ -Bradlow Pair	85
3.5.3	Parabolic $L$ -Bradlow Pair	88
3.6	Quot Schemes	89
3.6.1	Preliminary	89
3.6.2	Quotient Sheaves	89
3.6.3	Quotient Quasi-Parabolic Sheaves and Maruyama-Yokogawa Construction	90
3.6.4	Quotient $L$ -Bradlow Pair	91
3.6.5	Quotient Reduced $L$ -Bradlow Pair	93
3.6.6	Quotient Reduced $L$ -Bradlow Pair	94
3.6.7	Oriented Objects	94
3.6.8	Quotient Stacks	95
<b>4</b>	<b>Geometric Invariant Theory and Enhanced Master Space</b>	<b>97</b>
4.1	Semistability Condition and Mumford-Hilbert Criterion	98
4.1.1	Statement	98
4.1.2	Mumford-Hilbert Criterion	101
4.1.3	A Lemma	102
4.1.4	Proof of the Claim 1 in Proposition 4.1.2	103
4.1.5	Proof of the Claim 2 of Proposition 4.1.2	104
4.1.6	Complement	105
4.2	Perturbation of Semistability Condition	106
4.2.1	Preliminary	106
4.2.2	$\delta_+$ -Semistability and $\delta_-$ -Semistability	107
4.2.3	$(\delta, \ell)$ -Semistability	109
4.3	Enhanced Master Space	113
4.3.1	Construction	113
4.3.2	Proof of Lemma 4.3.4	114
4.3.3	Proof of Lemma 4.3.5	116
4.3.4	Proof of Lemma 4.3.6, Step 1	117
4.3.5	Proof of Lemma 4.3.6, Step 2	118
4.3.6	Proof of Lemma 4.3.6, Step 3	119
4.4	Fixed Point Set of Torus Action on Enhanced Master Space	120
4.4.1	Preliminary	120
4.4.2	Statements	122
4.4.3	Step 1	122
4.4.4	Step 2	124
4.4.5	Step 3	125
4.4.6	Step 4	126
4.4.7	End of the Proof of Proposition 4.4.4	127
4.5	Enhanced Master Space in Oriented Case	128
4.5.1	Construction	128
4.5.2	Obvious Fixed Point Sets	129

4.5.3	Fixed Point Sets Associated to Decomposition Types . . . . .	130
4.5.4	Statement . . . . .	130
4.5.5	Ambient Stack . . . . .	131
4.5.6	Fixed Point Set of the Ambient Space . . . . .	131
4.5.7	Proof of Proposition 4.5.3 . . . . .	132
4.6	Decomposition of Exceptional Fixed Point Sets . . . . .	134
4.6.1	Statement . . . . .	134
4.6.2	Preliminary . . . . .	136
4.6.3	Construction of the Stack $\mathcal{S}$ . . . . .	136
4.6.4	Universal Sheaf . . . . .	138
4.7	Simpler Cases . . . . .	138
4.7.1	Case in Which a 2-Stability Condition is Satisfied . . . . .	138
4.7.2	Oriented Reduced $L$ -Bradlow Pairs . . . . .	140
<b>5</b>	<b>Obstruction Theories of Moduli Stacks and Master Spaces . . . . .</b>	<b>145</b>
5.1	Deformation of Torsion-Free Sheaves . . . . .	146
5.1.1	Construction of a Basic Complex . . . . .	146
5.1.2	The Trace-Free Part and the Diagonal Part . . . . .	148
5.1.3	Preparation for Master space . . . . .	150
5.1.4	Basic Complex on the Moduli Stack $\mathcal{M}(m, y)$ . . . . .	151
5.1.5	Line Bundles . . . . .	153
5.2	Relative Obstruction Theory for Orientations . . . . .	154
5.2.1	Construction of a Complex . . . . .	154
5.2.2	Relative Obstruction Property . . . . .	155
5.3	Relative Obstruction Theory for $L$ -Sections . . . . .	156
5.3.1	Construction of a Complex . . . . .	156
5.3.2	Relative Obstruction Property . . . . .	158
5.3.3	Preparation for Obstruction Theory of Master Space . . . . .	160
5.3.4	Preparation for Proposition 6.2.1 . . . . .	161
5.3.5	Another Construction . . . . .	162
5.4	Relative Obstruction Theory for Reduced $L$ -Sections . . . . .	164
5.4.1	Construction of a Complex . . . . .	164
5.4.2	Relative Obstruction Property . . . . .	166
5.4.3	Preparation for Obstruction Theory of Master Space . . . . .	168
5.4.4	Preparation for Proposition 6.2.1 . . . . .	170
5.5	Relative Obstruction Theory for Parabolic Structures . . . . .	170
5.5.1	Construction of a Complex . . . . .	170
5.5.2	Relative Obstruction Property . . . . .	173
5.5.3	Decomposition into the Trace-Free Part and the Diagonal Part . . . . .	173
5.6	Obstruction Theory for Moduli Stacks of Stable Objects . . . . .	174
5.6.1	Relative Complexes . . . . .	174
5.6.2	Construction of Complexes and Morphisms . . . . .	175
5.6.3	Obstruction Theories of Quot Schemes and Moduli Stacks . . . . .	176
5.6.4	Obstruction Theories of Moduli Stacks of Stable Objects . . . . .	177

5.7	Obstruction Theory for Enhanced Master Spaces and Related Stacks	178
5.7.1	Enhanced Master Space	178
5.7.2	Substack $\widehat{M}^*$	179
5.7.3	Moduli Stack $\widehat{\mathcal{M}}(m, \widehat{y}, [L])$	181
5.7.4	Moduli Stack $\widehat{\mathcal{M}}(m, y, L)$	184
5.7.5	Moduli Stack $\widehat{\mathcal{M}}^s(\widehat{y}, \alpha_*, +)$	184
5.7.6	Case in Which a 2-Stability Condition is Satisfied	185
5.7.7	Oriented Reduced $L$ -Bradlow Pairs	186
5.8	Moduli Theoretic Obstruction Theory of Fixed Point Set	187
5.8.1	Statement	187
5.8.2	Moduli Stack of Split Objects with Orientations	188
5.8.3	Embedding into Moduli Stack of Non-Split Objects	190
5.8.4	Some Compatibility	194
5.8.5	Deformation	196
5.8.6	Proof of Proposition 5.8.1	198
5.8.7	Case in Which a 2-Stability Condition is Satisfied	199
5.8.8	Oriented Reduced $L$ -Bradlow Pairs	200
5.9	Equivariant Obstruction Theory of Master Space	201
5.9.1	Statements	201
5.9.2	$G_m$ -Equivariant Lift of $\text{Ob}(\widehat{M})$ and $\text{ob}(\widehat{M})$	204
5.9.3	Comparison of $G_m$ -Equivariant Structures of $\tau_{\geq -1} L_{\widehat{M}}$	205
5.9.4	$G_m$ -Equivariant structure of $\text{Ob}(\widehat{M}^*)$	207
5.9.5	Proof of Proposition 5.9.2	208
5.9.6	Proof of Proposition 5.9.3	208
5.9.7	Case in Which a 2-Stability Condition is Satisfied	209
5.9.8	Oriented Reduced $L$ -Bradlow Pairs	210
<b>6</b>	<b>Virtual Fundamental Classes</b>	<b>213</b>
6.1	Perfectness of Obstruction Theories	213
6.1.1	Moduli Stacks of Semistable Objects	213
6.1.2	Master Spaces and Some Related Stacks	214
6.1.3	Vanishing of Some Cohomology Groups	216
6.1.4	Proof of the Propositions in Subsection 6.1.1	219
6.1.5	Expected Dimension	220
6.2	Comparison of Oriented Reduced Case and Unoriented Unreduced Case	221
6.2.1	Statements	221
6.2.2	Proof of Proposition 6.2.1	223
6.3	Rank One Case	224
6.3.1	Moduli of $L$ -Abelian Pairs	224
6.3.2	Involutivity and Relation with Seiberg-Witten Invariants	227
6.3.3	Parabolic Hilbert Schemes	228
6.3.4	Splitting into Moduli of Abelian Pairs and Parabolic Hilbert Schemes	231

6.3.5	Morphism to Moduli of Abelian Pairs . . . . .	232
6.3.6	Morphism to Parabolic Hilbert Scheme . . . . .	237
6.3.7	Mixed Case . . . . .	239
6.3.8	Proof of Proposition 6.3.8 . . . . .	240
6.4	Bradlow Perturbation . . . . .	242
6.4.1	Statements . . . . .	242
6.4.2	Construction of $\mathfrak{B}$ . . . . .	244
6.4.3	Compatibility of the Obstruction Theories . . . . .	244
6.4.4	Ambient Smooth Stack . . . . .	248
6.5	Comparison with Full Flag Bundles . . . . .	250
6.6	Parabolic Perturbation . . . . .	252
6.6.1	Statement . . . . .	252
6.6.2	Construction of a Stack $\mathfrak{B}$ with an Obstruction Theory . . . . .	254
6.6.3	Compatibility of the Obstruction Theories . . . . .	257
6.6.4	Smooth Ambient Stack . . . . .	260
6.6.5	Proof of Proposition 6.6.1 . . . . .	261
<b>7</b>	<b>Invariants</b> . . . . .	<b>263</b>
7.1	Preliminary . . . . .	263
7.1.1	Ring $\mathcal{R}_l$ . . . . .	264
7.1.2	Homomorphisms . . . . .	266
7.1.3	Evaluation . . . . .	267
7.1.4	Equivariant Case . . . . .	271
7.1.5	Ring $\mathcal{R}_{CH}$ . . . . .	273
7.1.6	Equivariant Euler Class . . . . .	274
7.1.7	Twist by Line Bundle . . . . .	275
7.2	Transition Formulas in Simpler Cases . . . . .	276
7.2.1	Basic Case . . . . .	276
7.2.2	Twist with the Euler Class of the Relative Tangent Bundle . . . . .	279
7.2.3	Oriented Reduced $L$ -Bradlow Pairs . . . . .	282
7.3	Invariants . . . . .	286
7.3.1	Construction . . . . .	286
7.3.2	Easy Property . . . . .	289
7.3.3	Integrals over $\widetilde{\mathcal{M}}^{ss}(\widehat{y}, \alpha_*, +)$ . . . . .	290
7.3.4	Another Expression . . . . .	290
7.3.5	Deformation Invariance . . . . .	291
7.4	Rank Two Case . . . . .	293
7.4.1	Reduction to the Sum of Integrals over the Products of Hilbert Schemes . . . . .	293
7.4.2	Dependence on Polarizations . . . . .	296
7.4.3	Proof of Theorem 7.4.3 (I) . . . . .	298
7.4.4	Proof of Theorem 7.4.3 (II) . . . . .	300
7.5	Higher Rank Case ( $p_g > 0$ ) . . . . .	303
7.5.1	Transition Formula in the Case $p_g > 0$ . . . . .	303

7.5.2	Reduction to the Sum of Integrals over the Products of Hilbert Schemes . . . . .	306
7.5.3	Independence from Polarizations in the Case $p_g > 0$ . . . . .	309
7.6	Transition Formula ( $p_g = 0$ ) . . . . .	311
7.6.1	Statement . . . . .	311
7.6.2	Step 1 . . . . .	313
7.6.3	Step 2 . . . . .	315
7.6.4	Step 3 . . . . .	318
7.7	Weak Wall Crossing Formula . . . . .	319
7.7.1	Statement . . . . .	319
7.7.2	Proof of Theorem 7.7.1 . . . . .	321
7.7.3	Weak Wall Crossing Formula in the Rank 3 Case . . . . .	323
7.7.4	Weak Intersection Rounding Formula in the Rank 3 Case . . . . .	325
7.7.5	Transition for a Critical Parabolic Weight . . . . .	330
7.8	Weak Intersection Rounding Formula . . . . .	331
7.8.1	Preliminary . . . . .	331
7.8.2	Statement . . . . .	335
7.8.3	Preparation from Combinatorics . . . . .	335
7.8.4	Proof of Theorem 7.8.2 . . . . .	337
	<b>References</b> . . . . .	341
	<b>Glossary</b> . . . . .	347
	<b>Index</b> . . . . .	379

Donaldson Type Invariants for Algebraic Surfaces

Transition of Moduli Stacks

Mochizuki, T.

2009, XXIII, 383 p., Softcover

ISBN: 978-3-540-93912-2
