
Contents

Part I Finance and Accounting

Smoothing Effects of Different Ways to Cope with Actuarial Gains and Losses Under IAS 19	
<i>Matthias Amen</i>	3
A Regime-Switching Relative Value Arbitrage Rule	
<i>Michael Bock, Roland Mestel</i>	9
Performance Measurement, Compensation Schemes, and the Allocation of Interdependence Effects	
<i>Michael Krapp, Wolfgang Schultze, Andreas Weiler</i>	15
Coordination of Decentralized Departments with Existing Sales Interdependencies	
<i>Christian Lohmann</i>	21
Empirical Examination of Fundamental Indexation in the German Market	
<i>Max Mihm</i>	27
Trading in Financial Markets with Online Algorithms	
<i>Esther Mohr, Günter Schmidt</i>	33

Part II Health Care and Environment

A New Model and Tabu Search Approach for Planning the Emergency Service Stations	
<i>Ayfer Başar, Bülent Çatay, Tonguç Ünlüyurt</i>	41

Integration of Carbon Efficiency into Corporate Decision-Making

Britta Engel, Grit Walther, Thomas S. Spengler 47

Production Planning Under Economic and Ecologic Objectives - A Comparison in Case Studies from Metals Production

Magnus Fröhling, Frank Schwaderer, Otto Rentz 53

Production Planning with Common Parts in Closed-Loop Supply Chains

Jenny Steinborn, Grit Walther, Thomas S. Spengler 59

Part III Production and Service Management

Production Planning in Continuous Process Industries: Theoretical and Optimization Issues

Krystsina Bakhrankova 67

Cost-Oriented Models of Network Industries Price Regulation

Eleonora Fendekova, Michal Fendek 73

Production Chain Planning in the Automotive Industry

Claas Hemig, Jürgen Zimmermann 79

Two-Dimensional Guillotineable-Layout Cutting Problems with a Single Defect - An AND/OR-Graph Approach

Vera Neidlein, Andréa C.G. Vianna, Marcos N. Arenales, Gerhard Wäscher 85

The Single Item Dynamic Lot Sizing Problem with Minimum Lot Size Restriction

Irena Okhrin, Knut Richter 91

On the Relation Between Industrial Product-Service Systems and Business Models

Alexander Richter, Marion Steven 97

Dynamic Bid-Price Policies for Make-to-Order Revenue Management

Thomas Spengler, Thomas Volling, Kai Wittek, Derya E. Akyol.. 103

Part IV Scheduling and Project Management

**A GA Based Approach for Solving Multi Criteria
Project Scheduling Problems**
Felix Bomsdorf, Ulrich Derigs, Elisabeth von Jagwitz 111

**Solving the Batch Scheduling Problem with Family
Setup Times**
Udo Buscher, Liji Shen 117

**On Single Machine Scheduling and Due Date
Assignment with Positionally Dependent Processing
Times**
Valery S. Gordon, Vitaly A. Strusevich 123

**Scheduling Component Placement Operations for
Collect-and-Place Type PCB Assembly Machines**
Özgür Kulak, Serol Bulkan, Hans-Otto Günther 129

**Scheduling of Multiple R&D–Projects in a Dynamic
and Stochastic Environment**
Philipp Melchior, Rainer Kolisch 135

**An Evolutionary Algorithm for Sub-Daily/Sub-Shift
Staff Scheduling**
Volker Nissen, René Birnstiel 141

**Scheduling of Modular Production Lines in Mobile
Terminal Manufacturing Using MILP**
Frank Pettersson, Janne Roslöf 147

Revenue Maximization on Parallel Machines
Malgorzata Sterna, Jacek Juraszek, Erwin Pesch 153

**A New Bottleneck-Based Heuristic for Reentrant Job
Shops: A Case Study in a Textile Factory**
Seyda Topaloglu, Gamze Kilincli 159

**Project Scheduling with Precedence Constraints
and Scarce Resources: An Experimental Analysis of
Commercial Project Management Software**
Norbert Trautmann, Philipp Baumann 165

Part V Supply Chain and Inventory Management

Interactive Multi-Objective Stochastic Programming Approaches for Designing Robust Supply Chain Networks	
<i>Amir Azaron, Kai Furmans, Mohammad Modarres</i>	173
A MILP Model for Production and Distribution Planning in Consumer Goods Supply Chains	
<i>Bilge Bilgen, Hans-Otto Günther</i>	179
An Exact Discrete-Time Model of a Two-Echelon Inventory System with Two Customer Classes	
<i>Lars Fischer, Michael Manitz</i>	185
Supply Chain Coordination Models with Retailer's Attitudes Toward Risk	
<i>Harikrishnan K Kanthen, Chhaing Huy</i>	191
Zur Erweiterung der Kennlinientheorie auf mehrstufige Lagersysteme	
<i>Karl Inderfurth und Tobias Schulz</i>	197
Setup Cost Reduction and Supply Chain Coordination in Case of Asymmetric Information	
<i>Karl Inderfurth, Guido Voigt</i>	203
A Heuristic Approach for Integrating Product Recovery into Post PLC Spare Parts Procurement	
<i>Rainer Kleber, Karl Inderfurth</i>	209
The Economic Lot and Supply Scheduling Problem Under a Power-of-Two Policy	
<i>Thomas Liske, Heinrich Kuhn</i>	215
Towards Coordination of Decentralized Embedded System Development Processes	
<i>Kerstin Schmidt, Grit Walther, Thomas S. Spengler, Rolf Ernst</i>	221
Collaborative Planning: Issues with Asymmetric Cost and Hold-Up in Automotive Supply Chains	
<i>Thomas Staeblein</i>	227

Negative Default Dependencies: Do Automotive Suppliers Benefit from Their Competitors' Default?	
<i>Stephan M. Wagner, Christoph Bode, Philipp Koziol</i>	233

Part VI Traffic and Transportation

An Optimization Approach for the Crew Scheduling Problem in Waste Management	
<i>Jens Baudach, Annette Chmielewski, Tobias Mankner</i>	241
Milk Run Optimization with Delivery Windows and Hedging Against Uncertainty	
<i>Carsten Böhle, Wilhelm Dangelmaier</i>	247
MEFISTO: A Pragmatic Metaheuristic Framework for Adaptive Search with a Special Application to Pickup and Delivery Transports	
<i>Andreas Cardeneo, Werner Heid, Frank Radaschewski, Robert Scheffermann, Johannes Spallek</i>	253
Planning in Express Carrier Networks: A Simulation Study	
<i>Sascha Dahl, Ulrich Derigs</i>	259
Stability of Airline Schedules	
<i>Viktor Dück, Natalia Kliewer, Leena Suhl</i>	265
Waiting Strategies for Regular and Emergency Patient Transportation	
<i>Guenter Kiechle, Karl F. Doerner, Michel Gendreau, Richard F. Hartl</i>	271
Eine heuristische Methode zur Erhöhung der Robustheit von Mehrdepot-Umlaufplänen im ÖPNV	
<i>Stefan Kramkowski, Christian Meier und Natalia Kliewer</i>	277
The Berth Allocation Problem with a Cut-and-Run Option	
<i>Frank Meisel, Christian Bierwirth</i>	283
A Model for the Traveling Salesman Problem Including the EC Regulations on Driving Hours	
<i>Herbert Kopfer, Christoph Manuel Meyer</i>	289

Crew Recovery with Flight Retiming <i>Felix Pottmeyer, Viktor Dück, Natalia Kliewer</i>	295
A Branch-and-Cut Approach to the Vehicle Routing Problem with Simultaneous Delivery and Pick-up <i>Julia Rieck, Jürgen Zimmermann</i>	301
Vehicle and Commodity Flow Synchronization <i>Jörn Schönberger, Herbert Kopfer, Bernd-Ludwig Wenning, Henning Rekersbrink</i>	307
Multi-Criteria Optimization for Regional Timetable Synchronization in Public Transport <i>Ingmar Schüle, Anca Diana Dragan, Alexander Radev, Michael Schröder, Karl-Heinz Küfer</i>	313
Transportation Planning in Dynamic Environments <i>René Schumann, Thomas Timmermann, Ingo J. Timm</i>	319
The CaSSandra Project: Computing Safe and Efficient Routes with GIS <i>Luca Urciuoli, Jonas Tornberg</i>	325
Design and Optimization of Dynamic Routing Problems with Time Dependent Travel Times <i>Sascha Wohlgemuth, Uwe Clausen</i>	331
An Ant Colony Algorithm for Time-Dependent Vehicle Routing Problem with Time Windows <i>Umman Mahir Yıldırım, Bülent Çatay</i>	337
<hr/> Part VII Applied Probability and Stochastic Programming <hr/>	
The Comparative Analysis of Different Types of Tax Holidays Under Uncertainty <i>Vadim Arkin, Alexander Slasnikov, Svetlana Arkina</i>	345
Stochastic Programming Problems with Recourse via Empirical Estimates <i>Vlasta Kaňková</i>	351
Sorting and Goodness-of-Fit Tests of Uniformity in Random Number Generation <i>Thomas Morgenstern</i>	357

Constrained Risk-Sensitive Markov Decision Chains*Karel Sladký* 363

Part VIII Business Informatics, Decision Support and Artificial Intelligence

An EM-based Algorithm for Web Mining Massive Data Sets*Maria João Cortinhal, José G. Dias* 371**AgileGIST - a Framework for Iterative Development and Rapid Prototyping of DSS for Combinatorial Problems***Ulrich Derigs, Jan Eickmann* 377**Incorporation of Customer Value into Revenue Management***Tobias von Martens, Andreas Hilbert* 383**Einfluss der Adoptoreinstellung auf die Diffusion Komplexer Produkte und Systeme***Sabine Schmidt und Magdalena Mißler-Behr* 389**Data Similarity in Classification and Fictitious Training Data Generation***Ralf Stecking, Klaus B. Schebesch* 395**Journal Ratings and Their Consensus Ranking***Stefan Theussl, Kurt Hornik* 401**The Effect of Framing and Power Imbalance on Negotiation Behaviors and Outcomes***Ali Fehmi Ünal, Gül Gökay Emel* 407**Response Mode Bias Revisited – The “Tailwhip” Effect***Rudolf Vetschera, Christopher Schwand, Lea Wakolbinger* 413**Enhancing Target Group Selection Using Belief Functions***Ralf Wagner, Jörg Schwerdtfeger* 419

Part IX Discrete and Combinatorial Optimization

A Constraint-Based Approach for the Two-Dimensional Rectangular Packing Problem with Orthogonal Orientations

Martin Berger, Michael Schröder, Karl-Heinz Küfer 427

Detecting Orbitopal Symmetries

Timo Berthold, Marc E. Pfetsch 433

Column Generation Approaches to a Robust Airline Crew Pairing Model For Managing Extra Flights

Elvin Çoban, İbrahim Muter, Duygu Taş, Ş. İlker Birbil, Kerem Bülbül, Güvenç Şahin, Y. İlker Topçu, Dilek Tüzün, Hüsnü Yenigün 439

Approximation Polynomial Algorithms for Some Modifications of TSP

Edward Gimadi 445

A Robust Optimization Approach to R&D Portfolio Selection

Farhad Hassanzadeh, Mohammad Modarres, Mohammad Saffari . 451

A New Branch and Bound Algorithm for the Clique Partitioning Problem

Florian Jaehn, Erwin Pesch 457

On the Benefits of Using NP-hard Problems in Branch & Bound

Jörg Rambau, Cornelius Schwarz 463

Automatic Layouting of Personalized Newspaper Pages

Thomas Strecker, Leonhard Hennig 469

A Tabu Search Approach to Clustering

Marcel Turkensteen, Kim A. Andersen 475

Parallel Computation for the Bandwidth Minimization Problem

Khoa T. Vo, Gerhard Reinelt 481

Strengthening Gomory Mixed-Integer Cuts

Franz Wesselmann, Achim Koberstein, Uwe H. Suhl 487

Part X Forecasting, Econometrics and Game Theory

Applied Flexible Correlation Modeling*Frederik Bauer, Martin Missong* 495**Forecasting Behavior in Instable Environments***Otwin Becker, Johannes Leitner, Ulrike Leopold-Wildburger* 501**Der Einfluss von Kostenabweichungen auf Nash-Gleichgewichte in einem nicht-kooperativen Disponenten-Controller-Spiel***Günter Fandel und Jan Trockel* 507**Multilayered Network Games: Algorithms for Solving Discrete Optimal Control Problems with Infinite Time Horizon via Minimal Mean Cost Cycles and a Game-Theoretical Approach***Dmitrii Lozovanu, Stefan Pickl* 513**Competitive Facility Placement for Supply Chain Optimization***Andrew Sun, Hugh Liu* 519

Part XI Linear, Nonlinear and Vector Optimization

New Optimization Methods in Data Mining*Süreyya Özöğür-Akyüz, Başak Akteke-Öztürk, Tatiana Tchemisova, Gerhard-Wilhelm Weber* 527**The Features of Solving of the Set Partitioning Problems with Moving Boundaries Between Subsets***Tetyana Shevchenko, Elena Kiseleva, Larysa Koriashkina* 533**Symmetry in the Duality Theory for Vector Optimization Problems***Martina Wittmann-Hohlbein* 539**A Simple Proof for a Characterization of Sign-Central Matrices Using Linear Duality***Rico Zenklusen* 545

Part XII Network Optimization

Vickrey Auctions for Railway Tracks
Ralf Borndörfer, Annette Mura, Thomas Schlechte 551

The Line Connectivity Problem
Ralf Borndörfer, Marika Neumann, Marc E. Pfetsch 557

Heuristics for Budget Facility Location–Network Design Problems with Minisum Objective
Cara Cocking, Gerhard Reinelt 563

Combinatorial Aspects of Move-Up Crews
Holger Flier, Abhishek Gaurav, Marc Nunkesser 569

Computational Complexity of Impact Size Estimation for Spreading Processes on Networks
Marco Laumanns, Rico Zenklusen 575

Operations Research Proceedings 2008
Selected Papers of the Annual International
Conference of the German Operations Research
Society (GOR) University of Augsburg, September 3-5,
2008

Fleischmann, B.; Borgwardt, K.-H.; Klein, R.; Tuma, A.
(Eds.)
