Part I: Biological Olfaction

1	“Sloppy Engineering” and the Olfactory System of Insects	3
	<i>Thomas Nowotny</i>	
1.1	Introduction.....	3
1.1.1	The Olfactory Pathway of Insects.....	4
1.1.2	Assumptions and Conventions.....	6
1.2	The AL-MB Fan-Out Phase.....	7
1.2.1	Activity Levels in the MB.....	8
1.2.2	Lossless Information Transmission.....	9
1.3	The Classification Stage.....	11
1.3.1	Classification of One Odor Input.....	12
1.3.2	Classification of a Structured Set of Odor Input Patterns.....	16
1.4	More detailed models.....	18
1.5	The Role of Multiple Snapshots and Time Integration.....	22
1.6	Discussion.....	23
1.7	Appendix A: Probability Distribution for the Number of Active KC.....	25
1.8	Appendix B: Collision Probability.....	26
1.9	Appendix C: Probability of Proper Classification for One Input.....	28
	References.....	29
2	From ANN to Biomimetic Information Processing.....	33
	<i>Anders Lansner, Simon Benjaminsson, Christopher Johansson</i>	
2.1	Introduction.....	33
2.1.1	The Underlying Abstract Model of Cortex.....	35
2.2	Methods.....	35
2.2.1	Partitioning of Input Space.....	35
2.2.2	Decorrelation and Sparsification.....	36
2.2.3	Associative Memory.....	37
2.2.4	Data Sets.....	38
2.2.5	MLP/BP and SVM Software.....	39
2.3	Results.....	40
2.3.1	Evaluation on Olfactory Bulb Activation Patterns.....	40

2.3.2	Classification of MNIST Data.....	41
2.4	Discussion and Conclusions.....	42
	References.....	42
3	The Sensitivity of the Insect Nose: The Example of <i>Bombyx Mori</i>.....	45
	<i>Karl-Ernst Kaissling</i>	
3.1	Introduction.....	45
3.2	Molecule Capture by the Antenna.....	45
3.3	Transport of Molecules on the Antenna.....	48
3.4	Cellular Transduction.....	49
3.5	Processing in the Central Nervous System.....	49
	References.....	51
4	Multivariate Analysis of the Activity of the Olfactory Bulb.....	53
	<i>I. Montoliu, K.C. Persaud, M. Shah, S.Marco</i>	
4.1	Introduction.....	53
4.2	Methodology.....	55
4.2.1	Staining.....	55
4.2.2	Optical Section.....	55
4.2.3	Data Processing.....	56
4.3	Results.....	60
4.3.1	MPCA Analysis.....	61
4.3.2	ICA Analysis.....	67
4.4	Conclusions.....	71
	References.....	72
<hr/>		
Part II: Artificial Olfaction and Gustation		
<hr/>		
5	Improved Odour Detection through Imposed Biomimetic Temporal Dynamics.....	75
	<i>Tim C. Pearce, Manuel A. Sánchez-Montañés, Julian W. Gardner</i>	
5.1	Three Key Mechanisms for Discrimination of Complex Odours in Chemical Sensor Arrays.....	75
5.2	An Artificial Olfactory Mucosa for Enhanced Complex Odour Analysis.....	76
5.2.1	Artificial Olfactory Mucosa Fabrication.....	79
5.2.2	Chemical Sensor Behaviour within the Artificial Mucosa.....	79
5.3	Exploiting Temporal Responses in the Artificial Mucosa.....	81
5.3.1	Olfactory Bulb Implementations for Spatiotemporal Processing of Odour Information.....	81
5.3.2	Spatiotemporal Information Measures.....	86
5.4	Conclusions.....	90
	References.....	91

6	Relating Sensor Responses of Odorants to Their Organoleptic Properties by Means of a Biologically-Inspired Model of Receptor Neuron Convergence onto Olfactory Bulb.....	93
	<i>Baranidharan Raman, Ricardo Gutierrez-Osuna</i>	
6.1	Introduction.....	93
6.2	Odor Representation in the Early Stages of the Olfactory Pathway.....	94
6.3	Infrared Absorption Spectroscopy.....	95
6.4	Modeling Receptor Neuron Convergence.....	96
6.5	Results.....	98
6.6	Discussion.....	102
6.7	Summary.....	105
	References.....	106
7	A Novel Bio-inspired Digital Signal Processing Method for Chemical Sensor Arrays.....	109
	<i>Eugenio Martinelli, Francesca Dini, Giorgio Pennazza, Maurizio Canosa, Arnaldo D'Amico, Corrado Di Natale</i>	
7.1	Introduction.....	109
7.2	Method Description.....	110
7.2.1	Details of Simulated Experiments.....	114
7.3	Results and Discussion.....	115
7.4	Conclusion.....	119
	References.....	119
8	Monitoring an Odour in the Environment with an Electronic Nose: Requirements for the Signal Processing.....	121
	<i>A.-C. Romain, J. Nicolas</i>	
8.1	Introduction.....	121
8.2	Usual Methods to Measure the Odour Pollution.....	122
8.2.1	Human Olfaction Measurement.....	122
8.2.2	Analytical Techniques.....	124
8.3	Artificial Olfaction for Measurement of Odour Pollution.....	124
8.3.1	Interest for Environmental Application.....	124
8.3.2	Stepwise Methodology.....	124
8.3.3	Variability of the Operating Conditions.....	125
8.4	Requirements for the Signal Processing When Using Artificial Olfaction Instrument in the Environment.....	128
8.4.1	Context.....	128
8.4.2	Sensor Drift and Calibration Gas.....	128
8.4.3	Odour Quantification.....	131
8.4.4	Useful Signal Detection.....	133
8.5	Conclusion.....	134
	References.....	134

9	Multivariate Calibration Model for a Voltammetric Electronic Tongue Based on a Multiple Output Wavelet Neural Network.....	137
	<i>R. Cartas, L. Moreno-Barón, A. Merkoçi, S. Alegret, M. del Valle, J.M. Gutiérrez, L. Leija, P.R. Hernandez, R. Muñoz</i>	
9.1	Introduction.....	137
9.2	The Sense of Taste.....	138
9.3	Electronic Tongue.....	141
9.4	Artificial Neural Networks.....	142
9.4.1	Biological Background.....	143
9.4.2	Basic Structure of Feedforward Networks.....	144
9.4.3	Training.....	145
9.4.4	Data Selection.....	146
9.5	Wavelet Transform Background.....	147
9.5.1	Wavelet Transform.....	149
9.5.2	Applications Related to the Sensors Field.....	154
9.6	Wavelet Neural Network.....	155
9.6.1	WNN Algorithm.....	157
9.6.2	Training.....	159
9.6.3	Initialization of Network Parameters.....	160
9.7	Case Study in Chemical Sensing.....	160
9.8	Conclusions.....	163
	References.....	164
	Author Index.....	169

Biologically Inspired Signal Processing for Chemical
Sensing

Gutiérrez, A.; Marco, S. (Eds.)

2009, XIII, 169 p., Hardcover

ISBN: 978-3-642-00175-8
