| <b>1 Construction of Gas-Dynamic Equations by Using</b>   |    |
| <b>Conservation Laws</b>  | 1  |
| 1.1 Averaging Procedure   | 1  |
| 1.1.1 Spatial Averages  | 2  |
| 1.1.2 Spatial-Time Averages   | 3  |
| 1.1.3 Galileo Transform   | 4  |
| 1.1.4 Continuity Equation   | 5  |
| 1.2 Conservation Laws in the Integral Form  | 7  |
| 1.3 Conservation Laws in the Differential Form  | 9  |
| 1.4 Euler and Navier–Stokes Equations   | 11 |
| 1.5 Quasi-gas-dynamic and Quasi-hydrodynamic Equations  | 14 |
| 1.5.1 Quasi-gas-dynamic System  | 14 |
| 1.5.2 Quasi-hydrodynamic System   | 16 |
| 1.5.3 Vector of the Mass Flux Density and the Parameter $\tau$  | 17 |
| 1.5.4 Comparison of the Models and the Barometric Formula   | 20 |
| <b>2 Elements of Kinetic Gas Theory</b>   | 23 |
| 2.1 Boltzmann Equation  | 23 |
| 2.2 Equilibrium Distribution Function and the Euler System  | 25 |
| 2.3 Navier–Stokes Equations   | 26 |
| 2.4 Bhatnagar–Gross–Krook Equation  | 27 |
| 2.5 Mean Collision Quantities of the Particle Motion  | 28 |
| 2.6 Transport Coefficients in Equilibrium Gases   | 30 |
| 2.7 Numerical Simulation of Flows of Rarefied Gases   | 31 |
| 2.7.1 General Remarks   | 31 |
| 2.7.2 Monte Carlo Method  | 33 |
| 2.8 Difference Approximation of the Boltzmann Equation<br>and Kinetically Consistent Difference Schemes | 35 |
| <b>3 Quasi-gas-dynamic Equations</b>  | 37 |
| 3.1 Regularized Kinetic Equation  | 37 |
| 3.2 Kinetic Deduction of the QGD Equations  | 40 |

|          |  |            |
|----------|--|------------|
| 3.3      | QGD Equations in the Form of Conservation Laws .....   | 42         |
| 3.3.1    | Equation of Continuity and the Vector of the Mass<br>Flux Density .....                      | 42         |
| 3.3.2    | Momentum Equation and the Viscous Shear-Stress Tensor ..                                     | 43         |
| 3.3.3    | Total Energy Equation and Heat Flux Vector .....   | 44         |
| 3.4      | Dissipation Coefficients .....   | 48         |
| 3.4.1    | Formulas for Dissipative Coefficients and Their<br>Generalizations .....                     | 48         |
| 3.4.2    | Volume Viscosity Coefficient .....   | 48         |
| 3.5      | Navier–Stokes System as an Asymptotic of the QGD system .....                                | 51         |
| 3.5.1    | QGD Addition to the Vector of Mass Flux Density .....  | 52         |
| 3.5.2    | QGD Addition to the Viscous Shear-Stress Tensor .....  | 53         |
| 3.5.3    | QGD Addition to the Work of Pressure and Viscous<br>Friction Forces .....                    | 54         |
| 3.5.4    | QGD addition to the Heat Flux Vector .....   | 54         |
| 3.6      | QGD Equations for Gas Flows Under the Existence of Exterior<br>Forces and Heat Sources ..... | 55         |
| 3.7      | Entropy Balance Equation .....   | 58         |
| <b>4</b> | <b>Quasi-gas-dynamic Equations and Coordinate Systems .....</b>                              | <b>63</b>  |
| 4.1      | Quasi-gas-dynamic Equations in an Arbitrary Coordinate System ...                            | 63         |
| 4.2      | Cartesian Coordinate System .....  | 66         |
| 4.3      | Cylindrical Coordinate System .....  | 71         |
| <b>5</b> | <b>Numerical Algorithms for Solving Gas-Dynamic Problems .....</b>                           | <b>75</b>  |
| 5.1      | System for Planar Two-Dimensional Flows .....  | 75         |
| 5.2      | System for Cylindrical Two-Dimensional Flows .....   | 77         |
| 5.3      | Boundary Conditions .....  | 79         |
| 5.4      | Dimensionless Form of the Equations .....  | 81         |
| 5.5      | Finite-Difference Approximation .....  | 82         |
| 5.6      | Introducing the Artificial Dissipation .....   | 86         |
| 5.7      | Problem on the Strong Discontinuity Step Evolution .....                                     | 88         |
| 5.8      | Flow Around a Cylindrical Obstacle .....   | 93         |
| 5.8.1    | Problem Formulation and the Numerical Algorithm .....  | 93         |
| 5.8.2    | Results of Computation .....   | 97         |
| 5.9      | Nonviscid Flow in a Channel with a Forward-Facing Step .....                                 | 99         |
| 5.10     | Numerical Algorithm for Computing Subsonic Flows .....                                       | 102        |
| 5.10.1   | Dimensionless Form of Equations and the Regularization ...                                   | 104        |
| 5.10.2   | Nonreflecting Boundary Conditions .....  | 105        |
| 5.11     | Stability and Accuracy of QGD Algorithms .....   | 106        |
| <b>6</b> | <b>Algorithms for Solving Quasi-gas-dynamic Equations<br/>on Nonstructured Grids .....</b>   | <b>109</b> |
| 6.1      | Choice of the Grid and Constructing the Control Volume .....                                 | 109        |
| 6.2      | Approximation of the System .....  | 111        |

|          |  |            |
|----------|--|------------|
| 6.3      | Approximation of Partial Derivatives . . . . .   | 112        |
| 6.4      | Finite-Difference Schemes for Two-Dimensional Flows . . . . .                            | 117        |
| 6.5      | Approximation of Boundary Conditions . . . . .   | 123        |
| 6.6      | Computation of the Flow in a Neighborhood of a Cylinder . . . . .                        | 124        |
| <b>7</b> | <b>Quasi-hydrodynamic Equations and Flows of Viscous Incompressible Fluids . . . . .</b> | <b>129</b> |
| 7.1      | Quasi-hydrodynamic System . . . . .  | 129        |
| 7.2      | Computational Algorithm . . . . .  | 133        |
| 7.3      | Backward-Facing Step Flows in a Channel . . . . .  | 136        |
| 7.3.1    | Formulation of the Problem . . . . .   | 137        |
| 7.3.2    | Results of Numerical Simulation . . . . .  | 139        |
| 7.4      | Heat Convection in a Square Cavity . . . . .   | 142        |
| 7.5      | Heat Convection for Low Prandtl Numbers . . . . .  | 145        |
| 7.5.1    | Results of Computations for the R-R Case . . . . .                                       | 147        |
| 7.5.2    | Results of Computations for the R-F Case . . . . .                                       | 150        |
| 7.6      | Marangoni Convection in the Zero Gravity . . . . .                                       | 152        |
| 7.7      | Flows in a Cubic Cavity with a Movable Lid . . . . .                                     | 155        |
| <b>8</b> | <b>Quasi-gas-dynamic Equations for Nonequilibrium Gas Flows . . . . .</b>                | <b>167</b> |
| 8.1      | Molecular Models and Distribution Functions . . . . .                                    | 167        |
| 8.2      | Coordinate Systems and Certain Integrals . . . . .                                       | 169        |
| 8.3      | Construction of Moment Equations . . . . .   | 171        |
| 8.4      | Calculation of Exchange Terms . . . . .  | 176        |
| 8.5      | QGDR Equations for a Gas with Two or Three Rotational Degrees of Freedom . . . . .       | 178        |
| 8.6      | Examples of Numerical Computations . . . . .   | 181        |
| 8.6.1    | Spatial Relaxation Problem . . . . .   | 181        |
| 8.6.2    | Problem of the Shock Wave Structure . . . . .  | 182        |
| <b>9</b> | <b>Quasi-gas-dynamic Equations for Binary Gas Mixtures . . . . .</b>                     | <b>187</b> |
| 9.1      | Initial Kinetic Model . . . . .  | 188        |
| 9.2      | Construction of the Moment Equations . . . . .   | 190        |
| 9.3      | Calculation of Exchange Terms . . . . .  | 193        |
| 9.4      | Determination of the Collision Frequencies . . . . .                                     | 194        |
| 9.5      | Quasi-gas-dynamic Equations for Gas Mixtures . . . . .                                   | 196        |
| 9.6      | One-Fluid Approximations . . . . .   | 197        |
| 9.6.1    | QGDM Model in the One-Fluid Approximation . . . . .                                      | 197        |
| 9.6.2    | One-Fluid Model for the Navier–Stokes Equations . . . . .                                | 198        |
| 9.6.3    | QGDM and Navier–Stokes One-Fluid Approximations . . . . .                                | 200        |
| 9.7      | QGDM System for One-Dimensional Flows . . . . .  | 201        |
| 9.7.1    | Dimensionless Form . . . . .   | 203        |
