<b>Introduction</b> .....	1
R. Brumme and P.K. Khanna	

## **Part A Description of Long-term Observation Sites**

### **1 General Description of Study Sites**

H. Meessenburg and R. Brumme

References .....	11
------------------	----

### **2 Climatic Condition at Three Beech Forest Sites in Central Germany**

O. Panferov, H. Kreilein, H. Meessenburg, J. Eichhorn,  
and G. Gravenhorst

2.1 Climate of Germany .....	13
2.2 Experimental Sites .....	16
2.2.1 Climatic Variables .....	16
2.3 Climatic Conditions at Beech Sites .....	17
2.3.1 Solar Radiation .....	17
2.3.2 Air Temperature .....	18
2.3.3 Precipitation .....	20
2.3.4 Variations of Air Temperature and Precipitation During the Observation Period .....	22
2.3.5 Soil Temperature .....	24
2.4 Comparison with Other Climatic Regions .....	27
2.5 Conclusions .....	30
References .....	31

### **3 Soil Properties**

H. Meessenburg, R. Brumme, C. Jacobsen, K.J. Meiwes, and J. Eichhorn

3.1 Introduction .....	33
------------------------	----

3.2	Parent Material, Mineral Composition, Soil Texture .....	33
3.3	Soil Types, Soil pH, and Buffer Systems of Soils .....	36
3.4	Cation Exchange Capacity, and Exchangeable Cations .....	37
3.5	Nutrient Status of Soils and Organic Layer Types .....	40
3.6	Additional Study Plots at the Solling Site .....	41
3.7	Conclusions .....	46
	References .....	46
<b>4</b>	<b>Changes in C and N Contents of Soils Under Beech Forests over a Period of 35 Years</b>	
	K.J. Meiwes, H. Meesenburg, J. Eichhorn, C. Jacobsen, and P.K. Khanna	
4.1	Introduction .....	49
4.2	Content and Distribution of C and N in Soils from Three Beech Sites .....	50
4.3	Long-term Periodic Measurements of C and N Contents in the Soil at Solling Site .....	54
4.4	Human Impacts and Management Issues at Solling .....	57
4.5	Summary .....	61
	References .....	62
<b>5</b>	<b>Vegetation</b>	
	W. Schmidt	
5.1	Introduction .....	65
5.2	Vegetation Structure and Phyto-sociological Classification .....	66
	5.2.1 Solling .....	66
	5.2.2 Zierenberg .....	68
	5.2.3 Göttinger Wald .....	71
5.3	Vegetation Ecology of the Beech Forest Ecosystems: Impact of Site Conditions .....	74
5.4	Vegetation Dynamics .....	77
	5.4.1 Solling .....	77
	5.4.2 Zierenberg .....	78
	5.4.3 Göttinger Wald .....	78
5.5	Conclusion .....	81
	References .....	82
<b>6</b>	<b>Microbial Biomass</b>	
	R. Brumme, M. Raubuch, J. Priess, C. P. Wang, and T.-H. Anderson	
6.1	Introduction .....	87
6.2	Microbial Carbon and Nitrogen .....	88
6.3	Metabolic Quotient and $C_{mic}$ -to- $C_{org}$ Relationship .....	89
6.4	Conclusions and Indications of Human Impacts .....	91
	References .....	92

## **7 Soil Fauna**

M. Schaefer and J. Schauer mann

7.1	Introduction .....	93
7.2	Fauna .....	94
7.3	Macro-Gradient from Base-Rich to Acid Beech Forests .....	94
7.4	Meso-Gradient from Basalt to Limestone at the Zierenberg Site .....	99
7.5	Conclusions .....	100
	References .....	101

## **Part B Ecosystem Processes**

### **8 Tree Growth, Biomass, and Elements in Tree Components of Three Beech Sites**

P. Rademacher, P.K. Khanna, J. Eichhorn, and M. Guericke

8.1	Introduction .....	105
8.2	Sites and Methods of Data Collection .....	107
8.2.1	Stem Growth .....	107
8.2.2	Biomass Measurements of Different Tree Components on Two Sites .....	109
8.2.3	Biomass Modelling at Different Experimental Sites .....	110
8.2.4	Nutrient Concentration of Various Tree Components .....	111
8.3	Stand Growth .....	111
8.3.1	Solling Site .....	111
8.3.2	Göttinger Wald Site .....	113
8.3.3	Zierenberg Site .....	113
8.4	Comparison of Stand Growth at the Three Experimental Sites ....	114
8.5	Biomass of Harvested Trees and Annual Biomass Increments ....	116
8.6	Nutrients in Various Tree Components .....	121
8.7	Stand Harvesting and Nutrient Export .....	130
8.8	Summary .....	132
	References .....	133

### **9 Fine Root Biomass, Turnover and Litter Production**

D. Murach, A. Horn, W. Ke-Hong, and C. Rapp

9.1	Introduction .....	137
9.2	Methods .....	137
9.3	Fine Root Production and Turnover .....	142
9.4	Element Recycling with Litter of Fine Root .....	147
9.5	Summary .....	148
	References .....	151

## **10 Phytomass, Litter and Net Primary Production of Herbaceous Layer**

I.-M. Schulze, A. Bolte, W. Schmidt, and J. Eichhorn

10.1	Introduction .....	155
10.2	Definitions and Methods .....	156
10.2.1	Biomass and NPP Estimates by Harvesting Methods ....	156
10.2.2	Aboveground Phytomass Estimates by Dimension Analysis .....	157
10.3	Phytomass Estimates .....	161
10.3.1	Total Biomass Estimated from Harvest Studies .....	161
10.3.2	Aboveground Phytomass Estimated by Plant Dimension Analysis .....	165
10.3.3	Comparison of Methods of Biomass Assessment .....	165
10.4	Phenological Patterns of Annual Development of Herbaceous Biomass .....	167
10.5	Annual Production of Biomass and Litterfall of the Herbaceous Layer .....	169
10.6	N-storage, Dynamic and Internal N-Cycling .....	171
10.7	Annual Changes in N-Contents .....	172
10.8	C/N-Ratios .....	174
10.9	Ground Vegetation as a Part of Internal N-Cycling in Beech Stands .....	175
10.10	Conclusion .....	176
	References .....	177

## **11 Biomass and Element Content of Foliage and Aboveground Litterfall on the Three Long-Term Experimental Beech Sites: Dynamics and Significance**

P.K. Khanna, H. Fortmann, H. Meesenburg, J. Eichhorn, and K.J. Meiwes

11.1	Introduction .....	183
11.2	Site Description and Collection and Measurements of Aboveground Litterfall Components and Green Foliage .....	185
11.3	Components and Annual Patterns of Aboveground Litterfall .....	187
11.4	Amount of Nutrients in Litterfall .....	189
11.5	Nutrient Concentrations in the Total Litterfall and Leaf Litter Components of the Different Sites .....	192
11.6	Foliar Chemistry .....	193
11.7	Nutrients and Heavy Metals in Green Foliage and Litterfall in Relation to Atmospheric Inputs .....	198
11.8	Autumn Withdrawal of Nutrients at the Time of Leaf Senescence .....	200
11.9	Conclusions .....	203
	References .....	204

## 12 The Role of Soil Fauna for Decomposition of Plant Residues

M. Schaefer, S. Migge-Kleian, and S. Scheu

12.1	Introduction .....	207
12.2	Influence of Soil Fauna on Decomposition of Canopy Leaf Litter .....	210
12.3	Influence of Soil Fauna on Decomposition of Herb Litter .....	211
12.4	Decomposition of Roots and Woody Material .....	213
12.5	Faunal Control of Litter Decay .....	213
	12.5.1 Micro-fauna, Meso-fauna, and Macro-fauna .....	214
	12.5.2 Carbon and Nitrogen Mineralisation .....	216
	12.5.3 Acid Rain and Liming .....	218
12.6	The Decomposer Web .....	219
	12.6.1 Important Interactions Between Decomposer Groups ...	220
	12.6.2 Bottom-up and Top-down Effects .....	221
12.7	Earthworms as Ecosystem Engineers .....	223
	12.7.1 Food Ingestion, Gut Passage, Production of Casts and Mucus .....	224
	12.7.2 Bioturbation .....	224
	12.7.3 Earthworm Burrows and Middens .....	225
	12.7.4 Earthworms in the Rhizosphere .....	226
12.8	Conclusions .....	226
	References .....	227

## 13 Nitrogen and Carbon Transformations

R. Brumme, J. Priess, C.P. Wang, M. Raubuch, G. Steinmetz,  
and H. Meyer

13.1	Introduction .....	231
13.2	Experimental Details .....	232
13.3	Nitrogen Mineralisation in Soil Cores .....	233
	13.3.1 Depthwise Distributions of Net N-Mineralisation .....	237
	13.3.2 Temperature Sensitivity of Net N-Mineralisation .....	238
13.4	Carbon Mineralisation .....	239
	13.4.1 Depthwise Distributions of Net C-Mineralisation .....	240
	13.4.2 Temperature Sensitivity of Net C-Mineralisation .....	241
13.5	Relationship Between N-Mineralisation and C-Mineralisation .....	241
13.6	Nitrification .....	243
	13.6.1 Autotrophic Versus Heterotrophic Nitrification .....	246
	13.6.2 Effects of Temperature and Water Stress on Nitrification .....	247
13.7	Conclusions and Indications of Human Impacts .....	248
	References .....	249

## **14 Fate, Transport, and Retention of Applied**

### **<sup>15</sup>N Labelled Nitrogen in Forest Soils**

R. Brumme, C.P. Wang, J. Priess, M. Raubuch, and G. Steinmetz

14.1	Introduction .....	253
14.2	Experimental Details .....	254
14.3	Transport and Leaching Losses of Added <sup>15</sup> N Labelled Nitrogen .....	255
14.4	Retention of Applied Ammonium and <sup>15</sup> N Balance of Forest Soils .....	258
14.5	Retention of Added Nitrate and <sup>15</sup> N Balances of Forest Soils .....	260
14.6	Temperature Effects on Transformation of Ammonium Applied to the Surface Organic Layer and to Mineral Soil Layers of the Solling Site .....	261
14.7	Conclusions .....	262
	References .....	262

## **15 Atmospheric Deposition and Canopy Interactions**

H. Meessenburg, J. Eichhorn, and K.J. Meiwes

15.1	Introduction .....	265
15.2	Precipitation Chemistry .....	269
15.3	Element Fluxes .....	273
15.4	Canopy Rain Interactions .....	279
15.5	Discussion .....	284
15.6	Conclusions .....	286
	References .....	299

## **16 Changes in Soil Solution Chemistry, Seepage Losses, and Input–Output Budgets at Three Beech Forests in Response to Atmospheric Depositions**

R. Brumme, H. Meessenburg, M. Bredemeier, C. Jacobsen,  
E. Schönfelder, K.J. Meiwes, and J. Eichhorn

16.1	Introduction .....	303
16.2	Soil Solution Collection and Statistical Analysis .....	304
16.3	Modelling of Water Fluxes .....	305
16.4	Calculation of Input–Output Balances of Various Elements and Acid Production .....	306
16.5	Solution Composition From Soils of Different Buffer Systems .....	308
16.6	Temporal Trends in Soil Solution Chemistry .....	311
16.7	Hydrologic Regime .....	316
16.8	Element Seepage Losses .....	319
16.9	Element Budgets .....	319

16.9.1	Solling Site .....	321
16.9.2	Göttinger Wald Site .....	325
16.9.3	Zierenberg Site .....	326
16.10	Acid Loading: Atmospheric Depositions and System–Internal H Production .....	327
16.11	Final Discussion .....	329
16.11.1	Response of Acid–Base Soil Properties to Decreasing Atmospheric Deposition .....	329
16.11.2	Response of N and C Budgets of Soils to Decreasing Atmospheric Depositions .....	330
16.12	Conclusions .....	332
	References .....	332
<b>17</b>	<b>Soil Respiration</b>	
	R. Brumme, W. Borken, and J. Prenzel	
17.1	Introduction .....	337
17.2	Soil Chamber Design Affects Soil Respiration Measurements .....	338
17.3	Temporal Variation of Soil Respiration .....	340
17.4	Spatial Variation of Soil Respiration .....	342
17.5	Soil Respiration in Temperate Beech Forests .....	343
17.6	Autotrophic Respiration .....	344
17.7	Effects of Additional N-inputs and Liming on Soil Respiration .....	347
17.8	Summary and Implications for Management Options .....	348
	References .....	349
<b>18</b>	<b>N<sub>2</sub>O Emission from Temperate Beech Forest Soils</b>	
	R. Brumme and W. Borken	
18.1	Introduction .....	353
18.2	Method .....	353
18.3	Temporal Variation of N <sub>2</sub> O Emission .....	354
18.4	Spatial Variation of N <sub>2</sub> O Emissions .....	356
18.5	Landscape Control on N <sub>2</sub> O Emissions .....	356
18.6	Relationship Between Temperature and N <sub>2</sub> O Emission .....	360
18.7	Implications of Forest Management for N <sub>2</sub> O Emissions .....	361
18.8	Conclusions .....	364
	References .....	365
<b>19</b>	<b>Methane Uptake by Temperate Forest Soils</b>	
	W. Borken and R. Brumme	
19.1	Introduction .....	369
19.2	Moisture and Temperature Effects .....	370

19.3	Site Factors Determine Methane Uptake .....	373
19.4	Effects of Liming and Forest Harvesting .....	377
19.5	Effects of Nitrogen Input .....	379
19.6	Conclusions and Indications of Human Impacts .....	382
	References .....	383

## **Part C Forest Management and Regional Scale Issues Concerning C and N**

### **20 Microbial Biomass in Broad-Leaved Forest Soils**

T.-H. Anderson

20.1	Introduction .....	389
20.2	Regional Distribution of Microbial Carbon of Broad-Leaved Forest Soils in Lower Saxony .....	389
20.2.1	The Significance of the $C_{mic}$ -to- $C_{org}$ Relationship and the Specific Respiration Rate, $qCO_2$ .....	392
20.3	Microbial Communities as Affected by Soil pH .....	397
20.3.1	pH Dependent Changes of the $C_{mic}$ - to- $C_{org}$ Relationship, $qCO_2$ and the Fungal–Bacterial Ratio of Broad-Leaved Forest Stands .....	397
20.4	Conclusion and Management Implications .....	400
	References .....	401

### **21 Soil Organic Carbon and Nitrogen in Forest Soils of Germany**

R. Brumme, M. Egenolf, C. Aydin, J. Block, K.J. Meiwes, and K.v. Wilpert

21.1	Introduction .....	405
21.2	Carbon and Nitrogen Stocks in Temperate Forest Soils .....	407
21.3	Environmental Controls on C- and N-Sequestration .....	409
21.4	Soil Control on C- and N-Sequestration .....	413
21.5	Environmental and Anthropogenic Control on C- and N-sequestration in Surface Organic Horizons .....	417
21.6	Conclusions .....	420
	References .....	421

### **22 Management Options for European Beech Forests in Relation to Changes in C- and N-Status as Described by the Three Study Sites**

N. Bartsch and E. Röhrig

22.1	An Introduction to European Beech .....	425
22.1.1	Geographic Range and Current Distribution .....	425
22.1.2	Environmental Amplitude .....	427
22.1.3	Growth .....	429
22.1.4	Crown Damages and Tree Mortality .....	431

22.1.5	Wood Quality .....	431
22.2	Common Forest Management Practices for European Beech .....	432
22.2.1	Regeneration .....	432
22.2.2	Soil Scarification .....	437
22.2.3	Liming .....	437
22.2.4	Thinning .....	438
22.3	Specific Silvicultural Characteristics and Treatments of the Three Beech Ecosystems .....	438
22.3.1	Solling .....	439
22.3.2	Göttinger Wald .....	440
22.3.3	Zierenberg .....	441
22.4	Naturalness of the Forest Management Practices .....	442
22.5	Effects of Forest Management Practices on C- and N-Dynamics .....	444
22.6	Conclusions .....	449
	References .....	450

## Part D Synthesis

### 23 Stand, Soil and Nutrient Factors Determining the Functioning and Management of Beech Forest Ecosystems: A Synopsis

R. Brumme and P.K. Khanna

23.1	Background and Issues .....	459
23.2	Productivity, C Stocks, C Balances, and Their Relations to Soil Chemical State of Three Beech Ecosystems .....	460
23.3	N Stocks and N Balances at Three Beech ecosystems .....	463
23.4	Nutrient Status and Productivity of European Beech Ecosystems in a Changing Environment .....	466
23.5	N-Status and Its Significance for European Forest Ecosystems ..	469
23.5.1	Forests of the Accumulation Type .....	471
23.5.2	Forests of the Degradation Type .....	474
23.5.3	Forests of the (quasi-) Steady State Type .....	475
23.6	Dynamics of C and N Sequestration in European Forests .....	476
23.7	Bioturbation as a Central Process of C and N Dynamics: Role of Soil Biota .....	479
23.8	Forest Management Strategies: Future Perspectives .....	482
23.9	Conclusions .....	484
	References .....	487

<b>Index</b> .....	491
--------------------	-----

Functioning and Management of European Beech  
Ecosystems

Brumme, R.; Khanna, P.K. (Eds.)

2009, XXIII, 501 p., Hardcover

ISBN: 978-3-642-00339-4
