

# Contents

<b>1 Vehicle Development Projects - An Overview .....</b>	<b>1</b>
1.1 Categories of Vehicle Development Projects .....	1
1.1.1 Design Level .....	1
1.1.2 Design Content.....	2
1.1.3 Innovation Level .....	2
1.1.4 Options and Country Versions .....	3
1.2 Platforms and Model Lines.....	4
1.2.1 Platforms .....	4
1.2.2 Model Lines .....	5
1.2.3 Side Effects / Restrictions .....	6
1.3 The Product Evolution Process (PEP) .....	6
1.3.1 Phases of the PEP.....	8
1.3.2 Processes of the PEP .....	9
1.3.3 The V-Model of Product Development.....	11
1.4 Vehicle Project Management.....	12
1.5 Aspects of International Development Projects.....	13
References .....	15
<b>2 Product Strategy.....</b>	<b>17</b>
2.1 Cars that Topped and Cars that Flopped.....	17
2.1.1 Tops.....	18
2.1.2 Flops.....	20
2.2 Factors of Success in the Automotive Industry .....	21
2.2.1 Worldwide Market Presence .....	21
2.2.2 Model Mix.....	22
2.2.3 Brand Profile .....	25
2.2.4 Product Profile .....	26
References .....	28
<b>3 Phases of the Product Evolution Process.....</b>	<b>29</b>
3.1 Initial Phase .....	29
3.1.1 Technical Feasibility .....	30
3.1.2 Economic Feasibility.....	31
3.2 Concept Phase.....	33
3.2.1 Vehicle Concept Design.....	33
3.2.2 Target Agreement.....	35
3.3 Series Development Phase.....	36
3.3.1 Component Design.....	36
3.3.2 Complete Vehicle Integration .....	36

3.3.3 Prototype Build .....	36
3.3.4 Launch Preparation.....	39
3.4 Series Support and Further Development .....	39
References.....	40
<b>4 Virtual Car Process .....</b>	<b>41</b>
4.1 Building Virtual Cars.....	41
4.1.1 Purpose and Benefits .....	41
4.1.2 Required IT System Environment .....	42
4.1.3 Specification.....	43
4.1.4 CA Data Provision.....	44
4.2 Geometric Integration .....	45
4.2.1 Collision Detection.....	45
4.2.2 Ensuring Functional Clearance.....	48
4.3 Further Functional Geometry Evaluation .....	50
4.3.1 Storage of Personal Items.....	50
4.3.2 Evaluation of Vehicle Kinematics .....	50
4.4 Virtual Build Groups .....	51
References.....	52
<b>5 E/E System Development.....</b>	<b>53</b>
5.1 From Machinery to E/E Systems .....	53
5.1.1 A New and Different World.....	53
5.1.2 Automotive E/E Systems.....	54
5.2 Systems Engineering Processes .....	56
5.2.1 A Clash of Cultures .....	56
5.2.2 Systems Engineering .....	57
5.2.3 Requirements Engineering .....	58
5.2.4 System Architecture and Design .....	60
5.2.5 Component Development.....	64
5.2.6 Systems Integration and Validation.....	68
5.2.7 Supporting Management Processes .....	72
5.2.8 CMMI.....	74
References.....	77
<b>6 Management Processes for Complete Vehicle Development .....</b>	<b>79</b>
6.1 Target Management .....	79
6.1.1 Complete Vehicle Requirements .....	79
6.1.2 Target Agreement.....	81
6.1.3 Sign-off Process .....	84
6.2 Design Problem Management.....	85
6.3 Release and Change Management .....	88
6.3.1 Releases.....	88
6.3.2 Design Changes.....	89
6.3.3 Change Management.....	91

6.4 Quality Management .....	92
6.4.1 Definition of Quality .....	92
6.4.2 Pre-delivery (Internal) Quality Assessment .....	93
6.4.3 Post-delivery (External) Quality Assessment .....	95
6.4.4 Quality Management Systems .....	98
6.4.5 Quality Costs .....	103
References .....	105
<b>7 Primary or Customer Relevant Complete Vehicle Characteristics .....</b>	<b>107</b>
7.1 Registrability .....	110
7.1.1 Legal and Customer Requirements .....	110
7.1.2 Component and System Design .....	113
7.1.3 System Integration and Validation .....	114
7.2 Total Vehicle Costs .....	116
7.2.1 Legal and Customer Requirements .....	116
7.2.2 Component and System Design .....	117
7.2.3 System Integration and Validation .....	120
7.3 Design Appeal .....	121
7.3.1 Legal and Customer Requirements .....	121
7.3.2 Component and System Design .....	127
7.3.3 System Integration and Validation .....	134
7.4 Cabin Comfort .....	140
7.4.1 Riding Comfort .....	140
7.4.2 Acoustic Comfort .....	146
7.4.3 Thermal Comfort .....	151
7.4.4 Value Perceived .....	156
7.5 Infotainment .....	159
7.5.1 Legal and Customer Requirements .....	159
7.5.2 Component and System Design .....	161
7.5.3 System Integration and Validation .....	164
7.6 Agility .....	166
7.6.1 Legal and Customer Requirements .....	166
7.6.2 Component and System Design .....	169
7.6.3 System Integration and Validation .....	183
7.7 Passive Safety .....	188
7.7.1 Legal and Customer Requirements .....	188
7.7.2 Component and System Design .....	195
7.7.3 System Integration and Validation .....	201
7.8 Theft Deterrence .....	209
7.8.1 Legal and Customer Requirements .....	209
7.8.2 Component and System Design .....	214
7.8.3 System Integration and Validation .....	218
7.9 Reliability .....	219
7.9.1 Legal and Customer Requirements .....	219
7.9.2 Component and System Design .....	222

7.9.3 System Integration and Validation .....	234
7.10 Sustainability .....	242
7.10.1 General Aspects.....	242
7.10.2 Energy Consumption and Tailpipe Emissions.....	244
7.10.3 Evaporative Emissions .....	265
7.10.4 Noise Emissions .....	268
7.10.5 Electro-magnetic Emissions .....	271
7.10.6 Treatment of End-of-life Vehicles.....	272
7.10.7 Pre-usage Sustainability .....	279
References .....	282
<b>8 Secondary Complete Vehicle Characteristics .....</b>	<b>287</b>
8.1 Production Integration .....	287
8.1.1 Legal and Internal Customer Requirements .....	287
8.1.2 Component and System Design.....	289
8.1.3 System Integration and Validation .....	291
8.2 Service Integration .....	294
8.2.1 Legal and Internal Customer Requirements .....	294
8.2.2 Component and System Design.....	295
8.2.3 System Integration and Validation .....	297
References .....	297
<b>Abbreviations.....</b>	<b>299</b>
<b>Index .....</b>	<b>305</b>

Automotive Development Processes  
Processes for Successful Customer Oriented Vehicle  
Development

Weber, J.

2009, XII, 312 p., Hardcover

ISBN: 978-3-642-01252-5
