

# Contents

<b>1</b>	<b>Motivation and a Few Cases.....</b>	<b>1</b>
1.1	Introduction .....	1
1.2	Motivation .....	2
1.2.1	Fairness and Economic Efficiency .....	2
1.2.2	Management Decisions and Incentives .....	7
1.3	Some Practical Cases .....	10
1.3.1	The Tennessee Valley Project .....	10
1.3.2	Farmer's Irrigation Costs .....	12
1.3.3	Regulating Public Monopolies .....	13
1.4	Limits of Scope .....	15
	References .....	15
<b>2</b>	<b>Simple Sharing Problems .....</b>	<b>17</b>
2.1	Introduction .....	17
2.2	Rationing Problems .....	18
2.2.1	Four Rationing Rules .....	19
2.2.2	Inequality Comparisons .....	22
2.2.3	Axiomatic Characterizations .....	26
2.2.4	Manipulation.....	29
2.2.5	Comments.....	34
2.3	Cost Sharing with Joint Cost Function.....	35
2.3.1	Rules Based on Equality and Proportionality .....	35
2.3.2	Rules Based on the Serial Principle .....	39
2.3.3	Rules Based on the Incremental Principle .....	55
2.3.4	Comments.....	57
2.4	Summary.....	58
	References .....	59
<b>3</b>	<b>Cost Allocation as Cooperative Games .....</b>	<b>61</b>
3.1	Introduction .....	61
3.2	The Model .....	62
3.2.1	Some Applications.....	64
3.3	The Stand-alone Cost Principle .....	66

3.4	Four Allocation Rules .....	74
3.4.1	The Nucleolus .....	75
3.4.2	The Lorenz Allocation .....	77
3.4.3	The Shapley Value .....	79
3.4.4	The $\tau$ -Value .....	81
3.5	Monotonicity Vs. the Stand-alone Cost Principle .....	84
3.6	Axiomatic Characterizations .....	87
3.6.1	Consistency and Reduced Problems .....	87
3.6.2	Characterizing the Nucleolus .....	89
3.6.3	Characterizing the Shapley Value .....	90
3.6.4	Characterizing the Lorenz Allocation .....	91
3.6.5	Characterizing the $\tau$ -Value .....	92
3.7	Comments .....	92
3.8	Summary .....	93
	References .....	94
<b>4</b>	<b>General Sharing Problems .....</b>	<b>97</b>
4.1	Introduction .....	97
4.2	The Model .....	99
4.3	Three Allocation Rules .....	100
4.3.1	The Aumann–Shapley Rule .....	100
4.3.2	The Shapley–Shubik Rule .....	104
4.3.3	The Friedman–Moulin Rule .....	105
4.4	Axiomatic Characterization .....	109
4.4.1	Non-additive Extensions .....	114
4.5	Practical Application by Convex Envelopment of Cost Data ...	116
4.5.1	Cost Allocation Using Data Envelopment .....	117
4.6	Comments .....	121
4.7	Summary .....	122
	References .....	123
<b>5</b>	<b>Sharing in Networks .....</b>	<b>125</b>
5.1	Introduction .....	125
5.2	Modeling Networks as Graphs .....	127
5.3	Minimum Cost Spanning Trees .....	127
5.3.1	Cost Allocation for Specific Spanning Trees .....	131
5.3.2	Characteristics of Cost Allocation Rules .....	134
5.4	Demand-Based Cost Allocation .....	140
5.5	Efficient Network Structure .....	144
5.5.1	The Model .....	144
5.5.2	Stability and Efficiency .....	146
5.5.3	Allocation Rules Respecting Network Structure .....	148
5.6	Comments .....	149
