## Theoretical Approaches to the Dynamics of Transposable Elements in Genomes, Populations, and Species

ARNAUD LE ROUZIC, PIERRE CAPY . . . . .	1
1 Introduction . . . . .	1
2 Genome Colonization . . . . .	2
2.1 Copy Number Dynamics . . . . .	2
2.2 The Birth of a New TE Invasion . . . . .	5
3 TE – Genome Coevolution . . . . .	9
3.1 Towards a Stable Equilibrium? . . . . .	9
3.2 Life Cycle of a TE Sequence . . . . .	12
4 Conclusion . . . . .	13
References . . . . .	14

## Infra- and Transspecific Clues to Understanding the Dynamics of Transposable Elements

CRISTINA VIEIRA, MARIE FABLET, EMMANUELLE LERAT . . . . .	21
1 Introduction . . . . .	21
2 Lessons from the Past . . . . .	23
2.1 The Heritage of Hybrid Dysgenesis Studies in <i>Drosophila</i> Populations . . . . .	23
2.2 The Sibling Species <i>D. melanogaster</i> and <i>D. simulans</i> . . . . .	25
2.3 In the Genome Sequencing Era . . . . .	26
3 Towards an Understanding of TE Regulation. From Sequence to Epigenetics . . . . .	27
3.1 Sequence Variability . . . . .	27
3.2 TE Dynamics at the Epigenetic Level . . . . .	30
4 Conclusion . . . . .	35
References . . . . .	37

## Morphological Characters from the Genome: SINE Insertion Polymorphism and Phylogenies

AGNÈS DETTAÏ, JEAN-NICOLAS VOLFF . . . . .	45
1 On the Importance of Getting the Phylogeny Right . . . . .	45
2 SINES . . . . .	47

3	SINE Insertion Polymorphisms as Characters for Phylogeny . . . . .	48
3.1	Character Quality vs. Character Quantity . . . . .	49
3.2	SINE Insertions are Apomorphies . . . . .	50
3.3	Levels of Application . . . . .	51
3.4	Assessing Homology and Recognizing Homoplasy . . . . .	55
4	Methods . . . . .	59
4.1	Choice of Test Taxon . . . . .	59
4.2	Isolation of New SINEs . . . . .	59
4.3	Isolation of New Insertion Loci . . . . .	61
4.4	Phylogenetic Reconstruction . . . . .	64
4.5	Additional Information from Insertion Loci . . . . .	65
4.6	Insertion Polymorphism of Other Mobile Elements for Phylogenetic Uses . . . . .	65
5	Conclusion . . . . .	65
	References . . . . .	66

### **Genome Defense Against Transposable Elements and the Origins of Regulatory RNA**

I. KING JORDAN, WOLFGANG J. MILLER . . . . .	77
1       The Ascent of Regulatory RNA . . . . .	77
2       RNAi and Genome Defense . . . . .	79
3       TEs and microRNAs . . . . .	81
4       Repeat-Associated Sequences and piRNAs . . . . .	83
5       Transcript Infection Model . . . . .	88
References . . . . .	90

### **When *Drosophila* Meets Retrovirology: The *gypsy* Case**

CHRISTOPHE TERZIAN, ALAIN PELISSON, ALAIN BUCHETON . . . . .		95
1	Introduction . . . . .	95
2	Historical Background . . . . .	97
3	Finding the Road to the Germline . . . . .	98
4	Origin of the <i>gypsy</i> Env . . . . .	99
5	Structural Analysis of <i>gypsy</i> Env . . . . .	102
6	Functional Analysis of <i>gypsy</i> Env . . . . .	103
7	Role of <i>gypsy</i> Env . . . . .	103
8	Conclusion . . . . .	104
References . . . . .		105

### **Transposon–Host Cell Interactions in the Regulation of *Sleeping Beauty* Transposition**

OLIVER WALISKO, TOBIAS JURSCH, ZSUZSANNA IZSVÁK, ZOLTÁN IVICS . . . . .	109
1 Introduction . . . . .	110

2	The <i>Sleeping Beauty</i> Transposable Element: Structure and Mechanism of Transposition . . . . .	110
3	Regulation of Transposition . . . . .	111
3.1	Transcriptional Control of Transposition . . . . .	112
3.2	Control of Synaptic Complex Assembly During Transposition . . . . .	115
3.3	Regulation of Transposition by Chromatin . . . . .	117
3.4	Regulation by Cell-Cycle and DNA Repair Processes . . . . .	118
3.5	Target Site Selection and Integration . . . . .	121
4	Concluding Remarks . . . . .	124
	References . . . . .	124

### **Interactions of Transposons with the Cellular DNA Repair Machinery**

	ZSUZSANNA IZSVÁK, YONGMING WANG, ZOLTÁN IVICS . . . . .	133
1	Introduction . . . . .	134
2	The Types of DNA Damage Produced by Transposons . . . . .	134
3	Cellular Processes Potentially Involved in Signaling and Repairing Transposition Intermediates . . . . .	135
4	The Main Classes of Transposons . . . . .	140
4.1	Cut&Paste DNA Transposons, V(D)J Recombination . . . . .	140
4.2	Copy&Paste Retroelements . . . . .	155
5	Repetitive Elements and Genome Stability . . . . .	161
6	Transposition and Cell Cycle . . . . .	163
7	Concluding Remarks . . . . .	165
	References . . . . .	166

<b>Subject Index . . . . .</b>	<b>177</b>
