

# Contents

## Part I High Performance Computing

<b>Introduction to Message-Passing Interface</b> .....	3
Honoré Tapamo	
1 Introduction .....	3
2 MPI Overview .....	5
3 Process Model and Language Bindings .....	9
4 Messages and Point-to-Point Communication .....	12
5 NonBlocking Communication .....	18
6 Collective Communication .....	21
7 Communicators, Groups and Virtual Topologies .....	27
8 Derived Datatype .....	32
9 Case Study : The Advection Equation .....	41
10 Overview of the Tasks .....	42
References .....	46
 <b>An Introduction to Grid Computing Using EGEE</b> .....	47
John Walsh, Brian Coghlan, and Stephen Childs	
1 Introduction .....	47
2 The EGEE Grid Architecture and Implementation .....	52
3 Computing on the EGEE Grid .....	61
4 Data Management .....	68
5 Putting it All Together .....	74
6 MPI Support in EGEE .....	76
7 Grid-Secured Applications .....	77
8 Conclusion .....	78
References .....	78
 <b>AstroGrid and the Virtual Observatory</b> .....	81
Nicholas A. Walton and Eduardo Gonzalez-Solares	
1 Introduction .....	81
2 The Challenge of Data .....	81

3	Standards and Interoperability . . . . .	84
4	AstroGrid: The UK's Virtual Observatory . . . . .	85
5	AstroGrid: The Infrastructure . . . . .	86
6	VODesktop: The Interface to the Virtual Observatory for the Astronomer . . . . .	91
7	Workflows in the VO . . . . .	95
8	AstroGrid in Use . . . . .	102
9	AstroGrid for the Astronomer . . . . .	110
10	Conclusions and Outlook . . . . .	111
	References . . . . .	112

## Part II Applications in Astrophysics

<b>Three Dimensional Continuum Radiative Transfer . . . . .</b>	<b>117</b>
Jürgen Steinacker	
1 Introduction . . . . .	117
2 Stationary Three Dimensional Continuum RT: Equation and Solution Strategy Examples . . . . .	120
3 Applications . . . . .	126
References . . . . .	135

<b>Large-Scale Jet Simulations . . . . .</b>	<b>137</b>
Turlough P. Downes	
1 Introduction . . . . .	137
2 What Questions Can We Ask? . . . . .	138
3 How Do We Ask Those Questions? . . . . .	139
4 Computational Approaches . . . . .	141
5 Physical Conditions for Jet Simulations . . . . .	143
6 Stability of Jets . . . . .	147
7 Jet-Driven Molecular Outflows . . . . .	148
8 Turbulence Generation . . . . .	150
9 Conclusion . . . . .	152
References . . . . .	152

<b>Modeling Accretion and Ejection Phenomena Around Young Stars: A Numerical Perspective . . . . .</b>	<b>155</b>
Claudio Zanni	
1 Introduction . . . . .	155
2 Jet Launching from Accretion Disks . . . . .	156
3 Magnetic Star–Disk Interaction . . . . .	165
4 Summary and Perspectives . . . . .	174
References . . . . .	175

<b>Jet Stability: A Computational Survey</b> .....	179
Rony Keppens, Zakaria Meliani, Hubert Baty, and Bart van der Holst	
1 Introduction: Planar MHD Shear Flows .....	180
2 From Planar Shear Flows to Three Dimensional Jets .....	182
3 Relativistic AGN Jet Modeling .....	192
4 Summary and Outlook .....	197
References .....	198
 <b>Jets and Outflows from Collapsing Objects</b> .....	 201
Robi Banerjee	
1 Introduction .....	201
2 Numerical Modelling .....	203
3 Magnetic Braking in the Pre-collapse Phase .....	205
4 The Initial Collapse Phase .....	207
5 Onset of Large Scale Outflow .....	208
6 Outflows from Massive Star-Forming Regions .....	210
7 The Onset of the Disc Jet .....	210
8 The Disc–Jet Connection .....	214
9 Magnetic Field Properties .....	216
10 Summary .....	218
References .....	219
 <b>Index</b> .....	 223

Jets From Young Stars V

High Performance Computing and Applications

Gracia, J.; de Colle, F.; Downes, T. (Eds.)

2009, XI, 227 p. 88 illus., Hardcover

ISBN: 978-3-642-03369-8
